## World news Business summary

### S African miners quit after tribal war

Half the 8,000 black workers at the Bhebe Gold Mine in the Orange Free State province of South Africa, have resigned or been fired after faction fighting which left eight dead and 53 injured.

General, the mine owners, said 400 workers were dismissed for carrying out a strike. The scale of the bloody tribal fighting indicated for the first time by the figures, induced a further 1,500 miners to resign and return to their homes in neighbouring Lesotho and the homelands of Transkei and Ciskei.

### Photographer held

Kidnappers seized a French photographer in Lebanon as British envoy Terry Waite pursued his latest mission to free Western hostages. The latest abduction brought to 19 the number of foreigners missing.

### Fresh Israeli raid

Israeli planes attacked Palestinian guerrilla positions in Syrian-controlled eastern Lebanon, the fourth raid on Lebanon in 10 days.

### Ambassador shot

Columbia's ambassador to Hungary was seriously wounded in an attack at his residence by an unidentified gunman.

### Pope in talks

Pope John Paul and Polish leader Wojciech Jaruzelski discussed Poland's problems and Church-state relations during an unusually long private meeting which the Pontiff described as "historic".

### Three die in riot

Three people were killed and 55 wounded in fresh ethnic riots in two cities of Pakistan's southern Sindh province. The ethnic riots, which killed 180 people last month, erupted during protests over the gang rape and murder of two young women.

### Swamp men killed

South African security forces in South Africa's north-western province of Namibia killed 36 guerrillas of the South West Africa People's Organisation, which is trying to liberate the country, in a series of clashes that spread across the border into neighbouring Angola, a military spokesman said.

### Jeng on attack

Chinese leader Deng Xiaoping criticised students who took part in recent protests and attacked two writers and an academic for trying to exploit the students.

### Hotel arson charge

A maintenance worker was charged with murder in connection with the fire in which 96 people died at the Puerto Rico hotel where he worked.

### Weather death toll

More than 100 people have died as a result of one of Europe's coldest winters on record, which is causing transport chaos, panic food buying and a severe freeze on fuel reserves.

### Chad shows POWs

Chadian authorities displayed 130 Libyan prisoners of war in a mass ceremony before diplomats, government officials and journalists.

### Kohl denies swing

West German Chancellor Helmut Kohl pledged to continue policies of co-operation with Eastern Europe and denied foreign policy would swing to the right if he won this month's general election.

### Hot tip

Dozens of people are scouring a rubbish tip in Pescara, east Italy, after a retired schoolteacher said the accidentally threw away a winning Libin (\$750,000) lottery ticket.

### Airbus wins \$2bn contract

AIRBUS INDUSTRIES, European jet aircraft manufacturer, won a \$2bn order for 50 of its medium-range aircraft, which makes its maiden flight next month. The deal was generated by Guinness Peat Aviation, the Irish aircraft financing company, and takes to 457 the total orders and options for the 150-seater A-320 aircraft.

### FERMENTA: Stockholm Stock Exchange board will meet tomorrow

to consider the expulsion of the beleaguered Swedish anti-alcohol and animal health group. Leading business officials have already decided to press for expulsion, the heaviest penalty the exchange can impose on a publicly quoted company, for grave breaches of its listing contract.

In New York, concern about the apparent willingness of the US Treasury to see the decline continue undermined what was otherwise a positive mood in the bond market and on Wall Street, based on belief that the US discount rate will be cut relatively soon to counter what is expected to be a very weak economic performance in the first quarter.

Adding another layer of nervousness to foreign exchange trading was concern about whether Mr Paul Volcker will be reappointed chairman of the US Federal Reserve.

Yesterday was the fifth consecutive day of heavy Bank of Japan in-

tervention in support of the dollar but its action has so far proved singularly unsuccessful. Many Japanese currency traders are now looking for a fall in the dollar's value to perhaps as low as ¥150 in the days ahead.

Mr Stephen Lewis, head of economic research at securities house Phillips & Drew in London, said the dollar's fall to the ¥155 to ¥158 range had raised serious questions about the current status of the accord signed in October by Mr Kiichi Miyazawa, Japan's Finance Minister, and Mr James Baker, US Treasury Secretary, on stabilising their currencies.

## Japanese support fails to reverse sharp fall in \$

BY OUR ECONOMIC AND FOREIGN STAFF

THERE was no respite for the dollar yesterday, despite another vigorous effort to stop its slide by the Bank of Japan in Tokyo, and it fell again sharply against most major currencies.

Some profit-taking developed after the dollar's steep and rapid decline this week, but this was short-lived.

The West German Bundesbank apparently refrained from attempting to support the dollar again yesterday and one foreign exchange dealer at a major US bank in London said he had never seen the market in such a negative mood about the dollar.

In New York, concern about the apparent willingness of the US Treasury to see the decline continue undermined what was otherwise a positive mood in the bond market and on Wall Street, based on belief that the US discount rate will be cut relatively soon to counter what is expected to be a very weak economic performance in the first quarter.

Adding another layer of nervousness to foreign exchange trading was concern about whether Mr Paul Volcker will be reappointed chairman of the US Federal Reserve.

Yesterday was the fifth consecutive day of heavy Bank of Japan in-

The Japanese authorities were reported to have been displeased by Mr Baker's remarks last week that he looked for an orderly decline in the US dollar. "The subsequent drop in the dollar, without any apparent protest from the US authorities, outrages the spirit of October's agreement," he said.

The dollar closed in London yesterday at ¥155.75 compared with Monday's closing ¥156.70 and at DM 1.8755 compared with DM 1.8805, its lowest level since October 1980.

The D-mark continued to be the main recipient of funds flooding out of the dollar, fueling concern about the durability of the weekend realignment of parities within the European Monetary System.

Yesterday saw the weaker member currencies slip toward their lower intervention points. The French franc, the Danish krone, the Irish punt and the lira all eased against the D-Mark. The Bundesbank was believed to have bought modest amounts of French franc against the D-Mark yesterday.

Foreign exchange dealers said the strain in the EMS was not serious at this stage but was expected to worsen.

## Norway will cut oil output to support higher prices

BY KEVIN DONE, NORDIC CORRESPONDENT, IN STOCKHOLM

NORWAY is to cut its planned North Sea oil production by around 7.5 per cent during the first six months of the year in support of recent moves by the Organisation of Petroleum Exporting Countries (Opec) to drive up oil prices.

It intends to reduce planned output by 80,000 barrels a day (b/d) with effect from February 1. The cuts will be spread across all seven oil fields now in production, Statoil, Ekofisk, Murchison, Ula, Gullfaks, Oseberg and Valhall.

The Norwegian Government said the cuts would be implemented in an attempt to help stabilise the oil price and to back steps by other oil producing countries outside Opec to regulate production.

Separately, an official at Petroleum Mexico was quoted yesterday as saying Mexico planned to limit its exports to the current level of 1.35 b/d in a "spirit of co-operation" with Opec's campaign.

This week, oil prices have moved above \$19.20 per barrel for the first time for more than a year helped by growing demand as a result of the harsh winter that has hit much of Europe.

Yesterday the price for Brent Blend, the key North Sea crude, fell slightly to \$18.35-40 a barrel following the strong gain recorded on Monday because of cold weather.

The UK, the other main North Sea oil producer, has persistently refused overtures from Opec to join in production cuts, but Norway made clear last night that its reductions would also apply to the Norwegian part of fields that straddle the median line between the Norwegian and UK sectors such as Murchison and Statoil.

Oslo's attitude towards co-operation with Opec has changed significantly since the minority Labour Government led by Mrs Gro Harlem Brundtland took office in May last year in the midst of the most serious economic crisis the country has faced for many years.

Oil has recently accounted for nearly a fifth of Norway's gross national product, more than a third of the country's exports and a fifth of the state's total revenues.

The economic crisis has persuaded the present Government to take measures to contribute to stabilising oil prices at what it calls "a reasonable level", provided that Opec itself acts effectively to bolster prices.

Norwegian oil production averaged some 850,000 b/d last year, but by December it had reached close to 1m b/d and it was expected to average some 1.05m b/d in the first half of 1987.

The cuts will reduce this level to around 970,000 b/d reducing the volume of Norway's oil exports by around 8.5 per cent.

## Argentine President dispatches peace message to Thatcher

BY ROBERT MAUTHNER, DIPLOMATIC CORRESPONDENT, IN LONDON

PRESIDENT Raul Alfonsin of Argentina has sent a verbal message to Mrs Margaret Thatcher, the British Prime Minister, believed to contain suggestions on how relations between the two countries could be improved.

The message was conveyed to Mrs Thatcher on Monday by Mr Edgar Bronfman, the president of the World Jewish Congress, who disclosed that he had been acting as an emissary at a press conference in London yesterday.

Mr Bronfman also said that he would relay Mrs Thatcher's reply to the Argentine President, but declined to give any further details.

The statement by Mr Bronfman, who heads an organisation representing Jews in 70 countries, appeared to contradict the categorical denial by the British Foreign Office on Monday that there had been off-

cial or unofficial contacts between Buenos Aires and London. British officials described newspaper reports to this effect as "nonsense".

Mr Bronfman said he had held talks for more than an hour with Mrs Thatcher, but stressed that they had dealt mainly with the plight of Soviet Jews and not the Falklands problem. He said he was going to Moscow next month for talks with "senior Soviet officials" and was "cautiously optimistic" that thousands of Soviet Jews wishing to leave the Soviet Union would be permitted to do so.

The immediate aim of the indirect contacts between Buenos Aires and London appears to be to reduce the danger of conflicts when the disputed new British fishing conservation zone around the Falklands, invaded by Argentina in 1982 and subsequently retained by Britain, comes into effect on February 1.

Mr George Younger, the British Defence Secretary who is on a six-day fact-finding mission to the islands, has given the 2,000 inhabitants reserved pledge on their future. He said at the beginning of his visit on Monday: "The British Government stands absolutely by the importance of ensuring the effective future defence of the islands."

Britain also stood by its undertakings that the islanders had the right to decide on how they wished to be governed.

A Downing Street spokesman said last night that what Mr Bronfman had communicated to Mrs Thatcher could not be described as a message. Mr Bronfman had merely given her an account of what President Alfonsin had told him.

Nor had anything been put down on paper.

## IBM has not quit S Africa, say trade unions

By Philip Dasset, Labour Editor, in London

TRADE UNIONS yesterday claimed that IBM, the world's largest computer company, has in practice not withdrawn from its South African operations.

The unions base their claim on a leaked IBM management letter, which they say shows that despite the company's highly-publicised disinvestment in South Africa last October, IBM's operations in the country will continue broadly as normal.

IBM blamed its decision on the deteriorating political and economic position in South Africa. Although it set up an independent company to market IBM's products there the decision to withdraw was widely seen as a considerable blow to business confidence.

The letter, from Mr Jack Clarke, formerly IBM South Africa's long-standing managing director and who is also heading the new company, aims to give to IBM's customers and associates in South Africa "unequivocal assurances" about the continuity of supply.

Mr Clarke's letter says that: "A full range of IBM products and services will continue to be available in South Africa through the current sole supplier."

IBM is fully committed to ensuring that all customers continue to receive a level of service normally associated with the company.

All IBM commitments to customers, dealers, agents, employees and suppliers will be honoured.

"I believe," the letter says, "our customers will appreciate that there will be no change to the supply of IBM products, that there will be the same standard of excellence in service from the new company, and that the new company will be able to respond to their needs with greater flexibility than a wholly-owned IBM subsidiary. In the current international climate, such flexibility will clearly be to our customers' advantage."

It says that the new company "will hold the sole franchise for IBM in South Africa, and has a supply and service contract with the IBM Corporation."

Union officials claim that this means that the new company will be free from any US Congress decisions on South Africa with which IBM itself would have had to comply.

## City of London curbs planned by Opposition

BY PETER RIDDELL, POLITICAL EDITOR, IN LONDON

A COMPREHENSIVE policy for the control and regulation of the City of London and for takeovers will be produced by Britain's opposition Labour Party early next month.

It will bring together recent work in the party on competition policy with proposals for a statutory authority to regulate City markets.

The integration of competition and regulation reflects Labour's view that making takeovers more difficult and laying down more stringent supervision of the conduct of bids will assist the interests of industry.

The timing of the launch reflects Labour's desire to make the City a major political issue in view of recent scandals. Mr Robin Cook, the party's trade spokesman, argues that the Conservative Government has helped to create a climate in which abuses flourish.

Labour will argue in detail that the onus of proof in a takeover should be shifted so that a bidder would have to justify his proposals. Official policy currently is only to block a bid if it would impede competition.

Labour would also broaden the relevant factors in assessing a bid. It would require that unusual methods of financing, bids by foreign groups, strategic or defence interests, and possible job losses would all create a presumption in favour of a reference to the Monopolies and Mergers Commission.

The Party will also urge a statutory authority for the City. Unlike the new Securities and Investments Board, the proposed body would be publicly funded, appointed by the Government and would have investigatory and prosecuting powers.

However, Labour stresses that the body would not be the same as the Securities and Exchange Commission in the US, in that it would not have a powerful role in secondary law-making and would not engage in plea-bargaining.

The publication of the document will be preceded by a lengthy discussion paper on competition policy from the Labour Finance and Industry Group, consisting of specialists and party supporters.

General political concern about the recent spate of takeovers was yesterday reflected in cross-party pressure in the House of Commons to refer the bid by BTR for Pilkington, the glass-makers, to the Monopolies and Mergers Commission.

Following a non-committal reply by Prime Minister Margaret Thatcher on the issue to a Conservative questionnaire in the House of Commons, Mr Cook wrote to Mr Paul Channon, the Trade and Industry Secretary, urging a reference to the Commission.

## Morgan Grenfell sets up review committee

BY DAVID LASCELLES IN LONDON

MORGAN GRENFELL, the British merchant bank at the centre of the Guinness affair, has formed a committee of directors - all of them senior figures in UK industry and finance - to look into its organisation and management controls, and recommend improvements.

The committee has also been asked to review the group's structure in light of its growing domestic and international business, and make whatever changes it thinks are needed.

A spokesman said that the committee inquiry "will not be a whitewash." He said it would be concerned with the effectiveness of management systems, not the conduct of individuals, and would demonstrate Morgan's readiness to address its entire organisational structure, including changes already proposed in the

wake of last year's Big Bang. Its findings will be discussed with the Bank of England.

This follows the launch last month of a Department of Trade inquiry into Guinness and the ordering by Mr Christopher Reeves, Morgan's chief executive, of an internal inquiry headed by Mr George Law, the group compliance officer.

The committee, which held its first meeting on Monday, is headed by Lord Catto, Morgan's chairman, and consists of Lord Pennock, the former chairman of BICC, Sir Peter Carey, the chairman of Dalgety, Sir Kenneth Durham, chairman of Woolworth, and Mr David Palmer, the chairman of Willis Faber, the insurance broking company which

## France starts negotiations on buying Awacs

BY DAVID BUCHAN, DEFENCE CORRESPONDENT

THE French Defence Ministry has begun negotiations with Boeing for three Awacs aircraft to give France its first airborne early warning (AEW) system, thus paving the way for a joint purchase with the US company along with Britain which last month decided to buy six Awacs.

For several months, France examined the same AEW options—the Boeing Awacs and the British-developed Nimrod—as Britain, with a view to buying the same system for less money.

However, both governments hope for larger savings from collaboration in training for

and maintenance of their Awacs fleets. France is also expected to push for the same commitment to place with the buying country's industry work worth 130 per cent of the Awacs contract, as Boeing has promised Britain. SNECMA of France is already set to build, in collaboration with General Electric, the engines powering the Awacs to be sold to the UK.

Anglo-French collaboration on the joint purchase is expected to be discussed when Mr Peter Levene, the British Defence Ministry's chief of defence procurement, visits Paris today and when Lord

Trefgarne, the British defence procurement minister, meets his French counterpart on Friday in Madrid for a meeting of the Independent European Programme Group (IEPG).

But its air force was always strongly predisposed towards the Boeing system. French officials only tested out GEC's Nimrod radar aircraft in French airspace on December 17, a day before the UK government cancelled the whole Nimrod programme in favour of buying Awacs. Since then, a French purchase of Awacs has been regarded as inevitable.

The two governments have now decided to place separate but parallel Awacs contracts within six months of each other to obtain a joint purchase discount from Boeing. This discount is expected to be small — a saving to the UK government of some £5m on the £800m it is to pay for six Awacs aircraft, and proportionately higher if the UK Defence Ministry finds an extra £200m to buy its desired total of eight aircraft. French officials expect to gain the same unit purchase discount from Boeing.

The IEPG was revived two years ago, partly to bring the French into closer arms col-

laboration with the other 14 European members of Nato, minus Iceland. So far, members have agreed they share a common need for about 10 military systems, including a 120mm mortar, anti-tank weapons, microwave landing systems, new generations of sonar buoys and medium range surface to air missiles.

Officials believe that what the IEPG now needs to do, to sustain its impetus, is to translate some of these needs into procurement action in 1987. An early candidate for an IEPG feasibility study is considered to be sonar buoys.

## Belgian pursuit of revaluation surprises EMS

BY TIM DICKSON IN BRUSSELS

AS CHAIRMAN of the meeting of European Finance Ministers which eventually agreed the 11th EMS realignment, Belgium's Mr Mark Eyskens was always expected to play a pivotal role. But his insistence on a revaluation of the Belgian franc — a move which helped prolong negotiations into the early hours of Monday morning — was without doubt the major surprise of the weekend.

Belgium's 2 per cent upward adjustment against the weaker members of the system was being interpreted in Brussels by some observers as a return to the policy of "strong money" pursued with other disastrous results between 1973 and 1982. That period was marked by heavy borrowing, high interest rates, and a loss of competitiveness which contributed to the disappearance of around 100,000 jobs in manufacturing industry.

Under the various coalitions of Mr Wilfried Martens, Belgium has since been pursuing a tough austerity programme designed to restore the economy's failing health. The question being asked is whether the time was ripe for the country to link its currency more closely to the D-Mark and the Dutch Guilder and the strong economies of its neighbours to the north and east.

Mr Eyskens himself justified the 2 per cent Belgian franc revaluation (which is automatically accompanied by a similar adjustment to the Luxembourg franc) by pointing to relative inflation rates. Belgium's inflation rate was an annualised 0.8 per cent in December or an average 1.3 per cent over 1986 and as such lies somewhere between the rate of price increases recorded over these periods by Paris and Bonn.

The Belgians were not alone in arguing that the EMS realignment was caused by the external problem of the weak dollar rather than fundamental economic divergence within Europe. Even more powerful evidence is provided by the balance of payments with Belgium's current account surplus expected by the OECD to increase by Bfr 8bn to Bfr 180bn (\$4.5bn) this year, while

that of West Germany is likely to fall by around 15 per cent.

Admittedly, the underlying picture is not so bright if adjustments are made for the boost from a lower oil price, but as a percentage of GNP it suggests one of the better trading performances in the European Community.

Labour costs in Belgium are also under control — largely thanks to the fall in inflation in a country where wages are indexed to prices. In wage negotiations, the Government has been committed since 1982 to keeping increases within a limit set by the average wage rises of the country's seven major trading partners. The result is that most of the gains in national income have gone directly to wage packets and not into pay packets and hence consumption.

With a new wage round just getting under way — amid tentative signs that moderate settlements may be possible again this year — avoiding the inflationary consequences of more expensive imports from West Germany is considered a high priority in Brussels.

That, though, is the good news. The bad news is mainly Belgium's huge budget deficit built up in the spare days of the 1970s and early 1980s. In 1985 this amounted to 12.4 per cent of GNP, in 1986 it was reduced marginally to 11.4 per cent, and in the wake of cuts of Bfr 200bn negotiated in the middle of last year the hope is that this can be substantially reduced to 8 per cent by the end of the current year.

The problem is that at current interest rate levels Belgium has to borrow simply to service its debt though the signs are that this "snowball" effect can now be contained.

According to Mr Philippe Braet, economist at the Brussels stockbroking firm of Peterbroeck, Van Campenhout, one of the big challenges for the Belgian authorities is to encourage an inflow of capital. "They will have to make the financial markets more sophisticated and more attractive," he said yesterday.

## Greek inflation rate falls

BY ANDRIANA IERODIACONOU IN ATHENS

GREECE's rate of inflation in 1986, the first year of a two-year economic stabilisation programme introduced by the Socialist Government, reached 16.8 per cent against a target of 16 per cent, the Economy Ministry announced yesterday.

The ministry announcement expressed satisfaction that the inflation rate had been brought down by about 8 percentage points from 25 per cent in 1985, but noted that the rate remained much higher than that of Greece's competitors.

Government economists partly attribute the overshooting of the 1986 inflation target to price increases registered last October in anticipation of the introduction of value added tax at the beginning of this year.

The Government imposed a three-month price freeze in early November in an attempt to minimise the repercussions of VAT on inflation.

The authorities have set an inflation target of 10 per cent for 1987. This is understood to allow for a 2 per cent increase in prices due to VAT. Independent economists, however, estimate that the new tax could cause prices to rise by up to 8 per cent this year.

## Nuclear test count slows

THE NUMBER of recorded nuclear tests last year was the lowest in 26 years because of the Soviet Union's decision not to conduct the experiments, a Swedish Government agency said yesterday. AP reports from Stockholm.

Sweden's National Defence Research Institute, FOA, said it recorded 21 nuclear explosions in 1986, compared with 30 in 1985 and an annual 50 to 55 during 1970-74.

The 1986 figure was the lowest since 1960, when three nuclear devices were detonated.

Twelve of the nuclear tests last year were conducted by the US in the Nevada desert. France detonated eight nuclear devices and Britain one.

## Kohl pledge to farmers on D-Mark revaluation

By David Marsh in Bonn

MR HELMUT KOHL, the West German Chancellor, yesterday defended last weekend's D-Mark revaluation as a contribution to monetary stability in Europe.

With an eye on West German farmers who have already called for action to make sure the revaluation does not damage agricultural earnings, Mr Kohl warned the EEC of possible complications in the forthcoming round of farm price meetings in Brussels.

Underlining that Bonn "understood" the problems of farmers, he said their interests would be "represented" at coming Brussels talks. Mr Kohl, comfortably ahead in the opinion polls leading up to the general election on January 25, made efforts to play down the impact of revaluation on the economy.

Calling it "acceptable and advisable," Mr Kohl said failure to act at the weekend could have led to a further long period of speculation.

At a news conference yesterday he also outlined a policy of "continuity" in West Germany's relations with its eastern and western neighbours.

He also said he supported the idea of a new German companies helping the Soviet Union modernise its nuclear power stations.

Mr Kohl denied that last week's calls from the French Government for a D-Mark revaluation had led to any deterioration in France-German relations.

West German officials say remarks by Mr Jacques Chirac, the French Prime Minister, calling for a D-Mark revaluation caused irritation in Bonn, but the differences now seem to have been buried.

It emerged yesterday, however, that action by the West German Bundesbank to cut money market interest rates may be only modest in coming weeks. The Bundesbank is likely to take action to keep day-to-day interest rates on the Frankfurt money market steady in their present range of 4-4.5 per cent down from the peak of 4.5-5 per cent before Christmas.

Mr Gerhard Stoltenberg, the West German Finance Minister, said on Monday he hoped a "limited fall" in West German money market rates would follow the EMS realignment. However, he ruled out any immediate cut in the discount or Lombard rates—currently at 3.5 per cent and 5.5 per cent respectively—saying he fully recognised the Bundesbank's reasons for not wanting to make any changes in its leading interest rates.

West German reluctance to cut interest rates was one of the basic reasons triggering off last week's massive speculation within the EMS.

Prospective heavy outflows of funds from West Germany which are likely to accompany the unravelling of speculative currency positions against the French franc will ease the Bundesbank's efforts to rein back excess growth in money supply.

The Bundesbank's money stock—the main yardstick of money supply—has grown by nearly 9 per cent over the past 12 months, well above its 1986 target of 3.5 per cent.

Reaching this year's target of 3-6 per cent announced by the Bundesbank last month, will imply a steep deceleration in the growth of the aggregate stock of money in the next few months—a task which has already been complicated by the New Year inflows.

## Jaruzelski and Pope hold talks

BY JOHN WILES IN ROME

POPE JOHN PAUL II and Gen Wojciech Jaruzelski, the Polish leader, had a 70-minute meeting in the Vatican yesterday, which the Polish Government hopes will lay the ground for improved church-state relations in Poland.

The general is believed to have extended the formal invitation for the Pope's visit to Poland in June at this, their third encounter since 1981.

Since the discussion went on somewhat longer than expected, it is thought the two men—the general smiling, the Pope stern-faced at their initial greeting—covered a good number of the weighty topics currently preoccupying them.

Afterwards, a Vatican spokesman described the discussions in

the Pope's library as "serious, clear and thorough." Focus was on general bad dealt with Polish social problems, relations between church and state, and questions of international peace.

Asked if he was satisfied with the meeting, Gen Jaruzelski replied for Polish audiences, stressing his presence in the city of Roman Catholicism: "I am always satisfied at each meeting with His Holiness."

This meeting is particularly important for one reason: it is taking place in the Vatican, during my visit to the Vatican and on the eve, one could say, of His Holiness' visit to Poland.

The Pope emerged to greet the members of the Polish delegation, which included the

general's daughter, Monika. He wished all a happy New Year, but refrained from any comment on the meeting.

It is thought likely that the Polish Communist leader again raised the question of establishing relations between Poland and the Holy See—a move the Vatican has resisted for fear Warsaw might then downgrade its contacts with the Polish bishops.

Later, on the second day of his three-day official visit to Italy, Gen Jaruzelski went on to talks with Italian businessmen and then for separate discussions with Mr Gianni Agnelli, president of Fiat, on the proposed \$1bn (\$745m) car plant project for Poland which has been agreed in most details

Pope John-Paul shows Gen Jaruzelski pictures of the Sixtine chapel in a book which he gave him as a gift.

## Moscow looks for 'new impetus' at Geneva

BY PATRICK COCKBURN IN MOSCOW AND WILLIAM DUFFLOUCE IN GENEVA

THE SOVIET decision to upgrade its leadership of Moscow's arms control team in Geneva was aimed at giving "a new impulse, a new dynamism" to the negotiations with the US, Mr Vladimir Petrovsky, the Soviet Deputy Foreign Minister, said yesterday.

Mr Petrovsky, who confirmed that Mr Yury Vorontsov, First Deputy Foreign Minister, and until recently ambassador to Paris, would head the delegation, said Moscow was determined to move ahead "in all seriousness and responsibility" at the nuclear arms reduction talks which resume tomorrow.

Accusing the US of attempting to return to former posi-

tions on arms control, Mr Petrovsky said that solutions should be based on the outline agreement reached at the October summit in Reykjavik between President Ronald Reagan and Mr Mikhail Gorbachev.

The two leaders came close to agreeing to eliminate strategic nuclear weapons over the next 10 years and remove all medium-range nuclear arms in Europe. But their talks finally broke down over Mr Reagan's refusal to abandon his Strategic Defence Initiative (SDI), the project for a space-based defensive system.

The Soviet Union continues to make the abandonment of

SDI, with the exception of laboratory research, a condition of an overall agreement on nuclear arms control.

The appointment of Mr Vorontsov was "a good signal," Mr Max Kampelman, the chief US negotiator, said in Geneva yesterday on his arrival for the resumption of the negotiations.

Mr Kampelman has been appointed a special counsellor to the State Department in response to the Soviet proposal to upgrade the delegations. But he hoped the Soviet Union understood that the next substantive move in the talks had to come from them. It would be highly unfortunate if Moscow made the miscalcula-

tion that the US would set differently as a result of a domestic problem over the Iranian arms scandal, Mr Kampelman said.

He saw opportunities for progress in the common ground reached in Reykjavik, although Mr Reagan had claimed on Monday that the Soviet Union had backedtracked from some important points.

Among the agreements on which the US delegation wanted to expand, Mr Kampelman said, was a 50 per cent reduction in strategic offensive arms over five years, which would leave each side with 6,000 warheads and 1,600 delivery vehicles.

## Turkish bank fears discounted

By David Barchard in Ankara

SEVERAL Turkish banks have been warned by the Treasury and central bank since 1984 to improve their asset position or increase their capital, the Undersecretary of the Treasury and Finance Trade Mr Yavuz Camerli said in an interview yesterday.

However, he denied that any warnings had been issued in the past year, and discounted press reports that one or more of Turkey's smaller banks might be in serious difficulties.

Our financial reporting system has been greatly improved since the new banking law was passed in 1983," Mr Camerli said. The central bank now had an early warning system. There was weekly supervision of the performance of the banks and a regular monthly review conducted jointly by the central bank and the Treasury.

An unspecified number of banks had been sent warning letters, giving them a timetable of commitments to meet. "Shortage of capital is the main problem," he said, "and we have told banks on occasions that we would freeze new credits by them unless they are adequately covered. But we don't ask them to do everything in one month."

His words will bring some reassurance to what has been a very nervous market in recent weeks. Several of Turkey's smaller banks which have made handsome profits in recent years on trade finance and similar operations have been unfavourably affected by the squeeze on foreign exchange here for most of the past year.

## 1987 good reasons to see Thailand this year

Majestic temples and magnificent elephants, glittering roofs and garlands of orchids, enchanting people and exotic cuisine...one could write a long book about the land they call Thailand (and many seasoned travellers have). And never has there been a better year to see Thailand than 1987. For this is Visit Thailand Year in the Land of Smiles.

Among the kaleidoscope of festivities planned for 1987 you should try to catch some of these:

**Feb. 13-15. Chiang Mai Flower Festival.** A million blooms, a thousand smiles. One of the unforgettable moments of your life.

**April 13. Songkran Festival.** A nationwide water festival celebrating the Thai Lunar New Year.

**May 9-10. Bun Bang Fai Festival.** "Bang" indeed. Held in northeast Thailand, a fireworks show like no other you've ever seen.

**Oct. 16. Royal Barge Procession.** An armada of brilliant colours, pageantry and rare splendour not to be missed.

**Nov. 5. Loy Krathong.** Celebrated nationwide, this is Thailand's loveliest festival.

**Nov. 14-15. The Elephant Round-Up.** Ever seen 100 elephants enact a medieval War Parade? You will if you come to Surin in northeast Thailand for this extraordinary display.

**Nov. 22. Bangkok Marathon.** A major sporting event commemorating His Majesty the King's 60th Birthday Anniversary.

**Dec. 15. Light and Sound Presentation.** A glittering occasion to be held at the Royal Grand Palace and the Temple of the Emerald Buddha.

These are only a small selection of the truly stunning special events that mark 1987 as Visit Thailand Year — a year full of festivities, flowers and fireworks.

Make your holiday plans now. And make sure you fly on Thailand's own airline, Thai International.

Where the exotic sensations that are Thailand start from the moment you step on board.

Pentagon's interest has concerned Europe, writes Peter Marsh  
US cloud over space station

REPRESENTATIVES of 13 West European nations meet in Paris tomorrow to discuss whether renewed interest by the Pentagon in using a proposed international space station to impede collaboration between the US and Europe in developing the base.

The meeting, a working party of the European Space Agency, will consider the implications of a US government review of plans for the \$12bn station, which the US is due to build by the mid-1990s in partnership with Western Europe, Japan and Canada.

The review, prompted by the US military, has caused a month-long postponement of negotiations on building the structure, which is intended to be primarily a civilian facility.

In turn, this has led to fears that plans for an overt military use of the base, possibly for activities related to the Strategic Defence Initiative (SDI), could make agreement less likely.

Negotiations on this issue, due to be finalised by the spring, have already slipped by several months and proved more difficult than expected. The main stumbling blocks have been a desire by the other countries to be treated as something more than junior partners in the venture and to have the right to organise activities on the base independently of the US.

According to observers, the possible military involvement in the space station could well

add a further complexity to the negotiations. "If the Defence Department wanted to have a major say in running the station, it could make it very difficult for the Europeans to finalise an agreement," said Dr Bhupendra Jassani, a space policy analyst at the Stockholm International Peace Research Institute in Sweden.

President Ronald Reagan unveiled plans for the structure three years ago, at the same time inviting the other countries to join the programme. The station is scheduled to accommodate about six people for up to three months at a time, with \$80m of the construction cost contributed by the US.

It is intended to act as a servicing platform for satellites and to house laboratories for experiments in areas such as low-gravity materials processing.

At the time of Mr Reagan's announcement, the Pentagon showed little interest, arguing that the jobs for which it required people in space could be handled adequately by the space shuttle.

Although the military have never ruled out using the station for scientific experiments, the National Aeronautics and Space Administration was careful to state three years ago: "There is no direct linkage between the space station and current or projected military programmes."

Since 1983, however, the shape of the US space pro-

gramme has changed dramatically, mainly due to the impact of the Challenger disaster last January. As a result of this, missions of the three remaining shuttles are suspended until early next year.

Still more important from the Defence Department's view point, escalating costs have forced it to mothball indefinitely a \$8bn launch pad at the Vandenberg Air Force Base in California from which the Pentagon was to have conducted its own shuttle operations. At the same time, the Pentagon's requirements for putting people into space have increased as a result of plans for an intense space research programme connected with the SDI.

This sequence of events may have convinced the Defence Department that it should raise its profile in the international discussions about the use of the station. The main US agencies involved in the talks with the other countries have been NASA and the State Department.

According to the Pentagon, its policies regarding the station are essentially unchanged. "We have no specific plans for the station," said a Defence Department spokesman. "But we want to reserve the opportunity to conduct scientific experiments on the station and to ensure nothing is foreclosed by the negotiations with the US's allies."

The countries involved in the space station talks with the US are, in general, reluctant to speculate about the impact of the US review until they are told of its results during meetings scheduled for next month.

Mr Frederic d'Allest, director general of the French space agency (CNES), which provides the European portion of the budget of the European Space Agency, said the review posed "additional problems" for the international discussions. But he had "no major worries" that the main points of an agreement between the US and Western Europe would fail to be thrashed out as scheduled.

## EUROPEAN NEWS

## Big freeze threatens East Europe's economic plans

BY LESLIE COLITT IN BERLIN

**EAST EUROPEAN** countries from the Baltic Sea to Romania reported widespread disruption in transport, energy and industrial production, as a result of continued bitter cold and blizzards. The severe winter storms and night-time temperatures ranging from -18C to -28C threaten to wreak havoc with this year's ambitious economic plans in the region.

Tens of thousands of miners, soldiers and civilian helpers worked around the clock in the open cast brown coal mines of East Germany's Polish, Czechoslovakia and Romania to free frozen mining equipment and railway tracks of ice and snow.

Low-energy brown coal is used to generate most of East Germany's electricity, and

**THE POLISH** authorities have revealed that the price they pay for Soviet oil, which makes up 85 per cent of annual domestic consumption, has fallen by 11 per cent, writes Christopher Bobinski in Warsaw.

The price drop, the first since the mid-1970s, from roubles 172 (£175) a tonne last year to roubles 153 (£156)

a tonne in 1987 reflects last year's fall in the world oil price. Within Comecon, the Soviet oil is negotiated on the basis of the average of the world oil price taken for the previous five years—or 1982 to 1986 in this year's case.

Since 1980, the price Poland has paid has risen by 87 per cent. The increased cost of

oil, as well as that of natural gas, has been an important factor in contributing to the rouble 5.2bn debt Poland ran up in the 1980s with the Soviet Union.

Imports of natural gas, oil and petroleum products from the Soviet Union make up just over 50 per cent of the value of that country's sales to Poland.

cars were largely immobilised by drifting snow in Hungary, where many factories reported production losses.

A hundred and thirty communities in North Eastern Hungary are entirely snowbound. Rail transport was brought to a standstill in Slovakia and 233 trains were halted by drifting snow throughout Czechoslovakia, where power cuts were frequent.

The East German news agency, ADN, said the port of Rostock, which handles 25 per cent of East Germany's foreign trade, was partially closed. A number of factories lost production and 14,500 consumers were cut off from electricity by fallen power lines.

The rail link between Hamburg and Berlin was rendered impossible by snow, and canals to West Berlin used for bulk transport, were icebound. The city, however, receives much of its fuel from East Germany and has stockpiled oil and coal for several months.

Reuters adds from Moscow: At least 77 people were reported dead in the Soviet Union where officials said it was the coldest January since 1950. The Tass news agency reported that avalanches in the mountainous southern republic of Georgia had killed 29 people and rescue teams were continuing search operations.

In Leningrad, the temperature was -35°C, the coldest since records were started in 1743.

## Last-ditch effort in Genoa to avert crippling port strike

BY ALAN FRIEDMAN IN MILAN

**OFFICIALS** of the Genoa port authority and Communist trade union leaders were last night making last-ditch efforts to head off a potentially crippling strike tomorrow.

The tense negotiations between Mr Roberto D'Alessandro, chairman of the port authority, and leaders of the CGIL union, which represents more than 3,000 dockworkers—more than 90 per cent of the workforce—came six weeks after the start of labour troubles in Genoa. These threaten to undo nearly three years of restructuring and modernisation of the port which was once a leading Mediterranean shipping centre.

Mr D'Alessandro, a former executive at Fiat, Pirelli and Zanussi, has worked since 1984 to privatise and relaunch the port. There were no strikes during the 33 months so December, but now the Communist union is refusing to agree new working arrangements.

The two other leading Italian

unions, the CISL and UIL, have already accepted the plan, which will bring Genoa out of 1950s-style "gang methods" into the modern world of containerised shipping.

The CGIL has called on Mr Bettino Craxi, the Prime Minister, to intervene. He seems unlikely to do so, however, having picked Mr D'Alessandro for the job three years ago.

Genoa has already lost more than \$5m worth of container business since the labour troubles started last month. If the Communists continue their disruptions, the port's goal of breaking out of loss this year could be placed in jeopardy.

One port official said last night that the struggle was only partly about the working arrangements. "What is really at stake here is the power and influence of the Communist workers' co-operative which is upset that it can no longer call the shots at Genoa, as it used to in the old days," he said.

## Japanese leader has talks in Berlin with Honecker

BY OUR BERLIN CORRESPONDENT

**THE JAPANESE** Prime Minister, Mr Yasuhiro Nakasone, yesterday met Mr Erich Honecker, the leader of East Germany on his first visit to that country.

He leaves East Berlin for Yugoslavia today and will end his East European tour in Poland. Mr Honecker visited Japan in 1981 and returned with high hopes of forging closer economic links.

Yesterday's talks centred on trade relations between the two

countries, which withered after a promising surge in the early 1980s. Bilateral trade reached \$557m in 1983 but fell to \$181m in 1985, with a substantial surplus for Japan.

Japanese producers have been reluctant to co-operate closely with East European state companies, which are perennially short of hard currency. The Japanese, however, have financed several luxury hotels for hard-currency visitors to East Germany.

## Struggle in Ireland over budget

By Hugh Carnegie in Dublin

**IRELAND'S** Fine Gael Labour coalition today embarks on its final attempt to agree a budget deal in two weeks time, with ministers from the two parties still some way apart on the key issue of spending cuts.

If they fail to reach agreement, the Government, elected in November 1982, will fall before the end of the year, and a general election will be held in February. Even if they do agree, the budget has little chance of getting through Parliament where the coalition is in a minority.

Today's cabinet meeting will centre on the level of spending cuts needed to meet the coalition's targets for this year of a current budget deficit equivalent to not more than 7.4 per cent of gross national product and Exchequer borrowing of 11.8 per cent. This task was made more difficult by overruns which pushed 1986 results well beyond those targets.

Dr Garrett FitzGerald, the Prime Minister, and his 10 Fine Gael ministers want significant cuts in social welfare, health and education spending to meet the targets, arguing that the already very high tax base cannot be extended any further.

Labour's four ministers, led by Mr Dick Spring, the Deputy Premier, believe the Government has gone far enough in cutting social spending and would favour "selective" tax increases or revision of the deficit and borrowing targets.

Officials from both parties acknowledge that the chances of a budget being agreed are diminishing. The Government must produce a book of estimates, outlining departmental spending for 1987, seven days before the budget is due on January 23, so time is fast running out.

If Labour, as the junior partner, pulls out of the coalition over the next few days, Dr FitzGerald may carry on to present a Fine Gael budget as Parliament does not resume until budget day.

Even though it would certainly be voted down, it would stand as the party's manifesto for dealing with the country's deep economic problems.

## Leslie Colitt reports on moves to make bankers more responsive to profitability Hungary tackles reform of banking system

**HUNGARY** has launched Eastern Europe's first profit-oriented and competitive commercial banks this month as part of a major reorganisation of the banking system. The aim is to make those responsible for the allocation of financial resources more responsive to profitability and thus force industry and agriculture to stand on their own feet, rather than depending on state subsidies.

Five new commercial banks will compete to provide loans to companies in every sector of the economy. They are expected to compete mainly in terms of the services they offer rather than interest rates, which will still be set by the National Bank of Hungary, as

business. Their starting point, however, is decidedly unequal.

The Hungarian Credit Bank, for example, has been assigned most of the leading companies which account for two thirds of Hungarian industrial output. Moreover, the bank's president, Mr Sándor Demján, former president of Hungary's most successful retail chain, Sklep-Építő, happens to be a leading member of the Budapest Communist Party. Whether the other banks will be able to compete against such an influential rival is open to question.

Apart from central bank control, the commercial banks will be subject to supervision by the Finance Ministry and the state will retain a majority share in all of them.

Companies will be permitted to become shareholders, although as this might be them permanently to one bank, the effect could be to undermine the competition between banks that the system is intended to foster.

Individual Hungarians will not, at this stage, be able to buy shares in the banks, though it is envisaged that one day they may do so, much as they now buy 11 per cent company bonds to beat inflation. This, however, would require significant changes in the law which, as in other Communist countries, does not permit individuals to own companies.

The new two-tier system, based on ideas which have been evolving in Hungary for more than a decade, is intended to make the allocation of financial resources more efficient. By separating state disbursements and investments from commercial bank loans, the authorities hope to expose those allocating resources to the financial consequences of their decisions.

This at least is the theory. In practice the new commercial banks appear unlikely to have sufficient scope to make much impact. They will have no more money available than the state-owned banks, and urgently needed modernisation of industry and infrastructure than did the National Bank when it had a monopoly on such time state disbursements and investments are set to rise 5 per cent to Forint 215bn (£3.19bn) this year.

The pattern of the last six years is not encouraging. Since 1980, while overall investment has fallen by 22 per cent, loss-making heavy industry and mining have been devouring an ever-increasing share of state subsidies to the point where a quarter of the state budget now goes toward propping up loss-makers.

The Government's policy of transferring earnings from profitable to unprofitable companies prevents the efficient ones from accumulating adequate investment funds.

About Ft 9bn of investment capital has been raised since 1984 by the state disbursements company bonds to other companies and to the public. But this is only a drop in a bucket compared with the nearly Ft 1,600bn which the Government spent on supporting lame ducks in 1985.

Mr Bela Csikós-Nagy, an influential Hungarian economist, advocates direct foreign investment in Hungary instead of the increased borrowing in the West which last year boosted the country's net debt to \$7.4bn.

But Western companies have shown less confidence than Western banks in Hungary's abilities to overcome its present considerable economic difficulties.

Banking confidence was further undermined this month by the opening in Budapest of a new Hungarian commercial bank with Western participation—Unibank. Capitalised at Ft 1bn (£200m), it is owned by the International Finance Corporation (IFC—an affiliate of the World Bank), DG Bank of West Germany and

GZB, the Austrian Co-operative Bank, each of which hold a 15 per cent share, and a number of Hungarian banks and organisations which have taken up the remaining 55 per cent.

The setting up of Unibank represents the first investment in a Comecon country by the IFC, and Hungarian officials certainly see it as a vote of confidence.

It follows the establishment last year of a commercial bank in Budapest jointly owned by Citibank of New York, the majority shareholder, and the Central Exchange and Credit Bank of Hungary.

Like Citibank, Unibank may deal in both forints and Western currencies but it is not licensed to grant loans to individuals. It will accept deposits from co-operatives and state-owned companies and will finance trade as well as providing medium- and long-term investment loans.

But while Western banks are moving in, most Western com-

panies are insisting that they want to see evidence of a few key economic reforms before they will contemplate investing heavily in joint ventures.

In particular, they want to see proof of differentiation in wages and a reduction in subsidies to loss-makers—reforms which the Hungarian leadership has long resisted for fear of social unrest.

While Mr Miklós Nemeth, the new head of the Economic Policy Department of the party's central committee, insists that these two reforms must be implemented and blames the leadership for its retreat in the face of "social pressures," most Hungarian economists and officials agree that the leadership under Mr János Kádár will proceed slowly and very cautiously.

For reform has become something of a dirty word among the many Hungarians who care less about sophisticated banking

Mr János Kádár: cautious leadership

than about the problems of reconciling spiralling prices with a fixed income.

## BRITAIN'S PRODUCT ENGINEERS CAN NOW DESIGN THE MOST ADVANCED MICROCHIPS IN THE WORLD.

Just as the lever pried open the doors to the mechanical age, it now seems inevitable that the micro-circuit will be the key to industrial progress in the 21st century.

As today's product engineers design ever-newer and ever-better products, they require growing numbers of application specific microcircuits to make them work. And Motorola is one of Britain's largest sources of these complex circuits.

We operate regional design support centers for Application Specific Integrated Circuits (ASIC) in the U.K., Germany, Italy, France and Sweden.

At these offices, our field applications engineers assist customers in fitting their ideas to Motorola circuits that become "customized" to the requirements of the final product.

These centers support the leading industry design automation tools for customer engineers to work on-site. We also provide link-up for those customers who wish to design chips at their own engineering work stations. Our computer aided design (CAD) tools permit a designer to transform ideas to a language that we can turn into functional silicon. And these circuits can bring the most advanced technologies to your new products.

In this way, British engineers can take the shortest path to the most advanced, custom-function circuits, without the extensive time or expense involved in engineering custom chips from scratch.

Once the design is complete, it is checked by our computers and processed to our mainframes for entry into prototype production. Then, in a matter of weeks, the customer receives a supply of finished, fully functional, electrically tested prototype chips.

But ASICs are just one part of our activities in Europe. We operate manufacturing facilities and design centers for a wide variety of advanced electronics products here in the United Kingdom, the Federal Republic of Germany, in France and in Switzerland. And we serve our European customers from more than 80 offices.

Motorola is one of the largest electronics companies in the world. We do business on five continents.

And wherever we are, we all share a deep dedication to the service of our customers in wireless voice and data communications, computers, semiconductors and components for defence, aerospace, automotive and industrial electronics.

## OVERSEAS NEWS

## Ivory Coast success heads for crossroads

BY PETER BLACKBURN IN ABIDJAN

THE Ivory Coast, regarded as a model for economic development in west Africa, is approaching a crossroads as it attempts to restructure its economy and move towards self-sustained growth, according to a confidential World Bank report.

Although the bank says that "remarkable results" have been recorded and the economy stabilised after four years of economic adjustment, it warns that serious social, agricultural, industrial and financial constraints still need to be overcome if the country is to achieve durable growth.

Failure would not only be a severe blow to the credibility of the World Bank and International Monetary Fund in Africa but could also threaten political stability in one of the staunchest African allies of France and the West.

The Ivory Coast is regarded as a "favourite son" by many multilateral and bilateral donors and, unlike certain other African states such as Zaire, has received massive financial support to carry out economic reforms.

These have included sharp cuts in public expenditure, restructuring of state corporations, promotion of private, especially export-oriented,

enterprise, trade liberalisation and greater incentives for farmers.

The World Bank has pumped in aid worth some \$1.5bn, most of it since 1980. It recently approved a third structural adjustment loan worth \$250m, focusing on reforms in the agricultural and energy sectors.

In order to accommodate the growth in its operations the bank moved in 1985 into purpose-built offices costing nearly \$3m in Abidjan's exclusive Cocody district.

The IMF has also provided solid support with four loans worth SDR 732.8m (\$611m) since 1981. Its current two-year agreement, which expires mid-1988, continues financial adjustment measures.

Despite the financial improvement, the Ivory Coast still faces a "difficult outlook," according to the Fund. Heavy debt service, vulnerability of public finances to fluctuations in world cocoa and coffee prices and the slow response to industrial reforms are the main concerns.

The Ivory Coast is also the main beneficiary of French aid in black Africa, receiving nearly \$200m in 1986. French Prime Minister Mr Jacques Chirac's choice of the Ivory Coast for his first foreign trip last April, only three weeks after his nomination, shows the

importance the French Government attaches to Ivorian relations.

Ivory Coast also used to be a favourite with commercial bankers until it was obliged, after a series of setbacks culminating in a serious drought, to reschedule its external debt in 1983.

However, a four year rescheduling from the London Club of commercial creditors last year shows it is still favourably viewed.

The Ivory Coast also became the first African country to obtain a multi-year rescheduling from the Paris Club of official creditors in 1986.

Both groups were encouraged by signs that economic reforms were starting to yield positive results. The country started to climb out of several years of recession with 5 per cent real growth in 1985, and inflation reduced to 2 per cent. More modest growth of around 3 per cent is forecast in 1986/87 as weaker world commodity markets reduce cocoa and coffee earnings.

But in spite of these encouraging signs the World Bank warns that underlying constraints in the social, agricultural and industrial sectors need to be resolved during the next five years if the country is

to achieve self-sustained growth. Implementation of the World Bank's reforms has to some extent been hindered by the exodus of expatriate, mainly French, technical advisers over the past couple of years due to the country's financial difficulties.

Unlike most other African leaders, President Houphouët Boigny has made extensive use of foreign experts, mainly teachers and technical advisers in government ministries, since independence from France in 1960.

Commenting on the structural reforms first introduced in 1981, one Western aid donor said: "It was a painful decision for the Ivory Coast to cut its coat to match its cloth. It would be a pity if it slipped back into its former lifestyle," characterised by budgetary overspending, misallocation of resources and too high external borrowing.

Failure to carry through the reforms and resume durable growth could kindle explosive social tensions, Western diplomats here believe, and make the maintenance of political stability a much more difficult task for the ageing President's eventual successor.

## S African forces kill 56 Swapo guerrillas

By our Johannesburg Correspondent

SOUTH AFRICAN and locally recruited Namibian forces crossed the Angolan border to launch a series of raids against South West Africa Peoples Organisation (Swapo) guerrillas in southern Angola over the past few days in which 56 Swapo and 6 defence force soldiers were killed.

The South African military headquarters in Windhoek said helicopters and mobile land forces were used in an attempt to forestall the annual wet season infiltration of Swapo guerrillas operating from Angolan bases.

The raids have come late to the war zone in northern Namibia this year and intelligence reports showed small concentrations of guerrillas in a shallow zone north of the Namibian-Angolan border where most of the fighting took place. Last year the security forces claimed that 645 Swapo guerrillas were killed by security forces compared to 589 in 1985. Defence force casualties were estimated at roughly 5 per cent of Swapo fatalities.

Swapo is recognised by the United Nations as the "sole representative of the Namibian people".

## Faction fighting cuts S African goldmine workforce by half

BY ANTHONY ROBINSON IN JOHANNESBURG

HALF THE 8,000 strong black labour force at the Beatrix gold mine in the Orange Free State has either resigned or been sacked following the outbreak of tribal "faction fighting" last weekend which left 8 Basotho miners dead and 53 miners injured.

Gencor, the mineowner, said that 400 workers had been dismissed for carrying offensive weapons. The figure indicates, for the first time, the scale of the bloody fighting which has induced a further 3,500 miners to resign and return to their homes in Lesotho, the Transkei and Ciskei.

The latest outbreak of factional fighting follows the death of over 60 miners at the end of last year when fighting on ethnic lines broke out at several mines, most severely at the Vaal Reef complex owned by Anglo-American Corporation.

Union and management officials are still investigating the causes of the latest conflicts which the National Union of Mineworkers blames on the migrant labour system and the single sex hostels organised on tribal lines.

Gencor believes that the specific origin of the outbreak at its Beatrix mine was a fatal stabbing incident outside mine property a week ago.

Local management and representatives of the Lesotho and Transkei tried to persuade workers not to leave, but failed. The company estimates it will take at least two months to replace the lost workers and up to 150,000 tons of ore may be lost as a result.

Beatrix, a new mine which is a sub-division of the Buffalo complex, produces around 170,000 tons of ore a month of an average grade of 6.5 grammes/ton giving around 1,105 kg of gold a month.

Mr Mohamed Vally, acting general secretary of the nation's largest anti-apartheid group, has been detained under the Government's emergency powers, AP reports from Johannesburg.

Mr Vally, who had been in hiding on and off for about two years, was picked up in Johannesburg on Monday evening, other members of the United Democratic Front (UDF) movement said.

Mr Vally has served as the UDF's acting general secretary since Mr Popo Molefe, the permanent holder of that office was arrested and charged with treason along with 21 other activists in 1985.

## Deng makes first public attack on protesters

BY ROBERT THOMSON IN BEIJING

THE Chinese leader, Deng Xiaoping, in his first public comments on the student protests, yesterday criticised those who took part and attacked two writers and an academic for trying to exploit the students.

Most protesting students openly supported Deng and his reform programme, but the Chinese leader told Mr Noboru Takeshita, the visiting Japanese prime minister, that the Japanese Liberal Democratic Party, that the protests showed the students lacked political guidance.

The Chinese leader also accused three party members — Fang Lihai, an astrophysicist, Wang Ruowang, a writer, and Lin Binyang, a journalist — of encouraging the students to advocate the "total westernisation" of China. The three have become the scapegoats in the party's campaign against "bourgeois liberalism."

Speculation continued in the Chinese capital yesterday on the whereabouts of Hu Yaobang, the Communist Party General Secretary, who was "too exhausted" to meet Mr Takeshita. Mr Deng had an opportunity to clear up the mystery surrounding Mr Hu when the visiting Japanese politician asked for his best wishes to be given to the party boss, but Mr Deng simply said "thank you."

Diplomats doubt Hu is in immediate political danger, though it is uncharacteristic of him to miss a meeting with a visiting dignitary. A party spokesman questioned on Mr Hu's condition said only that he was "not in good health."

The future of Zhu Rongji, the propaganda chief, is still in doubt. The Chinese press yesterday reported a meeting of senior propaganda officials but did not mention him. The attending officials said publishing had become a "battleground" for socialist culture and ideology.

Meanwhile, the South China

Deng — student protesters want too far

Morning Post, a Hong Kong newspaper, has published extracts from an alleged directive containing protests delivered by Deng Xiaoping at a meeting of senior officials two weeks ago. He is reported to have ordered: "When necessary, we must deal severely with those who defy orders. We can afford to shed some blood. Just try as much as possible not to kill anyone."

It is unclear why the Government has chosen to concentrate on the writer, Wang Ruowang, and journalist Lin Binyang, in its quest to sacrifice a few wrong-doers to the altar of ideology. Both have been regularly accused in the past of writing too much about the "dark side" of communist rule, but neither poses a threat to the party.

The present political lightning will certainly affect the jockeying in preparation for a crucial Communist Party conference in the autumn. It has long been thought that Deng would retire at the conference, and Hu Yaobang has been the favourite to take his place.

However, Deng yesterday told Mr Takeshita that "it seems I have to continue to work." He said he had wanted to retire several times, but his requests had been turned down.

## Iraqi troops fail to expel Iranians from bridgehead

BY OUR MIDDLE EAST STAFF

IRANIAN forces yesterday maintained their foothold near Shalameh, south east of the city of Basra, but showed little sign of being able to advance forward from their bridgehead on the west side of the Shatt al Arab which was established last Friday.

They still had not impinged upon Iraq's heavily fortified defensive positions, according to Western intelligence reports. The situation was described as one of stalemate on the ground.

At the same time it became clear that the Iraqis had made little or no progress in dislodging the invaders despite a claim by Lt-General Abdul Jabbar Muhain in Baghdad that most of the territory seized by the Iranians had been "purged."

He told a news conference in Baghdad that the Iranians were pinned down in a stretch of marsh land about three miles long and roughly half a mile wide.

That, as it happens, was roughly the same area which the Iraqis conceded as being occupied on Sunday.

Nevertheless, General Muhain claimed that "a decisive victory is imminent after which the Iranians will be rendered helpless." Iran, meanwhile, reported another night of heavy fighting.

Tehran Radio said the invading force was continuing its advance towards pre-determined targets.

General Abdul Wahid Mahmoud Towhqi was among the Iraqis killed, according to the

A French freelance journalist, Mr Roger Anquet, was seized yesterday outside his apartment in the Baouche district of West Beirut yesterday but his colleagues, a communist, Mr Paul Marchand, fought off the gunmen and escaped. Our Middle East Staff report.

There was no immediate claim of responsibility for the abduction which brings to six the number of French citizens held hostage in Lebanon.

The two journalists had earlier filmed the early morning activity of Mr Terry White, the Archbishop of Canterbury's personal emissary, who later expressed his regrets about the kidnapping.

It occurred as Mr White started another mission aimed at securing the release of Americans and other hostages held in Lebanon.

Islamic Republic News Agency (Irna).

Baghdad was struck by an Iranian missile, the second Soviet-manufactured Skud B to be launched against it since the latest offensive five days ago. Irna said it was fired at the city's trade centre.

Iraq struck back with another wave of air raids on Isfahan, Dezful and Qom, the religious centre.

Irna reported that one person was killed and nine were wounded in the attack on Isfahan.

## AT THREE-FOURTHS THE COST OF COMMERCIAL PAPER, MMP™ STOCK SPEAKS EVERYONE'S LANGUAGE.

Money Market Cumulative Preferred Stock, Series A

MMP™

(Liquidation Preference \$1,000,000 per Share)

The undersigned consents for the direct placement of the shares.

It's understandable now and non-companies around the world are choosing Money Market Preferred (MMP™) Stock through Shearson Lehman Brothers.

With MMP, they not only raise permanent equity through their U.S. subsidiaries. They raise it at about three-fourths the cost of commercial paper.

In fact, for most companies, MMP is the least expensive form of equity available today.

MMP is preferred stock, with a floating dividend rate set every 49 days through a Dutch Auction.

Interest issuers consistently low market value, dividend rates, flexible redemption and a new source of investors, without having to meet SEC registration requirements.

What's more, MMP allows companies with secured net operating loss carryforwards to finance losses on an after-tax basis.

If you'd like to know more, contact the number one lead manager in the world.

Call Warren H. Seagr in London at 020-2525, Joseph H. Lucas in New York at 020-8500 or Kenjiro Suzuki in Tokyo at 5-55-0000.

US-Japan summit urged in bid to cut deficit

BY NANCY DUNNE IN WASHINGTON

MR ROBERT STRAUSS, former US Trade Representative, yesterday advocated a major US-Japan economic summit within the next six months, as a start to reducing the US trade deficit.

Appearing as the first witness in four days of Senate Finance Committee hearings on American trade, Mr Strauss said the summit "should be more than a series of photo opportunities... a real negotiation where both parties attend fully prepared to put meaningful bargaining chips on the table."

The US, he said, had exercised world leadership by keeping its markets open, but now it must insist on reciprocity. "Those whose ships loaded with products enter our markets must make room for our ships in theirs," he said.

The hearing, called by Senator Lloyd Bentsen, the new committee chairman, showed little evidence that the committee is willing to turn to protectionist solutions, except in the interest of forcing other market openings.

One senator after another declared that the US budget deficit was a chief contributor to the more than \$170bn trade deficit for last year.

"We know it's not just the fault of other nations," Senator Bentsen said. "We're fortunate that the Japanese are coming in and buying our securities, but we also have to understand that it's no Marshall Plan they have in mind, and those securities have to be paid back."

Senator Jay Rockefeller, a West Virginian, talked bitterly about the detrimental effects of Reagan economic policies on various states. However, he said that Democrats stand ready to work with the Reagan Administration, "if they are ready to write a meaningful trade bill."

"The US is on the road to dangerous economic decline," he said, but others cannot be blamed. "It is not the fault of the Koreans that our kids watch Miami Vice instead of studying math."

"It is not the fault of Taiwan if we don't have a programme to retrain our workers, and it is not the fault of the Brazilians if we turn out investment bankers rather than teachers, scientists and engineers."

Other senators called for more attention to exchange rates and capital flows, tougher fair trade laws, easing of export controls, and anti-trust laws.

APND reports: President Ronald Reagan will soon ask Congress for changes in anti-trust laws, restraints on imports of counterfeit goods and a \$200m (£142m) "war chest" to help US companies sell goods abroad, according to Administration and Congressional officials quoted by the New York Times.

Semiconductor talks to resume

BY CARLA RAPOPORT IN TOKYO

TALKS ON the controversial US-Japan semiconductor trade pact are set to resume in Tokyo later this month, amid continuing complaints that the agreement is not being fully honoured by either Japan or the US.

Japanese industry leaders are still unhappy with many of the individual prices set for their US chip exports, the so-called fair market values (FMVs), which are set by the Department of Commerce.

Based on production costs supplied by the industry through the Ministry for International Trade and Industry (MITI), the FMVs are aimed at stopping any unfair dumping of Japanese chips in the US.

At the same time, US chip makers are claiming that the Japanese are circumventing the pricing pact by selling their products to South-East Asian countries for re-export to the US at prices lower than the FMVs.

Growth slows in export of Dutch plants

By Laura Ryan in Amsterdam

DUTCH EXPORTS of flowers and plants rose 6 per cent to £1.52bn (£1.6bn) in 1986, only half as fast as growth in the past couple of years due to falling prices.

Cut flower exports, in which the Netherlands ranks first in the world, edged up 3 per cent to £1.26bn last year as prices came under heavy competitive pressure.

The Netherlands' share of world exports of cut flowers fell to 63 per cent in 1985 from 65 per cent in 1984. It is not yet known whether the decline continued in 1986.

EEC to open full-time China office this year

BY QUENTIN FEE IN BRUSSELS

THE EUROPEAN Community is to open a full-time representative office in China this year, to back up the steady growth in trade in both directions, officials said yesterday.

The plan was confirmed following a joint meeting of Chinese government and European Commission officials in Brussels to discuss the whole range of relations, investment promotion, and co-operation in science, technology and training.

The EEC enjoys a substantial trade surplus with China, which reached more than Ecu 2.7bn (£2bn) in 1985, falling back slightly to Ecu 1.65bn in the first nine months of 1986, according to Commission figures.

Officials in Brussels maintain that China has enjoyed easier access for its exports to the Community—principally textiles, clothing, agricultural products, and chemicals.

European exports to China, which took third place in Chinese imports in 1985 behind Japan and Hong Kong, but ahead of the US, consist mainly of machinery, transport equipment, iron and steel, and chemical products.

Australia fails to make most of defence exports

BY CHRIS SHERWELL IN SYDNEY

Buried within a recent 569-page report on Australia's defence exports and defence industry is a sad chronology of requests from Thorn-EMI Electronics Australia to the federal government.

The requests seek clearance to promote the Australian-designed and developed Mulloka sonar system in South American markets. Despite dozens of letters, telexes and departmental memoranda written between February 1982 and June last year, the company's inquiries were simply buffeted around the bureaucracy.

Another part of the report tells the tangled tale of ATA Training Aids, a New South Wales company which manufactures unique and effective target practice systems.

Though the bulk of ATA's orders are from some 20 countries abroad, the company has had appalling problems of approval and export licensing and for South America failed to secure sufficient answers to develop a marketing strategy for its product.

Neither of these stories is untypical, at least to judge by the highly critical analysis by Mr Robert Cooksey published recently. The former academic's report clearly underlines how Australia has missed major trading opportunities for a key element in its manufacturing sector.

His review complements one published in the middle of last year on the country's overall defence strategy. It fully implemented, the two reports promise a departure in official thinking which will affect the armed forces, the defence industry and the economy.

On defence exports Mr Cooksey, like the Labor Government, has already accepted some of Mr Cooksey's recommendations. In October the Ministry of Defence announced a package of measures designed to help Australian industry bid for defence work and export military products.

That action should counter some of Mr Cooksey's tougher criticisms. He condemned the arrangements for export approvals as "difficult, complex, time-consuming and lacking both clarity and certainty," although he found some cause for optimism. First, he says, there is a more substantial and more efficient defence industry in Australia than had generally been realised.

Secondly, defence exports, at A\$250m (£12.4m) per year, are higher than expected and can, at a conservative estimate, be doubled in three to five years through modest changes in policy and administration.

Mr Cooksey adds that a qualitative change in the industry and its exports performance could be a vital part of the country's much-needed overall export recovery.

One of the biggest changes which must occur is also one of the most difficult. Australians... must overcome what has been called a "technological cringe" which leads to a distrust of local inventions.

One of the biggest changes which must occur, however, is also one of the most difficult. Australians... must overcome what has been called a "technological cringe" which leads to a distrust of local inventions.

The Sonobuoy is one of Australia's most successful defence export products, though it is now being manufactured in Britain, apparently after Australia needlessly allowed itself to lose some of the business.

Other successes include the Ikara anti-submarine missile, reckoned to be one of the major achievements of Australian research and development, and the Jindivik satellite drone. But, as Mr Cooksey laments of all three products, they "are not only the best but the only examples of exports of any value."

Looking ahead, he nevertheless sees several new opportunities. One lies in a A\$150m collaboration with the US called Project Nulka (from an aboriginal term meaning "be quick"), which will produce a new defensive system for the ships of the two countries' navies.

Another with exciting potential is Project Jindivik, an over-the-horizon radar system which is expected to allow the monitoring of activities in Australia's 200 km zone and especially its north-western waters.

According to Mr Cooksey, only the US and the Soviet Union have similar radar programmes on a comparable scale and the project offers a commercial opportunity which "could prove very rewarding."

He is decidedly uncomplicated, however, about the public sector defence industry in Australia. "Despite numerous reviews, recovery plans, cost awareness programmes, continual injection of public funds and some attempts at restructuring and re-organisation," he says, "the factories remain largely uncompetitive, continuing to do much the same sort of work they have been doing for the last 40 years."

Mr Cooksey's main recommendations call for a revision of the guidelines for approving defence exports and the establishment of an Australian Defence Exports Group.

Administration of the new export controls would be moved away from the Department of Defence and the equally criticised Department of Foreign Affairs and given to the Department of Trade—being the one functionally committed to defence exports, has no part in defence export approvals.

The new defence exports group would likewise be part of the Australian Trade Commission and would have a specific charter to facilitate and promote defence exports.

Some of these proposals are now under consideration within the Government. If they are not simply to wither on the vine, action will be needed soon.

The overwhelming conclusion of his work, he says, is that defence exports "are an area of economic activity that must be pursued now, without further delay."

Solicitors favour mergers

By Raymond Hughes, Law Courts Correspondent

SOLICITORS appear to favour mergers with other professionals in order to counter the threat to their livelihoods posed by banks and building societies under the new conveyancing laws.

A survey for the Law Society shows that 26 out of 30 solicitors' firms interviewed would consider merging with other professionals if the Law Society were to relax its rule against this.

Small firms would prefer mergers with estate agents, as offering a source of conveyancing work, while larger ones favour accountants, because of their type of client and the opportunities for commercial work.

It is the smaller firms, depending more heavily on conveyancing, that will be most at risk if banks and building societies undertake conveyancing, as they can do now the Building Societies Act is in force.

The survey, by Peat, Marwick, Mitchell & Co, found that, as a percentage of the average house price, solicitors' conveyancing charges have fallen by 26 per cent since 1983, while the conveyancing income of some firms has fallen by as much as 30 per cent over the past four years.

For some larger firms, that resulted from a conscious effort to move from conveyancing into other areas, such as criminal, litigation, matrimonial and commercial work.

The competition resulting in lower conveyancing charges was seen to come mainly from single partner firms quoting extremely low fees and undercutting firms with higher overheads.

Another factor was a comparatively recent trend for people to seek competitive quotes from a number of firms.

Winglaw to build £50m office block

By Our Property Correspondent

WINGLAW, the privately owned property development and investment group, will shortly begin building a 106,000 sq ft office block worth £50m on the City of London's eastern border.

The development emphasises the growing popularity of this part of the City for the expansion of the financial services industry. Pressure on space has forced the industry to look for accommodation outside the core of the City, around the Bank of England.

The building, at 1 Alie Street, will have seven storeys and provide the wide open spaces of up to 20,000 sq ft—now favoured by financial institutions. By using speedy, modern construction techniques, Winglaw intends to have the development ready by May next year.

The block is being built on a speculative basis. Rights in this area have been climbing to about £30 a sq ft, against up to £50 in the centre of the City, and Winglaw is planning to charge between £30 and £35.

Mr Joey Esfandi, Winglaw chairman, said Bankers Trust was providing £27.5m for the development, and Winglaw's own resources would be used only to pay for cost overruns. The finance is available for three years with an option to extend it for a further five. Mr Esfandi refused to disclose the interest rate.

Winglaw's development is the sixth significant office building scheduled for completion on the eastern rim of the City, north of the Tower of London, between now and mid-1988.

The other five buildings will provide about 750,000 sq ft of office space.

Mutual fund for legal costs proposed

By Hazel Duffy

SOLICITORS are considering proposals from a working party of the Law Society which could lead to a mutual fund being set up to pay for some court cases.

The results of an investigation by the Funding of Litigation working party will be submitted to the Council of the Law Society probably within the next two months.

Lawyers on the party have also been looking at the possible introduction of a contingency fee scheme—payment by results—for tribunal work. Clients cannot claim legal aid for cases which go to tribunal.

Concern has been expressed by solicitors that the Government intends to restrict legal aid.

The Lord Chancellor's department will be publishing a white paper on legal aid in a few weeks' time, which follows a report published last summer proposing restructuring of the scheme by a team of civil servants.

The cost of legal aid, forecast at about £400m this financial year, has been rising steeply.

Industry power is cut to maintain domestic supply

BY MAURICE SAMUELSON

THE CENTRAL Electricity Generating Board (CEGB) last night cut supplies to some of its biggest industrial consumers in order to avoid the risk of electricity blackouts in England and Wales.

Similar steps were taken by British Gas which like the CEGB, had to cope with the highest ever demand for home heating.

The CEGB disconnected some 2,000 MW from industrial customers under its emergency load management arrangements. The companies affected, like those which had their gas cut off, buy their energy on special terms allowing for interruption in very cold weather.

By doing so, and with the help of more available capacity, the CEGB avoided a repetition of Monday night's 3 per cent voltage reduction which caused a slight dimming in lighting levels.

At the time, it was facing an all time record demand for 48,900 MW, nearly 2,000 MW more than was available. Last night's peak demand was expected to rise by a further 1,000 MW.

It hoped to meet it by maximising its use of nuclear and fossil-fuel power stations, including the expensive gas turbine plant, and by importing 200 MW from the South of Scotland Electricity Board.

The CEGB was also receiving some 500 MW from France through the 2,000 MW capacity cross-Channel cable link. Last week, use of this link was interrupted by the strike in the French power industry. In the last few days, it has also been used to send UK electricity to France.

British Gas said yesterday that on Monday it had sent out a record 11,027m cubic feet of gas, more than 11m cubic feet more than in last February's previous record.

In addition to the gas flowing in from North Sea fields, the corporation also had to draw on its emergency winter stocks. It also drew on its supplies of liquefied natural gas.

Meanwhile, the Electricity Council has urged elderly and infirm people not to turn off electric heating because of anxiety about meeting the eventual bill. It said all area boards would give hardship cases a sympathetic hearing.

Mr George Foulkes, a Labour MP, said yesterday that the prime ministers should be charged with manslaughter for the deaths of old people because of the cold. Many hundreds of old people were going to freeze to death, because of inadequate help with their heating bills, he claimed.

Debate warms up, Page 8

Ulster MP accused of mob terror

By Hugh Carnegie in Dublin

MR PETER ROBINSON, the Democratic Unionist MP for East Belfast, was accused yesterday of being an active participant in mob terror when a large group of loyalists from Northern Ireland took over a village in the Irish republic.

He was appearing in Dublin's special criminal court at the start of his trial on 11 charges of unlawful assembly, assaulting and causing actual bodily harm to two Irish policemen and causing malicious damage to cars and property in the border village of Clontarf, County Monaghan, in the early hours of August 7 last year.

Mr Kevin Haugh, prosecuting counsel, said he was not seeking to prove that Mr Robinson himself actually perpetrated the incidents of assault and malicious damage, but that the MP was part of "a cohesive planned operation" designed to cause the type of offences which took place.

Mr Robinson, flanked by two policemen as he sat in the dock, denied all the charges. Detective Sergeant Peter Hunt told the court that he arrested Mr Robinson, the only person detained during the incident, after he and two other detectives called to the scene fired a volley of revolver and automatic shots over the heads of a crowd beating two uniformed policemen.

Sergeant Hunt said he did not know Mr Robinson's identity until after he arrested him. The MP was wearing a dark rubber rain suit with a hood covering the back of his head and was running away with the crowd when he was grabbed, the detective said.

The prosecution said the crowd, many of its number masked and carrying cudgels, and possibly firearms, intended to provoke confrontation. It defied in military style, painted slogans on walls and damaged property including a police station. It set up a roadblock and terrified local residents.

Mr Haugh rejected Mr Robinson's contention that he was in Clontarf to assess border security in the republic.

The hearing continues.

Savings shortfall for building societies

BY HUGO DIXON

THE increasing difficulty building societies are having in attracting retail savings was underlined when the Nationwide Building Society, Britain's third largest, published its annual results yesterday.

It raised more money on the wholesale financial markets in 1986 than it did from retail investors—the first time a building society has done this.

The results, which forewarn of financial difficulties for the society in the coming year, showed net profits up 27m at £33m in 1986. This was not enough to raise the society's reserve asset ratio, which stayed at 4.2 per cent.

Other societies have been trying to increase their reserve asset ratios in response to pressure from the Building Societies Commission, the industry's new regulatory body.

Net retail receipts fell from £1.1bn in 1985 to £906m last year, not nearly enough to fund the society's mortgage lending, which experienced record growth. The total mortgage book was £10.2bn at the end of the year, as against £12.1bn last year.

As a result, reliance on wholesale markets increased sharply with net funding going up from £342m to £990m. Even this was not enough, and the society's liquidity ratio took the rest of the strain, falling from 20.4 per cent to 15.3 per cent.

Mr Tim Melville-Ross, chief general manager of the Nationwide, admitted that the society would have to do better in the retail market this year. Last year's remedies could not be repeated.

Wholesale deposits are now 15 per cent of total deposits, fast approaching the limit of 20 per cent set by the 1986 Building Societies Act which came into force at the beginning of the year. Moreover, the Building Societies Commission is unlikely to want to see the society's liquidity ratio fall much further.

Mr Melville-Ross predicted that interest rates would have to go up to attract retail savings and said he hoped there would not be as much competition from the equity market, particularly the Government's privatisation issues, this year. However, if retail saving did not increase by much, mortgage lending would have to be restrained.

The Nationwide's purchases of a network of 360 estate agency offices has not been reflected in the year's results. The £33m this is costing will be paid over the next six weeks, taking the society's reserve asset ratio down to 3.5 per cent.

This is by far the lowest of any major society and could lead to problems with the Building Societies Commission.

BBC fee to be indexed

BY RAYMOND SNOODY

THE GOVERNMENT has decided to end the present method of setting the BBC licence fee and instead index it to the retail price index (RPI).

Mr Douglas Hurd, the Home Secretary, is expected to make the announcement in the House of Commons today. Indexation of the licence fee will begin from April 1988 and run for an initial period of three years—the present colour licence fee is £58.

The base figure on which the new licence fee will be calculated will be £60. In November last, the RPI was running at an annual rate of 3.5 per cent—a figure that would give the BBC an annual increase of a little over £2.

The Pensions Committee into the future of British broadcasting which reported last summer rejected advertising on BBC television and instead advocated a period of indexation as an interim measure on the way to subscription television.

Seeking political capital in City

Peter Riddell reports on Labour plans to use recent financial scandals against the Conservatives

THE CITY of London has been identified as an electoral liability for the Conservative Party by Mr Robin Cook, Labour's spokesman on the City.

Mr Cook says of recent events in the City: "Things are being done which ordinary people find difficult to understand." Labour is determined to make it a major political issue, tarnishing the Conservatives' image.

Mr Cook is already clearly on top of his brief although he only took over two months ago as Labour's trade spokesman in what amounted to a job switch with Mr Bryan Gould, who took his place as Labour's campaign co-ordinator.

In recent days he has pressed the Government to issue an interim report on Guinness as well as challenging the system of statutory backed self-regulation established in last year's Financial Services Act.

On Guinness, Mr Cook points to an average length of inquiry of two years and argues that this would leave everyone involved in uncertainty.

He rejects the view of Mr Michael Howard, the Under-Secretary for Corporate and Consumer Affairs, that any interim report which stated what matters were being pursued would necessarily compromise any subsequent legal action.

Furthermore, Mr Cook says that the major questions of public policy relating to the operations of the Companies Act and the Takeover Panel are more important and urgent than any particular charges.

The main thrust of the Government's counter attack, as expressed by Mr Howard, is that Labour has not suggested any specific new powers to deal with recent cases. Mr Cook argues that it is not a question of new powers but more one of structure, resources and culture.

Rejecting self-regulation, he maintains that the Government itself was only willing to give limited powers to the Securities and Investments Board as a private company limited by guarantee. The Government, he claims, has already shifted its ground from proclaiming the virtues of self-regulation to stressing the strength of the SIB.

Labour proposes a body similar to, but not identical to, the US Securities and Exchange Commission (SEC). It would be publicly funded and a statutory agency appointed by, although independent of, government with investigatory and prosecuting powers. But Mr Cook says that such an agency would make the SEC, not would it become involved in plea bargaining.

Mr Cook argues that its funding would be on a more generous basis than under the present private arrangement. He is critical of the Government for showing a lack of commitment and vigour in providing staff, particularly lawyers, to pursue cases.

He also sees a cultural problem. He argues that the Department of Trade and Industry is not terribly impressive at the job of investigating finance dealers. The civil servant's natural instinct is to smooth the way and not to risk headlines, and the qualities required by a successful investigator. These powers might be better performed by an SEC-type body.

Overall, Mr Cook argues that the Government has created a climate in which City scandal has flourished, the City and the Conservative Party are part of the same family. City organisations are flourishing—with an explosion of salaries and other payments as a result of the fees for privatisation and a relaxed policy on monopolies and mergers.

"In a very real sense Ernest Saunders as Man of the Moment was a product of the current City culture. The Government has to take its share of the responsibility for creating that culture."

Multiple share suspects identified

TOUCHE ROSS, the accountancy firm which acted as watchdog over the £3.6bn offer for sale of shares in British Gas last month, has identified nearly 4,000 suspected multiple applications, Richard Tomkins writes.

The Department of Energy would not say yesterday how many individuals appeared to be involved, but confirmed that there were a number of apparently serious cases.

Touche Ross and N. M. Rothschild, the merchant bank which sponsored the flotation, have written to suspect applicants asking them to explain their apparent multiple applications. Those who provide satisfactory explanations will get their shares.

Those who cannot provide adequate explanations will get their money back without interest. The most serious cases will then be passed to the Director of Public Prosecutions, who will decide whether to bring proceedings.

Mr Nigel Lawson, the Chancellor of the Exchequer, signalled that he hopes to cut income taxes in his March budget, but insisted that he would only announce reductions if it was "prudent and safe" to do so. Speaking on BBC radio, the Chancellor appeared more optimistic than in recent months about the prospects for a reduction in the basic rate of tax from the present 29p in the pound. In the immediate aftermath of November's Autumn Statement he suggested that planned increases in public spending had dimmed hopes of a lower rate.

# Kinnock sacks arts spokesman over BBC clash

BY JOHN HUNT

MR NEIL KINNOCK, the Labour leader, has dismissed Mr Norman Buchan, as the party's spokesman on the arts, after a dispute over the control of the BBC and the other broadcasting organisations.

Mr Buchan, a left-wing MP was sacked at a four-minute meeting with Mr Kinnock yesterday, at which a sharp exchange of views occurred. In his place, Mr Kinnock has appointed Mr Mark Fisher, aged 42, also a left-wing MP who is being given the title of Spokesman on the Arts and Media.

Mr Fisher, a former documentary film producer and script writer, is an old Etonian and the son of former Conservative MP, Sir Nigel Fisher. Mr Buchan wanted regulatory powers over the BBC and the Independent Broadcasting Authority taken away from the Home Office and the Department of Trade and Industry and vested in Labour's proposed new Ministry of the Arts and Media.

Mr Kinnock apparently feared that this would lead to accusations that Labour was setting up a ministry of culture to dictate to the media. He insisted that the powers re-

main with the two Whitehall departments.

At the party's home policy committee meeting on Monday night, he pressed amendments removing Mr Buchan's proposal from the policy document which commits a Labour government to set up the new ministry. The committee approved Mr Kinnock's amendments by a vote of 10 to 6.

But at yesterday's confrontation, Mr Buchan made it clear to Mr Kinnock that he still intended to campaign for the policy of the regulatory powers being vested in the ministry.

Mr Buchan emphasised that he did not wish to interfere with the artistic freedom of the BBC. But he argued that his scheme was essential to ensure fair access to new technical developments, particularly satellite TV. He did not want them dominated by "the Murdoch and the Maxwells."

According to Mr Buchan, he reminded the Labour leader that this policy was endorsed by the party's annual conference and therefore he would continue to reiterate it. Mr Kinnock told him he could not do so from Labour's front bench.

# Unions prepare IBM target

BY PHILIP BASSETT, LABOUR EDITOR

THE TRADES union congress (TUC) should co-ordinate attempts in the UK to unionise IBM, the world's largest computer company, to prevent damaging inter-union competition for members, a leading electronics union official said yesterday.

The suggestion came at a specially-convened two-day international trade union conference which agreed a series of aims and actions to try to establish or increase unionisation in the mainly non-union company.

Mr Tim Webb, national electronics officer of the white collar union

ASTMS, acknowledged that there was now fierce competition for members, especially in the high technology sector, among British trade unions. But that policy would not do for IBM. Such fragmented efforts would be played off against each other by the company.

He said: "At some stage we have to sit down and form an IBM organising committee within the TUC." He was supported by Mr Larry Cohen, organising secretary of the Communication Workers of America, who said unions needed to avoid competition between themselves, and suggested instead that individ-

ual unions "adopt" an IBM plant.

The conference, organised by three international union federations - the IMF metalworkers, the PITI communication workers and FICT, representing white-collar workers - adopted a broad statement of aims maintaining that the organisation of IBM employees was of vital importance for the future of all unions.

The conference required the three union federations to: ● Act as a clearing house for information on IBM; ● Publish a twice-yearly newspaper on the company, to be distrib-

uted to IBM employees;

● Identify key target groups in IBM for organisation; ● Provide IBM employees with a wider picture of the company's operations; ● Collect where possible details of IBM's pay and conditions; ● Publicise what the unions see as the company's continuing involvement in South Africa.

The unions will also examine the company's performance in complying with OECD guidelines on multinational enterprises, and the ILO's declaration on multinationals and social policy.

# Industrialists urge more international view of mergers

BY DAVID CHURCHILL

THE Confederation of British Industry (CBI) yesterday urged the Government to take a broader, more international view of business competition when deciding which mergers should face official scrutiny by the Monopolies and Mergers Commission.

The suggestion came during a meeting between Mr David Nickson, president of the CBI, and Mr Paul Channon, the Trade and Industry Secretary.

The meeting formed part of the Government's current review of merger and competition policy, due to be completed later this year.

Mr Nickson argued that the existing merger guidelines, formulated by Mr Norman Tebbit when Trade Secretary, should be "re-interpreted to place much greater emphasis on the present international scale of markets."

CBI members, he added, believed that the Government's decisions on merger referrals were still being taken with too much emphasis on the competitive position in the UK market of the companies involved.

The meeting with the Trade Secretary was also used by the CBI to press again for more detailed explanations to be given by the Government over why certain mergers were referred while others were not.

Mr Nickson argued that detailed reasons outlining the relative importance attached to the different factors involved would create the foundations for a set of general principles for merger referrals. "Flexibility would be safeguarded because the Secretary of State

Mr Paul Channon asked to explain referrals

would retain his discretionary powers," he explained. "In breaking any precedent, however, the Trade Secretary would be obliged to explain why it was necessary."

The CBI is also keen to see merger investigations carried out by the Monopolies Commission speeded up. Mr Nickson and other CBI officials told Mr Channon that their members could not understand why UK investigations took longer than in other countries.

To help to speed up investigations the CBI suggested the appointment of more full-time commissioners and longer secondments to the commission's staff from the private sector.

# Labour warms up cold weather attack

BY TOM LYNCH

THE FLIGHT of those who cannot afford heating is to be debated today in the House of Commons after a Government announcement yesterday that a £5-a-week payment is to be paid this week to all eligible supplementary benefit claimants, as a result of the severe weather.

Mr Neil Kinnock, the leader of the opposition, announced on a point of order in the Commons that today's debate, which had earlier been allocated to the opposition, would be devoted entirely to "the condition of the old and the cold and the problem of fuel poverty." It had previously

been expected that half of the time would be taken up with a debate on the economy.

Mr Kinnock's decision followed the announcement of the payment and a fierce exchange at Question Time between himself and Mrs Margaret Thatcher, the Prime Minister.

Mr John Major, a junior social security minister, told MPs that it was his "firm expectation that the trigger point for severe weather payments will be reached throughout the country this week. In view of this and the unprecedentedly cold weather, I wish to make it clear now that

the extra payment of £5 will be made to everyone in the qualified groups this week."

The payment is made to householders on supplementary benefit who have less than £300 in savings where a resident of the house is chronically sick or disabled, a pensioner or a child under two. It is triggered when the average temperature in any Monday to Sunday week is less than minus 1.5 deg C.

The initiative on this week's payment is thought to have come from the Prime Minister, who called Mr Major, Mr Norman

Fowler, the Social Services Secretary, and Mr John MacGregor, the Chief Secretary to the Treasury, to Downing Street yesterday morning to discuss the proposal.

Mr Major told MPs: "The Government is determined that vulnerable groups should know where they stand without delay so that they will not be discouraged from heating their homes during this very cold spell. In the unlikely event that not all the areas reach the trigger point, action will be taken to validate the payments made."

# GULF

Gulf Investment Corporation, the first financial institution set up under the auspices of the Gulf Co-operation Council, and now in its third year of operation, has grown into a major financial force.

# INVESTMENT

Gulf Investment Corporation is much more than an investment company. It is unique in that it not only backs projects originating from the Gulf and international business communities but also, through a dedicated projects group, is actively generating commercially viable enterprises within the Gulf Co-operation Council countries.

# CORPORATION

Projects Group, Treasury, Corporate Finance, Portfolio Management. The sum of all Gulf Investment Corporation's trading activities to year end 1985 saw balance sheet totals rise from a 1984 level of US\$475 million to US\$1,048 million, with a net profit of US\$57.2 million. The figures for 1986, with the build up phase virtually complete and all systems up and running, project further substantial improvement. 1987 will be a year of significant achievement, confirming that Gulf Investment Corporation is the major financial force leading the development of economic integration in the Gulf.

# Truck production slips back to 1984 level

BY KENNETH GOODING, MOTOR INDUSTRY CORRESPONDENT

UK COMMERCIAL vehicle production last year fell back to the 1984 level - which was the lowest for 35 years - but car output remained just above 1m, thus confounding many forecasters who expected it to go below that important mark.

According to provisional estimates from the Department of Trade and Industry, only 238,800 commercial vehicles were produced in the UK last year, 14 per cent below the 1985 total and only marginally ahead of the 224,800 for 1984. Car production fell by 3 per cent compared with 1985 to 1,018m.

Commercial vehicle output last year was held back by changes within Ford, the UK's leading producer. In the early part of 1986 the company only gradually built up production of the new Transit, which replaced Britain's best-selling commercial vehicle.

At the same time, output of its Cargo truck range was hit by uncertainties generated by the merger of Ford's medium and heavy truck operations with those of Iveco, the Fi-

at-owned group, which took place in July.

The UK truck industry as a whole also suffered from an almost complete absence of export orders from the developing countries and from the steep drop in bus demand, created by deregulation, which continued in 1986.

The fall in UK car production was in sharp contrast to new car sales which last year increased by 2.75 per cent from the 1985 peak to a record 1.56m.

Output reflected the difficulties of Austin Rover, the state-owned Rover Group's subsidiary and the major car producer in the UK, which suffered a substantial fall in both sales volume (down by 31,000 to 293,000) and market share (down from 17.7 per cent to 15.5 per cent) in 1986.

However, Austin Rover did much better in export markets last year and its two large rivals, the US-owned Ford and General Motors, both increased UK car output.

# Hanson offshoot plans town for 15,000

BY PAUL CHEESBRIGHT

LONDON BRICK, part of Hanson Trust, has drawn up plans for a new town to accommodate 15,000 people near Peterborough, about 45 miles north of London. The local district council is expected to take a planning decision on the scheme next month.

The township would be on a 800-acre site of reclaimed clay pits once used by the company to provide the raw materials for brick-making.

The project would be spread over 15 years, and the cost of preparing the site with the provision of roads, drainage, transport links and landscaping would be about £313m. The first phase would cost nearly £44m,

but housebuilding costs would be in addition to that.

The proposal is the latest in a line from private developers wanting to undertake major residential projects. In recent months, similar proposals have emerged for sites near Swindon and Bristol, in the west of England.

London Brick is holding talks with a major but unspecified property development company on bringing the scheme to fruition.

Only when London Brick has decided whether to go forward in a joint venture or to proceed with the development on its own will the question of funding the venture be addressed.

# Virgin chief rises to balloon race challenge

BY LYNTON McLAIR

MR RICHARD BRANSON, the 36-year-old chairman of the £250m turnover Virgin group, launched a plan yesterday to make the first crossing of the Atlantic by a hot air balloon, this summer. The balloon is to be made by Thunder and Colt, using fabric from ICI designed to absorb heat from the sun and help lift the balloon.

The launch at the Royal Aeronautical Society, London, was slick, precise and convincing until Mr Don Cameron, chairman of the rival Cameron Balloons company got to his feet and challenged a stunned Mr Branson to a race across the Atlantic using a rival hot air balloon.

The Virgin chairman was caught off his guard, upstaged at his own press conference.

The Virgin plan was for the balloon to fly from New York, along the heavily populated Atlantic seaboard, skirting Newfoundland and out over the Atlantic, borne by the wind. Mr Cameron was unhappy

about the dangers of balloons laden with propane gas flying over populated areas. He preferred to start from Newfoundland, where previous Atlantic crossings have started.

"I offer you the challenge, if we can agree on a starting place," Mr Cameron said as he marched to the podium where sat Mr Branson and his co-pilot, Mr Per Lindstrand, the head of Thunder and Colt.

Mr Branson accepted the challenge, but said he had not given as much thought to the dangers of the overland crossing. "It is too early to say if we accept the suggested change of start," he said. "But a race would be exciting."

Virgin Atlantic Airways is funding the £750,000 needed to get its sunlight absorbing balloon designed, built and flying. Mr Branson expects the project to end up costing his airline nothing, after taking account of the sponsorship from ICI, Esso, Land Rover, Thunder and Colt and other companies.

THE MERCEDES-BENZ 190 SERIES: 190, 190D, 190D 2.5, 190E, 190E 2.3/16.

# The Mercedes-Benz 190. The reason you buy it may not be the reason you enjoy driving it.

The 190 series may be the most compact of the range, but it is nevertheless every inch a Mercedes-Benz. It evolved through a meticulous 10-year development process of the type required for every new Mercedes-Benz model.

It inherited the family traits of strength, safety, durability, comfort and much-envied build-quality, at the same time setting new standards in the field of aerodynamics.

It has packed into its deceptively compact profile every attribute that has made Mercedes-Benz owners the most loyal in the world. And that's why most people are buying it.

But the 190 broke new ground. It introduced a remarkable new multi-link rear suspension system. A patented system that lets a driver take the ample power generated by the 190's engine range and use it to move people and things extremely quickly and comfortably.

It was also the first recipient of an ingenious new single-blade wiper system that reaches out to clean a panoramic 86% of the windscreen.

The 190 is not a sports car, but it can be driven like one. It will satisfy even the most enthusiastic driver, being engineered to the point where it will do practically anything you ask of it.

You'll buy the 190 because of its traditional Mercedes-Benz values. You'll enjoy driving it for rather less pragmatic reasons.

**Mercedes-Benz**

Engineered like no other car in the world.

## Residential Property

## Invest in a 5-bedroom Wates house in Purley.

15 prestigious houses in a secluded setting on the edge of the North Downs. Most have up to 5 bedrooms, and offer space and comfort in very generous proportions.

With a choice of 4 basic styles and several different interior layouts, they offer the opportunity to invest in a house that

will suit any requirement. You'll find there are many attractive options for kitchens, bathrooms and gardens, too. And lots of extras including alarm systems.

These homes are in the best part of Purley, close to shops and other amenities, near the M25 and M23, and within easy reach of London by road or rail.

Visit our Sales Office at Russell Court, telephone 01-660 6474 open from Thursday through to Mondays 10am to 5pm. (Or telephone 01-764 5000 for details on Tuesdays or Wednesdays).

**Russell Court,  
Russell Hill Road,  
Purley, Surrey.**

4 bed houses from £173,000.  
5 bed houses from £205,000.

Mortgages available.  
Prices and availability correct at  
time of going to press.

**Show home  
now open**

## Live by the river. Walk to the City.

Wates' elegant riverside apartments at Townside offer you a unique opportunity to enjoy the best of both worlds. Here you can live in luxury in one of the most historic parts of London. Now also one of the most exciting, with the lovely St. Katherine's Dock close by, as well as the Tobacco Dock shopping centre now being built.

Here, you'll be right beside Wapping Tube, and less than a mile from the City. If you're energetic you could even walk to work there. Hop on the tube and go West for twenty minutes and, not surprisingly you'll find yourself in the West End. Going the opposite way, the new Docklands Railway will take you to the Enterprise Zone in less than half the time.

If you hurry, you still have a choice to live in these fabulous one and two bedroomed apartments. Each has a river view and a balcony. Each is designed and built to Wates high standards of quality and comfort, backed by the NERC 10 year guarantee. Prices start from £85,500. But don't wait till they're all gone. Phone (01) 481 3576 now for full details, including how to see the showflat.

**Wates build with care.**

## NOTICE OF MEETING

Notice is hereby given that the second annual general meeting of the Yamaichi Advanced Technology Fund will be held at the registered office in Luxembourg, 10a, Boulevard Royal, on:

THURSDAY 22nd JANUARY 1987

AT 11 NOON

for the purpose of considering the following agenda:

1. To receive and adopt the annual report and the report of the statutory auditor for the year to 31st October, 1986.
2. To receive and adopt the balance sheet and statement of operations as at 31st October, 1986.
3. To grant discharge to the directors and the statutory auditor in respect of the accounts and the balance sheet for the year to 31st October, 1986.
4. To receive and adopt the annual report and the report of the statutory auditor for the year to 31st October, 1986.
5. To transact any other business.

The resolution will be carried by a majority of three present or represented.

The shareholders on record at the date of the meeting should vote or give proxies. Proxies should be deposited at the registered office of the company not later than 48 hours before the meeting.

By order of the Board of Directors

## UK NEWS

## Sun presses \$25m claim over aborted oil deal

BY MAURICE SAMUELSON

THE ISRAELI Government is being sued in Israel for trying to buy North Sea oil from Britain in defiance of British regulations on exports of oil.

It is the latest bizarre twist in a marathon battle between Sun Oil, the 10th biggest US oil company, and Bulk Oil, a small Swiss-registered trading company with offices in London. The case has already lasted five years and is set to last for many more. One of the protagonists has told his lawyers: "You have a job for life."

Sun is seeking \$25m, in damages and lost interest over a sale to one of Bulk's affiliate companies which fell through when Bulk confirmed that the oil was bound for Israel.

By suing the Israeli Government, as well as the Israeli oil company Delek, Sun is displaying considerable faith in the Israeli judiciary on an issue of keen local interest.

Israel has long felt that the UK's refusal to supply oil is influenced by fear of angering the Arabs. Whitehall officials indignantly deny this, claiming that the prohibition is merely a fortuitous part of the much wider policy on disposal of oil.

The dispute originated in May 1981 when British Petroleum, which operates the Sullom Voe terminal in Shetland, refused to load a cargo of oil on to a Greek tanker which was waiting to sail for the Mediterranean.

It was the first of 13 cargoes, totalling 860,000 tonnes and worth about \$200m, which Sun had contracted to supply to Bulk Oil (Zug), a Swiss affiliate of the Bulk Group. Instead, Sun had to sell the cargoes more cheaply at Rotterdam.

Sun has since been seeking compensation from Bulk, claiming that it knew Israel was a prohibited customer. But since Bulk Oil (Zug), has gone out of business, Sun has started proceedings in Tel Aviv against the people for whom the oil was ordered.

Sun has already established its case in the British courts and last year the European Court of Justice rejected a plea by Bulk that Britain's Israeli oil ban illegally breached an earlier EEC-Israeli trade agreement.

The two companies are also locked in a string of related cases in the US and Italy, and Sun plans further litigation in Switzerland. The UK's oil export guidelines were introduced in January 1979 in conditions of worldwide oil scarcity by Mr Tony Benn, the former Labour Party Energy Secretary.

In a ruling which has been upheld by all subsequent energy secretaries, Mr Benn authorised deliveries of North Sea oil only to fellow members of the EEC and IEA and other countries with which there was a "existing pattern of supply."

This included Finland, but automatically excluded Israel.

Mr Benn said that before announcing the ruling he first established that it would cause Israel no serious difficulty. These rules remain in force even though the oil scarcity in which they were formulated has long since given way to a worldwide glut.

Israeli sympathisers claim that this proves that they really were an anti-Israeli measure, and were framed to protect BP and other major UK oil companies from complications in the Gulf.

Meanwhile, Israel has no difficulty in obtaining all its oil requirements, and Israeli ministers have, for some time, ceased raising the matter in high level contacts with Britain.

## NEC to build Midlands factory

BY NEIL BENNETT

NEC, the Japanese electronics group, yesterday confirmed that it will build a \$30m multi-purpose factory in Telford, Shropshire, in the Midlands. It is hoped to start production by the summer and will employ 900 people by the 1990s.

The 48-acre lake-side factory will be the European headquarters for the manufacture of NEC's four main product groups: communications equipment, computers, electronic devices and home electronics. It will be owned by a new company, NEC Technologies UK.

NEC plan to start making video cassette recorders in a temporary plant by July. These will be followed by colour televisions, mobile telephones, facsimile machines and radio pagers.

The company, which already has a semi-conductor factory in Livingston, central Scotland, will receive a Department of Trade and Industry grant for the factory, believed to be almost £7m. Mr Paul Channon, the Industry Secretary, said: "I'm delighted that NEC chose Britain for such a major investment."

## BUSINESS LAW

## Companies can refuse capital allowances

ELLIS v BP NORTHERN IRELAND REFINERY LTD  
ELLIS v BP TYNE  
TANKER CO LTD  
Court of Appeal (Sir Nicolas Browne-Wilkinson, Vice-Chancellor, Lord Justice Bingham, Lord Justice Bingham): December 12 1986

A COMPANY may waive its right to claim capital allowances against corporation tax and if it chooses to do so the allowances are not automatically deductible by the Revenue.

The Court of Appeal so held when dismissing appeals by Richard Malcolm Ellis, inspector of taxes, from Mr Justice Walton's decision (F/T August 5 1985) that BP Northern Ireland Refinery Ltd and BP Tyne Tanker Co Ltd were entitled to renounce their claim to capital allowances for corporation tax purposes.

Section 56 of the Finance Act 1965 provides: "(1) In computing for purposes of corporation tax a company's profits for any accounting period there shall be deducted... (2) Allowances... shall be given effect by treating the amount of any allowances as a trading expense of the trade..."

LORD JUSTICE BALCOMBE said that the companies were assessed to corporation tax in nil amounts. They appealed to the Special Commissioners who allowed the appeals. The inspector of taxes appealed. Mr Justice Walton dismissed both appeals and the inspector appealed from his decision.

The point was whether, for corporation tax purposes, the capital allowances to which a company was entitled were to be credited automatically whether it wanted them or not, or whether only those allowances which had been specifically claimed by the company were to be taken into account.

The inspector argued for the former result. The companies argued for the latter, with the deliberate intent of claiming less than the full amounts to which, by statute, they were entitled. They calculated that, by not claiming capital allowances in less profitable years, they could claim annual allowances in later, more profitable years.

The modern system of capital allowances was introduced by the Income Tax Act 1945 as a relief from income tax. It was common ground between the parties that from 1945 to 1965 a taxpayer had the right to choose whether or not to take the capital allowances to which he was entitled.

The Finance Act 1965 introduced a new tax, known as corporation tax, which was a tax on the profits of all companies resident in the UK, and on certain profits of non-resident companies trading in the UK.

through a branch or agency. Those companies were removed entirely from the charge to income tax.

Corporation tax was charged on the profits of a company, being the sum of its income and its chargeable gains. The general structure of the new tax was that, subject only to specific exceptions, the income element of a company's profits was to be computed in accordance with income tax principles, while the capital gains element was to be computed in accordance with capital gains principles.

In relation to corporation tax, capital allowances were relevant only to the income element of a company's profits; any relief to which the company might be entitled as a result of capital allowances had to be taken into account before that was aggregated with any capital gain for the purpose of determining taxable profits.

The Revenue contended that the effect of section 56 (2) of the Finance Act 1965 was to make a capital allowance a "trading expense of the trade" for the accounting period in question. Trading expenses were automatically deductible in computing trading profits. Accordingly, it was argued, the effect of making a capital allowance a trading expense was to obviate the necessity for a claim to the allowance and to make it automatically (i.e. compulsorily) deductible.

The submission was wrong. Capital allowances were not compulsorily deductible against profits for corporation tax purposes.

First, they continued to be referred to as "allowances." An allowance, being a thing allowed, carried the connotation that what was allowed should first be claimed. Secondly, neither section 56 (2) of the 1965 Act, nor section 73 (2) of the Capital Allowances Act 1968 Act, said that capital allowances should be deducted as trading expenses. All those sections did was to provide that capital allowances "shall be given effect by treating the amount of any allowance as a trading expense."

That language seemed entirely consistent with the companies' contention that capital allowances still had to be posed but that, when claimed, they should be given effect by treating them in a particular manner.

The procedural changes introduced by the Finance Act 1965 and the subsequent consolidating legislation were consistent with that construction. In particular, provisions of earlier income tax legislation, which referred specifically to "claims" for allowances, were retained in relation to corporation tax.

Mr Potter, for the Revenue, sought to explain away those many references as being "slips" by the draftsman. But the submission required the assumption of a degree of aberration on the draftsman's part which was almost beyond belief. The more likely explanation was that the draftsman retained the references to claims for capital allowances as provisions which had been introduced in the Finance Act 1965, which contained provisions for the administration of corporation tax, was inconsistent with that view.

Nothing in schedule 6 of the Finance Act 1966, which contained provisions for the administration of corporation tax, was inconsistent with that view.

The relevant law was consolidated in three statutes: the Capital Allowances Act 1968, the Taxes Management Act 1970 and the Income and Corporation Taxes Act 1970. The substance of the corporation tax provisions introduced by the 1965 and 1968 Acts remained unchanged by the Consolidating provisions.

Part III of the Finance Act 1971 made major changes to the law on capital allowances for plant and machinery acquired after October 27, 1970. In respect of allowances to which it applied, companies were given a two-year "period of disallowance" for "first-year" allowances. At first sight it might appear that a right of disallowance was inconsistent with the necessity to claim allowances, but what was intended was that a company which had claimed a capital allowance was given two years in which to change its mind. The position, therefore, remained unaffected by the provisions of the 1971 Act.

The appeal should be dismissed. LORD JUSTICE BINGHAM, agreeing, said the Revenue argued that with the introduction of corporation tax in 1965, capital allowances were to lose any permissive quality for companies subject to corporation tax. Not only was a company obliged to grant the allowances, but the company had willy-nilly to accept them whether it wanted to or not.

If the draftsman of the 1965 Act had intended to make that change one would have expected explicit language, and to have made a line by line scrutiny of the existing legislation in so far as it was to be incorporated in the new, to ensure it contained no provisions inconsistent with that legislative intention.

However one read the relevant sections it was not possible to extract the sort of statement that one would expect if a clear and well understood practice were to be altered. In the absence of clearly demonstrated legislative intention the references [to claims] must be seen as an indication that there was no intention to make any change.

The Vice-Chancellor agreed. For the companies: GR Aaronson QC and Terence Moreschenson (Linklaters & Paines).

For the Revenue: Charles Potter QC and Alan Davies (Inland Revenue Solicitor).

## AIR TRANSPORT

### Tim Coone on Argentina's long awaited privatisation programme

# Austral flotation on the runway

AUSTRAL, the Argentine domestic airline which heads the list of state companies to be privatised by the Alfonsín Government, appears to have reached its final bureaucratic hurdle.

After years of fruitless efforts to return the company to the private sector, following its takeover by the Government in 1980, the airline's assets are expected to be placed on public offer within a month. "All that is required in the minister's signature," said Mr Eugenio Negri, the director of aviation in the Ministry of Public Works and Transport.

Mr Pedro Trucco, the minister, along with nearly all of Argentina's officialdom, is presently enjoying the sunshine along the country's Atlantic beaches, "but within three months, allowing time for the tender to be publicised and for the offers to be opened and considered, the company will probably be back in private hands," said Mr Negri.

This time it does seem to be for real. Last August, senior government officials were predicting that the company would be privatised "within weeks," but overlooked the extensive bureaucratic procedures that still had to be embarked upon. The presidential decree authorising the privatisation was signed last September "and since then we've been working all out on it," said Mr Mauricio Jara, the company's president.

He said that the floor price of the sale has been fixed at \$27m by the privatisation committee, substantially below the \$38m "technical valuation" of the company's assets "so as to promote adequate interest in the sale and to encourage rival bids which we hope will exceed the technical value," said Mr Jara.

Ministerial approval of the valuation is the final step before the company goes on public offer "and the Minister has already given his verbal approval," said Mr Negri.

Austral was taken over by the Government in 1980 following a period of disastrous management by its owners which ran up debts now estimated at \$200m. Allegations of fraud and misappropriation of funds surrounded the company's collapse and takeover, and involve Mr Martinez de Hoz, the former economy minister under the military junta.

By the time the present democratic government came to power in 1983, Austral was absorbing a government subsidy of \$2m per month. Under new

management however, the company began making an operating profit within 12 months and has been ever since, according to Mr Jara. However, he declined to give details. "We have demonstrated that there is no reason why this company cannot be run profitably, and in line with the government policy to reduce its direct participation in the economy it is time to sell it," he said.

Austral is a leading case in the government's proposed strategy of privatisations. Despite three years of government commitment to privatisation however, the results are still negligible, the only notable

examples being a small company producing electrical machinery, and another aviation and travel company, which was formerly part of Austral.

Austral's chequered history and the controversy surrounding its privatisation have made it a political football. Previous efforts to sell it in 1981 and 1983 failed through lack of interest and another failure, or worse, a sale to inadequate owners requiring further state intervention in the future, would be a major political setback for the Government. Considerable time and care has therefore been taken to ensure that this sale goes smoothly.

The company is being sold with none of its debt. Assets include four leased DC-8 80 aircraft, eight BAC 111 aircraft, hangars, workshops and spares, as well as office equipment and computer systems installed in the company's rented headquarters and ticket offices.

"Operations will not have to stop for even 15 minutes during the transfer," said Mr Jara.

The floor price, \$13m below the price sought on previous sale attempts, is attractive at first glance. Three of the leased DC-8s have options to purchase, with \$14m already paid off. The

option purchase price is also below existing market prices for the aircraft according to one local expert.

The company presently operates 26 routes within this huge country with an average seat occupancy rate of 66 per cent. Other productivity coefficients, such as number of passengers per employee, and aircraft utilisation rates, place it well above other state owned airline Aerolineas Argentinas, and on a par with well managed small airlines elsewhere in the world.

A total of 1.5m passengers were carried in 1985, 30 per cent of all national air traffic, and Austral's planes have fre-

quently been operating 10 to 12 hours daily. Annual turnover is thought to be in the region of \$30m and operating costs are just over \$6m per month.

The future buyer(s) will have routes guaranteed for 15 years, and a new system of flexible tariffs favourable to the airlines, which is to be introduced later this year.

The main condition of the sale is that the new owner must guarantee to maintain an adequate service on the routes during the 15-year period, and which will require a modernisation of the fleet's ageing BAC 111s, now approaching 30 years in service.

"They are reaching the end of their useful life with us," said Mr Jara "and will gradually have to be either re-fitted with more fuel-efficient engines or replaced by more modern aircraft." The remaining life of the BAC-111s will therefore be of critical importance in the tender, and the implication that this holds for future investment needs in the company.

Both the Government and the company are remaining cagey as to who has shown interest in purchasing, but local press reports point to possible Japanese, Australian and Argentinian buyers.

The main criteria for the selection of the winning tender is described by Mr Jara: "The buyer that has shown a history of successful airline management would be the ideal, and we work downwards from there." Foreign investment is being invited, although local capital will have to provide at least 51 per cent control according to Mr Negri.

Lining up behind Austral for privatisation are government shares in several petrochemical complexes owned by the Ministry of Defence. According to the head of the air force, Fabrica Militar de Aviones

## The shortest way East.

## And the fastest.

Finnair, one of the world's most experienced airlines, has a route network which extends non-stop to 23 European cities as well as destinations in North America and the Far East.

Speed and efficiency are the key to good guaranteed connections. And that's what Finnair and Helsinki Airport offer. Take London to Bangkok, for example. Finnair flies this route faster than any other airline.

A connection at Helsinki airport is so easy. Everything is under one roof, so transfers are as close as a short walk. The Airport is well planned and spacious, and offers a wide range of services for the business traveller.

Finnair's service, punctuality, comfort and fast routes all

play a role in making Finnair and Helsinki a gateway to remember. So next time business calls, think of Finnair and the Helsinki gateway. Finnair means business, too.

A fresh look at flying.

## MANAGEMENT

Uniroyal

## The pressure that caused a blow-out

James Buchanan examines the break-up of the US tyres group

THERE used to be a company called Uniroyal. It was once one of the largest US industrial companies. It owned tyre factories and shoe factories, chemical plants and plantations. Last month, Uniroyal ceased to exist. In under a year, every chemical plant, plantation and factory has been sold. What began life in 1892 as the United States Rubber Company has shrivelled to a tiny corporate husk, employing a few dozen people in Middlebury, Connecticut.

Uniroyal was taken private in the summer of 1985 in a highly leveraged buy-out involving management and Wall Street investors. It was a classic display of Wall Street's readiness to pull equity capital quite brutally out of declining industries and replace it with the low-grade, high-yield debt known as "junk bonds". In Uniroyal's case, the debt proved intolerable and the business was broken up.

Five hundred people at corporate headquarters lost their jobs directly as a result and the remainder of the 20,000 people Uniroyal once employed now work mostly for corporate entities heavily indebted to banks or bondholders—or are pensioners. Common shareholders did well but not as well as the Wall Street firms involved in the buy-out. We have just paid out \$15m to people who put \$15m into the buy-out," says Martin Duhiller, the Wall Street specialist who liquidated Uniroyal.

Uniroyal was not exactly a flourishing business. The US tyre industry has lost 28 plants in the past 10 years; capacity was too great as tyres have lasted ever longer, wheels got smaller and imports captured a quarter of the market. When Joseph Flannery took over as chairman of Uniroyal in 1980, the business had built a mountain of debt to diversify into chemicals but still depended deeply on supply contracts from General Motors.

Flannery closed two tyre plants, forced a pay cut on the workforce, reshaped the marketing of tyres and turned the tyre

operation into one of the most profitable in the US. But Uniroyal still had to divert much of the cash flow from tyres into capital and research spending just to maintain its relationship with GM and hold its share of the more important replacement market at close to 5 per cent.

Meanwhile, the reduction in the workforce through early retirement had added Uniroyal with unfunded pension liabilities of nearly \$500m. There were two pensioners for every employee. Uniroyal's share price, which had risen from \$9 in 1980 to \$18 at the beginning of 1984 in recognition of the Flannery overhaul, began sliding again and closed out the year at \$13.75.

Uniroyal was just the sort of business to attract the raiders stalking Wall Street. In November 1984 B. F. Goodrich, the Akron, Ohio, tyre maker, had just secretly paid Carl Icahn \$41m as his price for not launching a takeover bid and then later last year James Goldsmith was bought out at a premium from Goodyear, the market leader. When Flannery attempted in early 1985 to gain shareholders' approval for anti-takeover measures, he finished out Icahn, who had been quietly buying Uniroyal stock. In April 1985, Icahn announced a tender offer for Uniroyal at \$18 a share.

The Uniroyal board spent three weeks trying to find a white knight but the only serious approach came from Ethyl, a Richmond, Virginia, chemical company which was mainly interested in the chemical business. "Ethyl made a

very convoluted offer that showed they had less interest in our tyre business," says Flannery. He then travelled the large Wall Street firms that specialise in leverage buy-outs, such as Kohlberg Kravis & Roberts, but ran aground largely because of the unfunded pension liabilities of about \$500m.

Duhiller said he was introduced as "a last resort of management which wanted to control its destiny." The son of an inventor, and a former company doctor himself, Duhiller's buy-out vehicle, Clayton & Duhiller, was small beer against the likes of Kohlberg Kravis. He had never attempted a buy-out on this scale. His equity investors had a war chest of a mere \$40m. "Everybody could see the parts were worth more than the whole. Carl Icahn saw that but people were scared of the pensions thing. We thought we could get that liability down."

In a leveraged buy-out, it is quite usual for the entire cash flow from operations to go towards servicing acquisition debt. But the Duhiller group had to bid at least \$22 a share, or almost break-up value, to dislodge Icahn. And Drexel Burnham Lambert, the investment bank pre-eminent in raising the sort of low-grade corporate debt needed, attached onerous conditions. Uniroyal had to repay no less than \$750m in debt by the end of 1987 or face transferring 20 per cent of the equity to Drexel's clients.

The offer prospectus in August made clear that lower working capital and a boost to cash flow would not be enough: "Effecting substantial asset dispositions is the only feasible way to retire that quantity of indebtedness by such date."

The \$950m buy-out turned Uniroyal from a reasonably well-capitalised company into a heap of junk. Shareholders' funds of \$773m collapsed to \$78m and the shareholders' register to a small group consisting of the Duhiller group, the management, Drexel and its clients. Uniroyal had \$1,105m of bank debt and high-yielding notes and debentures. Around \$600m went into expenses and fees to Wall Street, Flannery or Icahn.

Martin Duhiller (left) and Joseph Flannery: tired of fighting off Carl Icahn

Duhiller said he looked at piecemeal disposals of tyre or chemical, or the smaller plastics and transmission businesses—but "none would raise enough." Uniroyal had to be liquidated and as soon as possible before changes in the tax code to be made this year make liquidations more expensive.

One by one the smaller businesses were sold. Last May, the jewel in Uniroyal's crown, the chemical operation with sales of \$570m, was dispatched at a price of \$78m to Avery, a tiny coal company with sales of just \$7m that Drexel had found.

In July of last year, Uniroyal and Goodrich formally spun off their tyre operations into a separate joint venture. Goodrich had been trying to get out of tyres for some time, and the new owners of Uniroyal each took a special dividend of \$225m from the joint venture and loaded it with debt of \$300m and unfunded pension liabilities of \$245m.

Duhiller had already reduced the unfunded pension liability by \$900m. With the help of John Dwight, a pensions consultant from Burlington, Vermont, he says he secured the reduction by locking the youngest group of potential beneficiaries into a long-term package of corporate bonds yielding 10.4 per cent. Dwight insists firmly that

these are not yet more junk bonds, liable to refinancing at a lower rate and carrying higher risks of default. "The plan is absolutely properly funded," he says. "If I were a retiree, I would be happier that Martin Duhiller took these steps." The remaining pension liability will be met from the Goodrich-uniroyal joint venture's cash flow or funded, Duhiller says. Duhiller, having been used by a group of pensioners, has set aside \$75m to meet future health benefits.

It is too early to identify the future of the main businesses. Avery announced in November that it had raised over \$1m for the purchase of the chemical operation, primarily through issues of junk bonds. Avery's chief shareholder is another Drexel client, Triangle Industries, which used junk bonds to acquire National Can in 1985, multiplied its sales five-fold in the process and was the stock market's star performer that year. Analysts believe that Triangle, which consolidated its move into beverages with the purchase of American Can's operations last year, is using Avery and Uniroyal Chemical as off-balance sheet vehicles for expansion into chemicals. Avery says it has about \$300m in excess cash

for possible future acquisitions.

There is considerable enthusiasm for the tyre joint venture. It is the second largest tyre maker after Goodyear, with about \$2bn in sales and 19,600 employees. Given economies of scale, a further shrinkage in capacity and a lower level of imports because of a weaker dollar, analysts are confident that the joint venture can service its relatively high level of debt. "It's not awfully leveraged," says Flannery. "It made sense because they (Goodyear) are strong in the replacement market and we in original equipment." Len Bogner, an analyst at Prudential-Bache, says: "They were assuredly not as strong individually."

Some people regret the passing of Uniroyal. Flannery says: "I regret what happened to the company. Never in my wildest dreams did I think that something like that would happen. But once everything started in the spring of 1985, you just do the best you can."

Duhiller is sorry about the loss of white-collar jobs. "It really bothered me to dismantle their headquarters. That's the saddest part of this."

This is the second article in this series. The next on Unocal, will appear on Friday.

## Why Scandinavians are classic exporters

BY MICHAEL SKAPINKER

MOST British managers would probably be astonished to hear that they had too much of an export mentality. How can one have too much of an export mentality? Isn't winning new markets abroad crucial to the success of British industry?

It certainly is, a conference at Ashridge Management College was told last week, but looking for export markets is not enough. What is required is a perception of the world as a global market. It is in this search that even some of the best British companies fall down.

Kevin Barham of Ashridge Management College's Research Unit told the conference that Scandinavian managers appear to have a more sophisticated approach to international markets than their British counterparts.

His conclusion is drawn from initial findings of a research project which is being carried out on behalf of the Foundation for Management Education into the ways in which successful businesses are preparing their managers for the future.

The project is looking at ten companies, six in Britain and four in the rest of Europe, which have been chosen for their consistently successful financial performance and their reputation for an innovative management approach. Ashridge has not yet identified the companies involved, but they include both manufacturing and service organisations.

Interviews are being held with a cross-section of managers, including the chief executive, in each company to ascertain the sorts of challenge they expect to face in the future and how they are preparing their managers to deal with them. Interviews have so far been completed with the six British companies and with two leading Scandinavian companies.

Among the issues being raised with the companies is how they are dealing with the internationalisation of business. Barham points out that a recent survey by International Management indicated that European companies in general are increasing their commitment to doing business abroad.

"This includes, for example, efforts to foster a global corporate image, involvement in international alliances, sourcing more components from foreign firms, and expanding production abroad." While emphasising that the

research project has not yet been completed, Barham said that "in most of the British organisations we have talked to the issue of internationalisation does not figure strongly in managers' talk. When discussed at all, it is usually a chief executive or a corporate planner who perceives it as an issue."

This does not mean that the companies are not aware of the need to look beyond Britain for their business, he said. "Many managers are indeed focusing on external challenges, including in particular the need to counter Japanese competition. They are generally very positive in their determination to become more market- and customer-oriented. But the impression gained is that some UK firms are still looking at the international scene with an export mentality rather than a global perspective."

The Scandinavian companies show greater evidence of such a global perspective, Barham says. They are generally very positive in their determination to become more market- and customer-oriented. But the impression gained is that some UK firms are still looking at the international scene with an export mentality rather than a global perspective.

Some Scandinavian firms may also have come to the international scene more recently than have many UK firms, so it might be expected that the issue would carry some freshness and enthusiasm. Whatever the reason, the strength of Scandinavian international vision is striking," Barham said.

One of the concrete manifestations of that greater Scandinavian commitment to international trading is well-known: facilities for foreign languages.

Another is giving greater responsibility to junior managers in setting up and running foreign operations. One junior manager in a Scandinavian company had been set the task of setting up from scratch a sales operation in a Third World country, employing 250 people.

## TECHNOLOGY

## How US business is making the most of expert advice

Europe lags behind in race towards artificial intelligence, reports Alan Cane

THE US seems set to maintain and increase its domination of expert systems, a technology of great strategic importance in both business and defence according to a major report published this week.

Europe is only lagging by 12 to 18 months in the development of commercial expert systems, it says, but risks being overtaken by the US in the technology, coupled with a preference for small-scale developments of limited scope, will prejudice its chances of developing a healthy expert systems industry.

Expert systems are the first commercial spin-off from over 30 years of research into artificial intelligence. They store human expertise in computer systems in such a way that questions asked of the system are answered in a seemingly reasoned manner.

A laboratory technology only a few years ago, they are now being used in earnest by a wide range of businesses. According to the report, over 50 of these systems are now in regular operational use in Europe.

They include, for example, "Parys", an expert in personnel management installed at over 200 sites in the UK, which is used at 30 French sites for the production of public tender documents and "Cadbus 3", a German expert system which helps in the design of steel-framed buildings.

An expert system is a combination of the computer itself, which may be specially designed, coupled with software which contains the elements of machine intelligence.

According to the report, Europe is holding its own with the US in only one area of expert systems development, the creation of "shell" software, basically model systems which can easily be modified to suit a particular application. Helix Expert Systems of the UK, for example, has a shell called "Expert Edge" used by the Bank of America to develop an expert system to help clerical bank staff with queries about letters of credit.

Shell software apart, the Europeans are well short, the production of software "tools", which makes it easier

to manufacture an expert system, is dominated by US specialists. Like Intelliparc, Inference and the Carnegie group.

Artificial intelligence language development is also dominated by the Americans, although a French development, Le List, shows promise.

Conventional and specially built computers for artificial intelligence work is again a US province, the report says. There are only two possible European contenders in the special purpose hardware category: a special workstation built by the French company Amais which runs the two most popular artificial intelligence languages "Lisp" and "Prolog," and a computer called "Rekursiv" pioneered by IBM Products of the UK.

Europe's apparent inability to compete with the US on equal terms in expert systems seems to be the result of America's domination of world computing, coupled with entrepreneurial attitudes which meant that venture capital was much more readily available to US start-up companies. In addition, US users of expert systems were quick to form strategic relationships with the start-ups, including sizeable investments of capital.

Nevertheless, there has been considerable development of small scale but practical expert systems in Europe using a modest level of resources.

The report warns, however, "The European view is more pragmatic, more geared towards short-term benefit."

"In the long term, the results could be less than for the Europeans. The American approach offers two major longer-term benefits which could widen further the competitive gap between American and European industry, for both users and suppliers."

It suggests that US users would be far better positioned for developing large-scale applications where the pay-off is likely to be greater and it says that the demand created by US users will increase the already commanding lead of the suppliers of large-scale expert systems development tools in the US.

In sectors such as finance, insurance and defence—all three of great importance to Europe in general, and the UK in particular—the US lead may be much greater than 18 months.

In the energy business, however, Europe may be level or even slightly ahead. Expenditure by customers on expert systems in France, Germany and the UK was about \$150m in 1984, according to the report. The total for the whole of Europe was between \$200m and \$250m, comparable with US expenditure of 12 months earlier.

Siemens, the West German electronics giant, is thought to be the largest user of expert systems in Europe with over 40 projects under way and up to 200 staff working in the area. Its developments include systems for optimising the use of a computer database, diagnosing faults in Siemens computers and designing the way process control computers should work together.

Among systems in use in the financial sector are: The Caisse d'Epargne Bank

in France is using a personal computer-based expert system at 60 of its branches for processing home loan applications.

At Auditors at Coopers and Lybrand have begun to use an expert system on a portable personal computer for planning audits at their clients.

Is there hope for Europe in that critical technology? According to Gianfranco Pini of the expert systems company Delphi, European multi-nationals should encourage spin-outs (start-ups enjoying a loose relationship with a parent which provides capital, experience and assistance with marketing).

Examples of this include ICI in the UK which encouraged ISI in the development of its product "Savord." Framatome of France which set up Framatome as a joint venture with Teknowledge of the US and Bank Xerox which encouraged Artificial Intelligence as a spin-out to market Xerox's AI product line in the UK.

Commercial Expert Systems in Europe, Ovum 1987, 222p. Ovum is on 01-537 4461.

## Modesty is the best policy

BUILDING a full-scale expert system in-house is likely to cost a minimum of £250,000, so start modestly, advises Systems Dynamics, a UK-based electronics consultancy.

"Do not invest heavily in specialised machines or expensive software tools until you have dabbled enough in expert systems to know what they can do," it urges.

"The first expert system an organisation builds should be seen as an investment to gain the experience for future projects—a trial run. If it turns out to be a truly useful system, all the better."

Systems Dynamics lists the common pitfalls in expert system development, including the temptation to treat the system as if it was a conventional computer program and build it all in one go. Step-by-step development is essential, argues. Prototype small parts of the system should be built to ensure the overall development is on the right course.

It warns against raising expectations within the organisation for the first project and makes it clear that deadlines should not be set for completion.

"If a system shell running on a personal computer is used," it says, "a small system of up to several hundred rules typically takes three man months."

Much of the work involved in filling out a shell consists of feeding in the information gleaned from experts in the field and devising the rules the system needs to interpret the information.

As a guideline, most mature expert systems have cost more than £750,000 to build—not including substantial maintenance costs.

Although the initial outlay may be high, costs savings can be attractive. Digital Equipment (DEC) a leader in expert systems development has a system called Xcon (Expert configurator) which it uses for determining the best way to put together its large minicomputer systems. DEC is said to save DEC \$10m every year.

Systems Dynamics advice is contained in a Strategic Guide to Implementing an Expert System, priced at £90 from the company on 06278 5466.

## WORTH WATCHING

Edited by Geoffrey Clarish

## A quick line to Shell drawings

SHELL UK Exploration and Production (Expro), the operator for the joint venture in the North Sea between Shell and Esso, is to put some 3,500 drawings currently held on microfilm on to magnetic disc using a system from Advent, a small Wokingham, UK company.

The advantage is that Expro engineers will be able to access any drawing quickly on a screen and keyboard terminal and carry out modifications using computer-aided design techniques.

Offshore production platforms are complex structures with networks of piping, communications and power cables. Each platform is unique and its systems are recorded on "as-built" drawings. Constant reference to and modification of these drawings is needed over the years as the platforms are modified and maintained. At the moment, the process is manual, with modification of points taken from the film and the subsequent production of new prints from new film.

The Advent system uses a US-made scanner to make the transfer from drawing to disc. A single-line end of 10,000 optical fibre ends moves across an illuminated A1 (33 x 24 inches) drawing in under 10 minutes. The light output from each fibre is turned into an electrical signal, digitised and held on the disc.

Apart from quick access and ease of modification, the system is also able to enhance a drawing's image.

The £250,000 system, when complete, will be capable of storing 20,000 drawings and will be able to print 300 in 24 hours. Shell Expro believes that on average productivity will improve fourfold, compared with the present manual methods.

## Japanese stuck on rust-free alloy

NIIPPON KOKAN (NKK) in Japan has developed a bonding process for joining carbide or nitride ceramics to Nimonic 80, a nickel-based alloy.

Silicon nitride and carbide offer far more resistance to corrosion than Nimonic 80, which is at present used by itself to make exhaust valves for marine diesel engines for example. By applying the ceramics to the parts most prone to corrosion (the sealing face in particular), NKK expects to produce valves that will function without maintenance for two years.

Nimonic 80 is itself a highly heat resistant material and the new combination is expected to find application in the manufacture of other high-temperature parts and equipment, in addition to its use in exhaust valves.

## Show made of screen benefits

A VIDEOTAPE entitled Personal Computers in Manufacturing has been made by the Society of Manufacturing Engineers (SME) in the US.

Running for 28 minutes, the tape looks at trends in technology, personnel computers at work and the anticipated advances in the computers and their peripherals. There are also interviews with industry experts and footage shot in manufacturing plants.

The tape is part of the SME series, "Manufacturing Insights," each featuring a specific manufacturing technology.

## Brass rods: The race to conform

RNF METALS Technology in Wantage, UK, is to launch a research project to investigate the production of small-diameter brass rod by the Conform process, which has previously been used mainly for copper and aluminium.

The process is continuous and the machine that performs it is cheaper than current production machinery for brass rod, which is at present made on a batch basis. It involves passing "raw" rod through a grooved wheel and sheave arrangement which produces frictional heat and makes the rod "conform" to the groove/shoe before passing through a die.

RNF expects this alternative manufacturing route to achieve overall cost savings of 25 per cent when problems of new materials and their applications are solved.

## Monarch control in-flight sales with Husky

Find out why on Country (045) 66811

MANUFACTURERS OF THE WORLD'S MOST POWERFUL HAND-HELD COMPUTERS

## Elementary idea from Finland

FINNISH COMPANY Outo-kumpu has introduced a table-top X-ray analyser that can be used in both laboratory and shop floor environments.

Known as X-Met 820, the instrument can determine the presence and quantity of six different elements at the same time, covering everything from aluminium to uranium. The analysis can be made on liquid, powder or solid samples. (In such analyses, the sample is bombarded with X-rays and the emitted fluorescence produced are characteristic of the elements present.)

The results of the analysis are seen on a printer, although data can be sent to a computer for further processing.

## Cornering the cabinet market

ONE of the more time consuming tasks in making steel cabinets for industrial products, welding the corners of the unit, can be carried out automatically using a new welding rig designed from Freccioni Systems of St Ives, Cambridge, UK.

The design has been carried out in conjunction with an office equipment maker, but FS is in a position to produce similar units for any other interested companies.

The unit is for single operator use and has two cabinets for industrial products, which can be loaded while welding is taking place on the other. The quality of the weld produced makes subsequent grinding and polishing unnecessary. Therefore, after degreasing, the welded units can go direct to the paint shop.

FINANCIAL TIMES  
CONFERENCES

# The London Motor Conference -Manufacturing, Components and the Aftermarket

London, 17 February 1987

The Financial Times is arranging an important one-day Motor conference to be held at the London Marriott Hotel on 17 February 1987. The meeting is timed to coincide with the Autopartac '87 Exhibition being held at Olympia, 15-17 February.

The proceedings will be chaired by Mr John Neill, Group Managing Director, Unipart Group Ltd, who will give the opening address. Other speakers will include:

**Mr John Hardiman**  
Vice-President, Parts & Services Operations  
Ford of Europe Inc

**Mr Tom Farmer**  
Chief Executive  
Kwik-Fit Holdings plc

**Mr Bob Barber**  
Investment Analyst  
Phillips & Drew

**Mr Roger Pedder**  
Chairman and Chief Executive  
Ward White Retail UK Ltd

**Mr Ian Gibson**  
Deputy Managing Director  
Nissan Motor Manufacturing (UK)

**Prof Krish Bhaskar**  
Director, Motor Industry Research Unit  
University of East Anglia

Sponsors: Financial Times in association with  
Autopartac '87

## FT COMMERCIAL LAW REPORTS

# Lancia opposition to Lancer trade mark fails

**MITSUBISHI v FIAT**  
Court of Appeal (Lord Justice  
Fox, Lord Justice Parker and  
Lord Justice Giddwell): Dec-  
ember 19 1986.

**REGISTRATION** of a word as a trade mark will not be refused on the ground that it is likely to cause confusion with a previously registered word unless, having regard to the circumstances including the kind of market in which the relevant goods are sold, there is a real and not merely a fanciful risk of confusion among a substantial number of people.

The Court of Appeal so held when dismissing an appeal by Fiat SpA, Fiat Auto SpA and Fiat Auto UK Ltd, from Mr Justice Falconer's judgment upholding the assistant registrar's decision to dismiss their opposition to registration of a trade mark by Mitsubishi.

Section 11 of the Trade Marks Act 1938 provides: "It shall not be lawful to register as a trade mark . . . any matter . . . likely to deceive or cause confusion."

Section 12: "(1) subject to . . . subsection (2) . . . no trade mark shall be registered . . . that so nearly resembles . . . [a registered] trade mark as to be likely to deceive or cause confusion."

LORD JUSTICE FOX said that Mitsubishi applied to register the word "Lancer" as a trade mark in the class for "passenger carrying motor cars."

Registration was opposed by Fiat SpA, Fiat Auto SpA and Fiat Auto UK Ltd, which had acquired the Italian sports car manufacturer Lancia SpA.

Opposition was principally concerned with protection of the

mark "Lancia."

The assistant registrar dismissed the opposition and Mr Justice Falconer upheld his decision.

The Lancia mark had been in use in England on specialist motor vehicles since the early part of the century with some interruptions during the war years. It had a substantial reputation. In general it could be said that Lancia cars were widely established in the car market.

Lancia had two registered trade marks—the word "Lancia" in a device which was largely a wheel; and the words "Lancia Beta Monte Carlo."

Mitsubishi used the name "Colt" as the maker's name for its cars. There was a Colt model called "Lancer." It was common to speak of a "Colt Lancer" or to use "Lancer" in a context where it was obvious that it was a model of a Mitsubishi or Colt car.

Mitsubishi registered the mark "Colt Lancer" without any objection. Lancia's concern was that the application in suit envisaged the use of "Lancer" without any reference to Mitsubishi or Colt.

The matter turned on section 11 and 12 of the Trade Marks Act 1938. The assistant registrar stated the appropriate test under section 11 as whether the mark as applied was "likely to deceive or cause confusion" and under section 12 as whether the mark as applied was "likely to deceive or cause confusion" among a substantial number of persons . . .

He formulated the test under section 12 as whether the mark as applied was "likely to deceive or cause confusion" among a substantial number of persons . . .

The judge accepted the correctness of these tests and they were not in dispute.

The principles governing assessment of the risk of confusion were to be found in *Pionist* [1906] 23 RPC 774, 777 where Mr Justice Parker said: "You must take the two words, You must judge them both by their look and . . . sound. You must consider the goods to which they are to be applied . . . the nature and kind of customer . . . all the surrounding circumstances . . . what is likely to happen if each of those marks is used in the normal way . . ."

The assistant registrar and the judge concluded that there was no real tangible risk of confusion if the Lancer mark was registered. The issue was whether that was right.

Visually the two marks were easily distinguishable. There was no practical risk of confusion. Phonetically, there was a possibility of confusion depending on the circumstances of their use.

The material circumstances were (1) Lancia was a word of three syllables, whereas Lancer had two. If the three in Lancia were pronounced, there was a strong differentiation phonetically.

(2) Lancer was an English word, familiar in ordinary English usage. Lancia had no meaning in English. Its connotation was Italian. A word with a known English meaning was unlikely to be confused with a word of foreign connotation having no meaning in ordinary English usage.

(3) The question of confusion could not be adequately considered for trade mark purposes save in relation to the market. The case was concerned with the market in cars. A car was an expensive piece of equip-

ment. Its purchase would usually have to be considered with some care and would be assisted in a competitive market by an abundance of brochure literature. When considering risks of confusion therefore, the purchase of a car was not to be equated with an everyday purchase over a shop counter. Nor was it likely to be purchased over the telephone. The practical risks of confusion seemed very slight indeed.

(4) Lancia asserted that the phonetic similarity of the two words would be a source of confusion by mishearing. The example was given of a cocktail party conversation denigrating the Lancer which was misheard or confused with Lancia.

The risk of such mishearing seemed unlikely to survive the mechanism of purchase, having regard to the nature of the goods. There must be a real, not a fanciful, risk and it must be a risk of confusion among a substantial number of persons.

Having regard to the three-syllable composition of Lancia and the nature of the market, the cocktail party example of mishearing was no more than fanciful and was not likely to extend to a substantial number of persons.

Looking at the whole matter, there was no real tangible risk of confusion between the Lancia and Lancer marks.

The assistant registrar and the judge reached the correct conclusion on what was essentially a question of fact regarding the risk of confusion. The appeal should be dismissed.

LORD JUSTICE PARKER and LORD JUSTICE GIDDWELL agreed.

# International Appointments

## We are pleased to announce the opening of Jonathan Wren International Ltd Brussels

Recruitment Specialists to the Banking and  
Finance Industry

As a result we are now better positioned to serve  
the needs of our many clients in the Benelux  
countries and Germany.

Please contact:  
**Felix Meyer-Horn**  
Administrateur  
Avenue Louise, 203  
1050 Brussels  
Belgium  
Tel: (02) 647 8990

London • Brussels • Hong Kong • Sydney

Jonathan Wren  
International Ltd  
Banking Consultants

## FOREIGN EXCHANGE Kuwait

Our client, a leading commercial and international bank headquartered in Kuwait,  
is seeking to expand its Treasury Department by the appointment of the following:

### Chief Dealer Foreign Exchange

The incumbent, who will be in his  
early 30s will manage and control the  
foreign exchange section of the dealing  
room and have responsibility for not only  
training junior members of staff, but also  
building up the bank's trading activities,  
both locally and internationally.

Both of the above positions require considerable maturity of character and a good  
knowledge of all aspects of foreign exchange, both spot and forward. Exposure to  
deposits and futures trading and to current investment products would be  
advantageous.

Excellent salaries are offered for both of these positions together with substantial  
expatriate benefits packages.

Interested candidates should forward their full Curriculum Vitae to Robert  
Watsam, Director, Jonathan Wren International Ltd, 170 Bishopsgate,  
London EC2M 4LX. Tel: 01-623 1266. Fax: 01-626 5258.

### Senior Dealer Foreign Exchange

Reporting to the Chief Dealer,  
Foreign Exchange, the incumbent who  
will be in his mid 20s, will assist with the  
development of all aspects of the bank's  
spot and forward trading activities.

Jonathan Wren  
International Ltd  
Banking Consultants

## Portfolio Manager/Investment Advisor

Nassau, Bahamas, subsidiary of Bank Leu A.G. wishes to engage an investment expert  
for a senior position in their Private Banking Division. Previous experience in a wide  
variety of financial instruments in Asian, European and particularly U.S. markets  
is important. Responsibilities include making investment decisions for managed,  
discretionary portfolios as well as counselling clients who want investment advice.  
Considerable scope for initiative and imagination. Ideal candidate would preferably  
be Swiss national, at least thirty-five years old, with a good personality and a successful  
record in investments. Initial contract would be for three years, renewable thereafter,  
with attractive tax-free compensation package that includes salary fully commensurate  
with experience and ability, annual performance bonus, housing allowance and other  
benefits.

Interested candidates should apply in confidence to  
The Managing Director  
BANK LEU INTERNATIONAL LIMITED  
P.O. Box 13396, Nassau, Bahamas  
with full details of experience in investments.

## EMPLOYMENT CONDITIONS ABROAD LIMITED

An international association of employers providing  
confidential information to its member companies relating  
to employment of expatriates and nationals worldwide.  
Anchor House, 15 Britten Street, London SW3 2YL  
Tel: 01-361 7151

## DEPUTY MANAGER CREDIT DEPARTMENT

The credit department is responsible for credit analysis, the  
arranging and administration of credits, guarantees and  
documentary credits. It has a staff of nine which is divided  
into a loan production and loan administration group. You  
will be heading the loan production team and be deputy  
to the head of the credit department. You will be working  
closely together with our corporate marketing staff.

We are looking for candidates with several years' proven  
record in international finance from a financial institution  
or a corporate finance department, preferably with  
educational background in business administration and/or  
commercial law. He or she must have thorough knowledge  
of credit analysis, experience in financial instruments and  
be fully conversant with credit documentation. Company  
language is English. Knowledge of German or French will  
be an advantage.

Personal characteristics should include an analytical mind,  
strong communicative skills and an ability to work efficiently  
also under pressure.

For further information, please contact Claes de Neergaard  
or Beate Zacharoff at 352-2661.

Applications not later than January 30 to:  
FEBANKEN INTERNATIONAL  
(LUXEMBOURG) S.A.

## Chief Chinese Language Officer Hong Kong

£25,639 - £29,105 p.a. + 25% gratuity

• Low tax area - maximum 17% • Generous leave  
• Medical and dental benefits • Subsidised accommodation  
• Free passages and holiday visits for children • Children's education allowance.

**QUALIFICATIONS:**  
(a) A degree from a Hong Kong or British  
university, or equivalent; (b) ability to interpret  
consecutively with great precision and fluency  
from English into Putonghua, and vice versa;  
(c) very good professional skills in translation  
from English into Chinese, and vice versa; and  
(d) considerable working experience in inter-  
pretation at conferences and meetings at inter-  
national level. Applicants will be required to sit a  
competitive examination in interpretation and  
translation to be conducted in London.

**DUTIES:**  
Provide consecutive interpretation service in  
English and Putonghua at conferences and  
meetings at international level; vet and trans-  
late documents from English to Chinese, and  
vice versa; train officers in the Chinese

Language Officer grade in Putonghua inter-  
pretation; and coordinate and control the pro-  
vision of English/Putonghua interpretation  
and English/Chinese translation services. (Note:  
Required to travel outside Hong Kong, some-  
times at short notice, and to work irregular hours  
both in and outside Hong Kong.)

The appointment will be for an agreement of  
three years' resident service. The salary scale  
is from HK\$24,785 to HK\$28,135 per month  
(approximately from £25,639 to £29,105 p.a.)  
plus 25% gratuity.

For further information and an application  
form write to Hong Kong Government Office,  
6 Grafton Street, London W1K 3LB. Closing date  
for acceptance of completed application is  
4th February 1987.

\*Based on exchange rate HK\$11.00 = £1.00. This is subject to fluctuation.

THE ARTS

The Triumph of Love/Gate

Martin Hoyle

Guy Callan and Lilian Evans

Despite Voltaire's notorious judgment that Marivaux weighed butterfly eggs in scales of cobweb (but Voltaire's view of the French rules him out of court as a critic, anyway), the playwright's works increasingly reveal a sombre side, much in keeping with modern scepticism. I remember a Marivaux production in Strasbourg two years ago where the emotional cat's cradle was woven in falling darkness, a grim saraband for a society's death-throes no less than the ROC's current *Les Amants Dangereux*.

The tiny Gate Theatre Club, above a pub in Notting Hill, is presenting the first professional British production of what at first glance transports us back to the pastoral realms of mythic artifice. Princess Leonide, a family usurper the throne. Like Rosalind she does man's gear and makes for the woods. Here she finds the long-lost rightful heir, reared by a philosopher and his sister, to whom she hopes to make amends (she has conveniently fallen in love with him as well).

Like Viola, she enmeshes both sexes. Love has a cathartic effect on the philosopher who admits that conceit and love of reputa-

tion have prompted his disdain of worldliness, and now confesses to self-contempt—a scene whose supreme irony stems from truth revealed by falsity in circumstances of deception. Guy Callan's direction might allow more dignity to the hoaxed middle-aged siblings. Certainly they are meant to have learnt the sharp lesson of love, but here the Princess's final admonitory tone is scornful, adding a harshness not too far from cruelty to these admittedly sometimes uncomfortable among strangers.

Leonide herself is a not uncommon Marivaux woman: the girl in love whose schemes get out of hand and reveal unexpected truths in her and her victims. Harriet Kervill's attack underlines the ruthlessness (though she could point her lines more sharply), while Lilian Evans's sprightly maid and Malcolm James as the lost prince provide the strongest support. Besides directing, Mr Callan has translated and plays an Arlequin of almost clinical detachment; his capering, posturing, mopping and mowing are in untypical contrast to another, below-the-line character, the gardener, whose portrayal as African slave betrays an unease with dialogue that verges on the unintelligible.

Two share 'Drama' magazine's award for Best Actor

The quarterly magazine, *Drama*, announced its annual theatre awards at the headquarters of the British Theatre Association. In place of a snowbound Donald Sinden, Derek Jacobi presented the awards that High Quansha, sharing the title of Best Actor for *The Great White Hope* with Bill Fraser (for *When We Are Married*)—declared he had always assumed went to the "rich, white and stupid." Tim Rice struck a more glib pose, cheerfully describing himself as rich, white and stupid as he and Robert Fox producer, accepted the Best Musical accolade for *Chess*.

The award for Best Actress was presented to Joan Plowright for her performance in *The House of Bernarda Alba*, a production whose designer, Elio Frigerio, shared honours with Maria Bjornson of *The Phantom of the Opera*. Alison Steadman was named Best Supporting Actress for her performance in *Alas, Poor Whistler*, while Best Supporting Actor was Tom Wilkinson for his Pastors Manders in *Ghosts*.

Mike Alfreed was the Best Director title for his production of *The Cherry Orchard* at the National Theatre. The young

writer Jim Cartwright carried off his Best New Play with his first piece, *Road*, about to be revived at the Royal Court; and, well in the tradition of distinguished writing, the Bush Theatre, of Shepherd's Bush in west London, received a Drama Magazine Special Award for its continuing high standard in the production of new plays.

London did not monopolise the glory. The Young People's Theatre Award was shared between *Theatre Centre*, London, and the Leeds Theatre in Education team; Yorkshire also claimed distinction in Young People's Theatre Design, the awards going to Bradford's Freehand Puppet Theatre; and the Amateur Theatre Award was presented to *Pare and Dare* Theatre Company, Rhondda, Wales.

'British Art in the 20th Century' British Art in the Twentieth Century: *The Modern Movement* will open at the Royal Academy of Arts, Burlington House tomorrow. Second in a series of 20th century exhibitions which began with German art, it will include 300 works by 70 artists dating from 1910 to the early 1970s.

Television/Christopher Dunkley

Miss Marple's clue to success

Nigel Planer in "Filly Rich and Catnap"

The new season is now properly under way and the schedules are packed with an impressive number of new series. As usual, of course, the word "new" is slapped on to some programmes which look decidedly familiar. *Horizon*, now coming up for its 23rd year, was billed as a "New Series" last Monday, meaning, presumably, that the programmes this season are not repeats. Anyway, the opening episode, devoted to circadian rhythms, powerfully sustained *Horizon*'s admirable standards.

BBC's *Miss Marple* (Sundays) is a much more recent creation, even though the title role is so exactly right in the title role that it feels as though she has been playing it all our lives. The new two-part drama, "Sleeping Murder," reeked luxuriously of co-production money: all that expensive location film work and whole teams of extras in authentic fifties costumes. This is yet another television drama with no sex, no swearing and no violence which the Grundyists would have us believe do not exist.

The "new" *Carroll Confidential* on BBC1 (Saturdays) is another known quantity, and although the spiky anti-establishment pose and the tone of working class solidarity are beginning to feel a teeny bit dated, in view of the fees which Mr Carroll clearly commands, having joined the system, but he is still a welcome voice, offering some counterpoint to the predictable comedians provided by such comedians as Monty Python, Everett and KIL.

Mel Smith and Griff Rhys Jones have moved from BBC to ITV, but they, too, are pretty familiar to us now. I had hoped that somebody would start making entire programmes based on the brilliant idea of Jones's inserted into old black and white movies, but no doubt it is prohibitively expensive. *Inspector Morse* (Sundays), London Weekend has adapted the idea, which they use with Clive James, of adding cod commentaries to old film clips: very much cheaper in this age of short, and still quite funny. Sometimes.

*Filly Rich and Catnap* (Wednesdays) is clearly supposed to be a way of developing the careers of Adrian Edmonson, Rik Mayall and Nigel Planer without obliging them to continue as *The Young Ones*. But it is already clear that what they seem to see as defiantly juvenile, and we see as embarrassingly childish, is not the outcome of a particular series but part and parcel of these particular comedians. Far from references to genitalia, and extreme violence are their stock in trade and so—regardless of the format—their most appreciative audience will continue to be drunk teenagers.

There are, however, heaps of series which really are new. For instance, the first 10 days of the year saw the start of three new sitcoms, though again (it is becoming worryingly prevalent) the best by miles is an American import on Channel 4, *E.R.*, meaning the emergency room of a hospital, in scarcely breaking new ground with its mixture of farce and high drama: *Hill Street Blues*, *St Elsewhere*, *M.A.S.H.* and others have exploited the same formula.

However, *E.R.* (Fridays) is vastly superior to both *My Husband And I* (Fridays),

in *Z Cars*, but its members are young, inept, 27 per cent female and 14 per cent black. I suspect this is nearer to wishful thinking than any true reflection of reality, but I hope to devote a whole column soon to the ways in which television so often distorts reality.

Another new crime series is being offered by ITV, this one set in the even older tradition of the idiosyncratic single detective. Joining the ranks of which stretch from Sherlock Holmes to Adam Dalgliesh, via such memorable sleuths as Columbo and Frank Marlowe, Inspector Morse (Tuesdays). He drinks real ale, drives an old Jag, sings in a choir, and—a truly original touch—dreams up solutions which are highly involved and wrong. The opening episode seemed a bit too long and contrived, even by the extreme standards of this sort of fiction, but with John Thaw in the lead, Oxford settings, and—once again—high production values, judgment must be reserved.

ITV is also screening Yesterday's Drama (Fridays), the latest of the divorce dramas which are now coming at us thick and fast. Teenage son is fanatically loyal to mother's new man and wants to follow him into motor mechanics. Dad is a high-powered over-achiever in an aircraft engine company and Mum is Judy Lou, who must be taking something because, while everybody else grows old, she simply grows more beautiful. Writer Peter Gibbs has already introduced some interesting secondary characters—Dad's hard-nosed boss, and his indispensable secretary—and although the series promises to be one of those good, middle-of-the-road dramas which British television does so well. Incidentally, there is almost as little swearing, sex or violence in this as in *Miss Marple*.

Of the series which fall less readily into categories, BBC's *Seven Years Summer* (Sundays), is proving to be the little jewel I suspected: a cross between "Lark Rise To Candleford" and *Out of Town* in which personal witness is providing a fascinatingly detailed story

about one little pocket of land near Chesham. This week we heard about gleaming, dumpings with bacon at one end and jam at the other, and from a woman who said quite unself-consciously "We were 12 of us in the family. Ten of us lived..."

Most of the un-categorisable material, however, is on Channel 4. "Max Headroom" has never lived up to the promise of the original drama, and although in the new *Max Headroom Show* (Tuesdays) the computer-graphic character is being used to say more than top and tail pop videos, the idea still seems sadly wasted. Map of *Dreams* (Saturdays) is a mildly interesting attempt to get away from conventional television narrative by using aerial clips, superimposition, time-lapse photography and so on, without dialogue, to create a little of it goes quite a long way.

And *The Last Resort* With Jonathan Ross is a late night chat and music show, which features as presenter a young man who may one day do the job outstandingly well. At present, he is falling into the awful habit of asking a question and then promptly interrupting the answer with a gag of his own. Nerves may be the reason, but his producer should curb him quickly before we all switch off in irritation.

The opening episode of *State Of The Art* (Sundays) was also irritating in some ways, but despite that the series promises to be significant enough to deserve a column to itself. It is not often that television even attempts to come to terms with contemporary art—*The Shock Of The New* was the last occasion and that was seven years ago—so there is much to be said.

The new year has not brought us another *Singing Detective*, but we can hardly expect that kind of thing more than once in a blue moon. Only a fortnight into 1987 we have already been offered the sort of variety which, 20 years ago, would have been stretched across six months.

Katia Ricciarelli and Plácido Domingo in the Royal Opera's production of "Otello," which opened at Covent Garden last night. Max Loppert will review it in tomorrow's paper

Francesco d'Avalos/Barbican

Max Loppert

Monday night's Philharmonia concert at the Barbican Hall was a rather curious event: the London conducting debut of a Neapolitan aristocrat aged nearly 57 and musically quite unknown in this country. Francesco d'Avalos, who is also a composer (and teacher of composition at the San Pietro a Majella Conservatory in Naples), has studied with, among others, Franco Ferrara and Celibidache; and he made it clear that he is no dilettante in knowing how to control an orchestra.

The opening work, the *Zemfira* Overture, provides an immediate test—will those great E flat chords be sounded together?—which the orchestra and its unfamiliar conductor passed with ease. All three works on the programme were led without incident, and when the last of those works is Bruckner's Seventh Symphony, a conductor's self-confidence has to be reasonably strong.

Evidently on this occasion, it was justified. The Bruckner was indeed a strong and confident reading. Probably nobody told the conductor beforehand that this is London's most unrelenting chance.

Parikian/Milne/Fleming trio

Andrew Clements

Hannah Milne is a very different kind of pianist from Bernard Roberts, his predecessor in the piano trio with Maurice Parikian and Amorys Fleming. Whether his deep interest in the high Romantic repertoire will alter the slant of the trio's programming only time will tell, but it may be significant that the main work in Monday's BBC Lunchtime Concert from St John's, Smith Square, broadcast on Radio 3, was Schumann's D minor piano Trio, one of the greatest of Romantic piano trios.

By the time Parikian, Milne and Fleming reached it, they were at last beginning to settle into the programme, after a rather uncomfortable account of Mozart's G major Trio, K564.

The first movement stumbled along; the slow movement, and final movement, were played with grace, and never suggested the kind of rapport one would have expected from such a distinguished trio of instrumentalists.

After such a beginning, it was not surprising to hear the Schumann launched with few risks; safe, controlled playing seemed to be prescribed. Even the extraordinary episode in the development section of the third movement, when the piano part is marked *una corda* and the music plunges into a totally unexpected sound world, was treated in a matter-of-fact way without any special sense of mystery.

Holt's Tauromaquia/Wigmore Hall

Dominic Gill

Simon Holt is the young (b. 1958) composer whose *Rites* for 10 players so impressed me at a London Sinfonietta concert three years ago. His new *Tauromaquia* for solo piano was given its first performance on Monday by Ian Brown, who also commissioned the work.

The title—"the art of bull-fighting"—is taken from the series of etchings of the same name by Goya; but Holt's sound-world is anything but Goyaesque—a closer visual parallel would be rather some manner of tentacle hybrid between Klee and Matisse. But other more obvious parallels present themselves first: some of the choral figurations have an unmistakably Messiaenish birdsong ring, while others have a more delicate and reflective Debussy-like liquidity; the spirit of Mess-

iaen, too, pervades many of the rhythmic cells and sequences. The piece lasts just 11 minutes; and I should guess that in a wider and more pungent sense, it would seem to cover greater emotional ground. The effect here was interesting, not unrewarding, but a little tame.

Known through his chamber associations—he is the pianist of the Nash Ensemble and the Villiers Piano Quartet. It is no slight on his ensemble talent to say that he is somewhat less commanding as a soloist. I did not stay for the Hammerklavier sonata in his second half; but the pair of Brahms Rhapsodies (op. 78) and the trio of Debussy images with which he preceded Holt's *Tauromaquia* were robust, capable, and unremarkable.

Cinderella of the Arts

Literature is the Cinderella of the arts in England, according to a report published today by the National Campaign for the Arts. New writing will suffer unless the Arts Council grant of £462,500 to literature—compared to £26.2m for drama—is substantially increased, warns the report.

Simon Crisp, director of the campaign and author of the study, stated that the grant to literature has been cut by 45.8 per cent in real terms over the last two years. "The money was spent on books which were marginal to the mainstream of publishing but often central to the development of literature," he said.

He urged the Arts Council to "beef up" its literature panel, set up new writers-in-residence

schemes, establish bursaries, offer joint ventures and loans to innovative publishers, and appoint a literature director.

In an apparent coincidence, the Arts Council issued its own statement, announcing plans to appoint a literature director next month. The announcement came as the council welcomed the draft policy of its literature panel. The secretary-general of the Arts Council, Mr Luke Rittner, applauded the draft "for its commitment to re-establish a vigorous programme for literature." Proposals include the promotion of children's literature, a touring network for writers and encouragement for the development of a National Literature Centre at the South Bank.

Arts Guide

Music/Monday, Opera and Ballet/Tuesday, Theatre/Wednesday, Exhibitions/Thursday. A selective guide to all the Arts appears each Friday.

January 9-15

Theatre

**LONDON**  
*Les Liaisons Dangereuses* (Ambassadors): Christopher Hampton's masterly version of Laclos's epistolary novel is sexy, witty and wise, like a collaboration between Marivaux and de Sade. Howard Davies's sell-out pre-revolutionary production for the RSC has moved from the Pit with Alan Rickman and Lindsay Duncan still bedding and blushing over lovers and other riffs. (836 6111, CC 638 1171)  
*Midnight* (Barbican): Rarely seen Shaw, and a much underrated play, given the full RSC works by John Caird, a Polish new woman crashing into the survey conservatory in her monologue. Jane Lapotke's sparkling alongside Brian Cox, Elizabeth Spriggs and newcomer Richard McCabe (838 8795, CC 638 8881).  
*The Phantom of the Opera* (Her Majesty's): Spectacular but mediocrity-motivated new musical by Andrew Lloyd Webber emphasising the romance in Leroux's 1911 novel. Happens in a wonderful Patti Opera ambience designed by Maria Bjornson. Hal Prince's alert, affectionate production contains a superb central performance by Michael Craw-

ford. A new, meticulous and palpable hit. (838 5244, CC 579 6131/240 7200).  
*Western in Mind* (Vodouville): Alan Ayckbourn's new comedy has a brilliant performance by Julia McKenzie as a dissatisfied housewife visited on her own garden lawn by an imaginary ideal family. Bleep but funny, hailed in some quarters as a vanguard feminist drama; but not put off by that. (836 9687/5645).  
*Starlight Express* (Apollo Victoria): Andrew Lloyd Webber's roller-skating folly has 10 minutes of Spelber movie magic, an exciting first half and a dwindling reliance on indelicate music rushing around. Disneyland, Star Wars and Cats are all here. Pastiche score adds to the fun. No child is known to have asked for his money back. (834 6164).  
*Dead Street* (Drama Lane): No British equivalent has been found for New York's *Jerry Orbach*, but David Merrick's top-dancing extravaganza has been rapturously received. (838 6166).

WASHINGTON

*Les Misérables* (Opera House): The American tour that will end up on Broadway early in the new year be-

gins in Washington as a celebration of the British music leap beyond its American frontiers. Ends Feb 14. (254 3770).

CHICAGO

*Pump Boys and Dinettes* (Apollo Center): Fascious look at country music and down-home country life with a good beat and some memorable songs, especially one played on kitchen utensils has proved to be a durable Chicago hit. (835 6100).

NEW YORK

*Cats* (Winter Garden): Still a sellout, Trevor Nunn's production of T.S. Eliot's children's poetry set to trendy music is visually startling and choreographically felicitous, but classic only in the sense of a rather staid and overblown idea of theatricality. (239 6282).  
*Dead Street* (Majestic): An immediate celebration of the heyday of Broadway in the '30s incorporates gems from the original film like *Shuffle Off to Buffalo* and the appropriately trash and blegg looking by a large chorus line. (877 8020).  
*A Chorus Line* (Shubert): The longest-running musical ever in America

has not only supported Joseph Papp's Public Theatre for eight years but also updated the musical genre with its backstage story in which the songs are used as auditions rather than emotions. (239 6280).

*Big River* (O'Neill): Roger Miller's music renews this sedentary version of Huck Finn's adventures down the Mississippi, which walked off with many 1985 Tony awards almost by default. (248 0228).  
*The Mystery of Edwin Drood* (Imperial): Rupert Holmes's Tony-winning resurrection of the unfinished Dickens classic is an ingenious musical with music-hall tunes where the audience picks an ending. (239 6280).

*La Cage aux Folles* (Palace): With some tinsel Jerry Herman songs, Harvey Fierstein's adaptation of a French film manages, barely, to capture the feel of the sweet and hilarious original between high-kicking and candy chorus numbers. (737 3828).

*I'm Not Rappaport* (Booth): The Tony's best play of 1986 won on the strength of its word-of-mouth popularity from the two oldest on Central Park benches who bicker uproariously about life past, present and future, with a funny plot to match. (239 6280).

# Dr Kohl faces the voters

GERMAN cartoonists like to spoof their country as a sleepy simpleton, *deutsches Michel* by name, sporting a nightcap and constantly taken aback by events, especially those abroad.

One may argue about that stereotype, but it does say something about the Federal Republic and its government. The Chancellor, Dr Helmut Kohl, is less adventurous than almost all his predecessors and without their excuse for caution. That has not prevented his coalition running well ahead of the opposition in one opinion poll after another.

The coalition's successes in running the country and its economy are undeniable but, as so often, success has encouraged timidity and complacency. Last week's run into the D-Mark and the subsequent halting of the revaluation exemplify the danger.

It is doubtful whether the Social Democratic Party, the biggest opposition group, will be able to exploit these dangers on polling day, January 25. Like the British Labour Party it has done its electoral chances no service by being unable to reconcile the wish to appeal to middle-of-the-road voters with the wish to attract the anti-nuclear and environmentalist Green left. According to the opinion polls, which have had a bad spell in forecasting recent regional elections—the Social Democrats may be in for their worst showing since the 1950s.

Dr Kohl's Christian Democrats and their Bavarian sister party, Herr Franz-Josef Strauss's Christian Union, are also tempted by strenuous doubts. The progress of some right wing splinter groups in regional elections has convinced Herr Strauss, and apparently also Dr Kohl, that a bit of right wing rhetoric is useful.

**Growing economy**  
 On the positive side for the coalition, the cost of living declined last year and only a slight increase is expected in 1987. The economy is growing, though hardly at a canter. The current external balance is healthy—too healthy so far the health of others. Unemployment blots this picture. But since the effects are softened by a generous welfare system and a thriving black economy, the issue has not aroused as much electoral passion as might have been expected.

**The limits of merger control**  
 THE IMMINENT decision on whether to refer the BTR bid for Pilkington to the Monopolies Commission comes at a time when the British Government's overall review of competition policy is nearing completion. It would be a pity if the decision, which is a key part of greater consistency in merger references was set back by a decision to refer the BTR bid. It is a conglomerate merger, comparable to the BTR bid for Pilkington, which was sent to the Monopolies Commission in 1982 and found not to be against the public interest. Following the decision, large conglomerate mergers have generally avoided a reference. The shift of policy was confirmed in 1984 by Mr Norman Tebbit, then Trade and Industry Secretary, who said that references would normally take place only where the proposed merger threatened to reduce competition. There is no good reason to doubt the approach in the BTR/Pilkington case, which does not raise competition issues.

**Hazardous business**  
 The weakness of British mergers policy is that the public interest criteria under which a merger may be regarded as against the public interest are drawn far too widely. Virtually any merger above a certain size may be sent to the Monopolies Commission for reasons which the Government does not even have to explain, but which may simply reflect wrong political pressures at the time.

Since Mr Tebbit's pronouncement the record on references has been less erratic than in the past, but some questionable decisions have still been made. In any case Mr Tebbit's statement of policy had no statutory force. There is nothing to stop the present or a future government from referring mergers to the Commission on grounds that have nothing to do with competition. A Labour government would certainly do so; Labour Party spokesmen have said that they would change the burden of proof, so that the Commission would have to be persuaded that a proposed merger was positive to the public interest, instead of simply not against it.

A review of mergers policy

The coalition has continued the Orpington of its predecessors, remaining as correct as exactly cordial terms with Eastern Europe in spite of some almost inexcusable verbal outbursts by the Chancellor which have ruffled relations with Moscow.

Bonn has ridden the storm caused by the deployment of American cruise and Pershing missiles, removing one of the most serious potential obstacles to American-European co-operation within the alliance. Bonn has also swallowed its objections to at least initiating a reform of the European Common Agricultural Policy and to opening up the German market to non-EU insurers from elsewhere within the Community.

But every coin has its reverse. West Germany is, after all, the biggest economic power in Europe, with the capacity to lead. Yet the dilemma and the timing are ironic. Party following the line of the radical and increasingly popular Greens ecology party, which wants to switch off nuclear plants immediately, the SPD is campaigning on a platform of phasing out over the next decade the nuclear power stations it was instrumental in building when in power during the 1970s.

**Two uncertainties**  
 Bonn's insistence on tight monetary and fiscal policy has made it harder to avert a transatlantic trade war and has contributed to the recent currency market.

According to the polls, there are two main uncertainties about the election outcome on January 25. One concerns the performance of the Greens, who have recently been registering electoral support of over 10 per cent. It is just possible that they will be strong enough to form a coalition with the Social Democrats, though both have denied any such intention. The other concerns the balance within the present coalition. The Free Democrats, the junior partner, could fall below 5 per cent of the vote and therefore drop out of parliament altogether. Even if they do not, the Kohl and Strauss parties could just scrape over 50 per cent between them and be capable of governing alone. That would be a departure in German politics and would be a cause for apprehension both at home and abroad.

The best result would be for the existing coalition to continue, but with somewhat kinder policies. The West German political leadership has been sleep-walking too long.

"If we were to move out of nuclear energy immediately, it would mean the collapse of the German economy."—Mr Helmut Kohl, the West German Chancellor.

"Every source of energy has risks. But nuclear risks transcend the scale of humanity. This cannot be justified."—Mr Oskar Volcker, Bauft, federal Technology Minister under Chancellor Helmut Schmidt, now chairman of the Opposition Social Democratic Party (SPD) commission formulating plans to abandon atomic power.

"We Germans have a tendency to be emotionally excitable."—Mr Klaus Barthele, chairman of Kraftwerk Union (KWU), West Germany's main nuclear reactor company.

"The question is not if another accident will happen, but when. Everything else is just child's play."—Mr Oskar Volcker, Bauft, federal Technology Minister under Chancellor Helmut Schmidt, now chairman of the Opposition Social Democratic Party (SPD) commission formulating plans to abandon atomic power.

THE CLOUD left by the Chernobyl reactor accident still hovers, months after the Soviet accident, as an agonised debate in West Germany over a possible nuclear (exit) from nuclear power comes to a provisional climax in this month's general elections.

Kohl's generally pro-nuclear centre-right coalition is likely to remain in government after the January 25 poll. But for both political and economic reasons, the country's consensus in favour of expanding atomic power, which has guided its nuclear drive over the past 30 years, now lies in tatters.

Both the dilemma and the timing are ironic. Party following the line of the radical and increasingly popular Greens ecology party, which wants to switch off nuclear plants immediately, the SPD is campaigning on a platform of phasing out over the next decade the nuclear power stations it was instrumental in building when in power during the 1970s.

The SPD, labouring under a general confusion of objectives and ineffectual leadership, is heading, according to the opinion polls, for a crushing defeat.

Yet at the same time the signs are multiplying that a long slow German march away from atomic energy—in the land whose scientists first, and whose engineers first, developed nuclear fission nearly 50 years ago—already may be under way.

The result looks likely to be, in coming years, higher than planned reliance on coal for electricity generation—this from heavily-subsidised German mines and also, probably increasingly, from imports—above all, from South Africa. This would bring its own economic and environmental costs. The West German coal industry currently produces at roughly double the world market price (partly because of the latest appreciation of the D-Mark). Relying on long-term contracts with German power stations for about half its sales, it has absorbed nearly DM 200m (\$78m) in production subsidies during the last four years.

German power stations are also already passing on to customers another bill of about DM 25bn in a decade-long programme to install equipment to lower sulphur and nitrogen oxide emissions in compliance with the country's tough new clean air rules.

But under a post-Chernobyl energy policy compromise now shaping up in West Germany, higher electricity costs for industry and households will be the moment because of the German utilities' marketing monopoly.

By spurring industrial rationalisation and energy-saving measures, relatively high German energy prices over the past decade may have been a factor in driving up the country's unemployment. But, as underlined by the nation's DM 100bn 1986 trade surplus and by the profitability of its chemicals groups, dearer energy does not seem generally to have impeded its international competitiveness.

**New man for New Yorker**  
 It had to happen some time. But even so, the news that the New Yorker, one of America's most famous and idiosyncratic weekly magazines, has a new editor has come as a shock to many of its admirers. It has been something of a shock even to some of its critics who argue that the magazine has failed to move with the times.

Robert Gottlieb, aged 55, president and editor-in-chief of Alfred Knopf, part of the Newhouse family's publishing empire, has been named as the third editor in the history of the 62-year-old magazine, which used to be the playground of literary figures such as Dorothy Parker, E. L. Menckens, and James Thurber.

The first editor was the incomparable Harold Ross who had a genius for picking talented writers even if he did not always understand what they were writing about.

Gottlieb will take over next March on the retirement of William Shawn, aged 79, who has edited the magazine for the past 35 years, and is said to have read every line in every story printed.

Each census-taker is paid more than DM 300 for every 50-70 households covered, and Ministry officials say there is no more money in the kitty to pay for escorts. The state says it can not afford to pay for them, either. Bonn officials suggest that if the women want escorts, they should invite their husbands or boyfriends to accompany them on their rounds.

the price to pay for calming environmentally-sensitive public opinion.

West German companies in energy-intensive sectors like chemicals and metallurgy already complain bitterly at domestic electricity costs which are 30 to 40 per cent higher than in heavily nuclear-orientated France.

The big chemical companies have already talked to Electrich de France, the French state utility, about buying directly cheap surplus French nuclear-generated electricity—although the way is barred for

There is no doubting the importance of the issues involved in the Ausstieg controversy—nor that feelings are running high. During the eight months since Chernobyl, West Germans have manifested their nuclear distrust in ways ranging from protesting over bequeathed levels in sandpits to fighting pitched battles with riot police at nuclear sites.

At stake is the future of the country's 21 completed nuclear power stations and four plants under construction (including the fast breeder prototype at Kalkar on the Rhine, built at a

country with a bill of DM 200bn over six or seven years in the form of wasted investment and higher electricity costs.

While the chemical industry says that 150,000 jobs in energy-intensive sectors and in the nuclear field could be put at risk, Ausstieg supporters argue that a switch away from nuclear energy would actually boost employment.

The debate also will decide whether West Germany will give up its long-running bid to catch up France and Britain by developing the advanced (and costly) technology of repro-

cessing spent nuclear fuel. Probably the most difficult single nuclear decision of the next legislative period will be whether to go ahead with the atomic industry's much-touted DM 10bn project to build a reprocessing plant in Wackersdorf in eastern Bavaria.

The West German electorate, meanwhile, after months of bombardment with pro- and anti-nuclear propaganda, is only too well aware that there are no easy solutions.

Mr Walter Wallmann, the Environment and Reactor Safety

plans to print the Bond features on mugs, place-mats and other souvenir items. "And if he wins the America's Cup, we plan to go international with the idea," she says.

### Pasta press

Appetising news from the publishing world. Yet another "foodie" magazine is on the way.

Pizza and Pasta is to be the official magazine of the newly-formed Pizza and Pasta Association (PAPA) for short. It will replace a previous publication which had a gourmet circulation of 11,000 in Britain alone.

In case you have any doubts, pizza and pasta make up a very serious combination in the food industry.

Britons now eat more than 17m tonnes of pizza in their own homes every year, and last year they bought more than £100m worth of pasta.

My efforts to bring you the figure of how many miles of assorted pasta that represents have failed to elicit a reliable response.

But publisher Kevin Murray has no doubts that pizza and pasta will provide a satisfying editorial diet.

### Hard to bear

My recent story about bear hunting in Czechoslovakia reminded a reader of a similar tale about polar bears.

The production manager and the marketing manager of a company decided to spend a weekend hunting polar bears. As soon as their helicopter had dropped them off, the marketing manager took his binoculars and went off to scout around.

Meanwhile, the production manager pitched their tent, set up their camp beds, cleaned the guns, and was just preparing supper when the marketing manager rushed back into the camp with two large polar bears snapping at his heels.

"You take care of these two," he shouted, "and I'll go and get some more."

## The world's most exclusive cutlery

For generations, the name Arthur Price of England has become synonymous with the world's finest Sheffield-made cutlery. Cutlery that graces some of Britain's most famous tables and will continue to do so for many generations to come. Along with our time-honoured traditional patterns, Arthur Price of England can boast the largest range of exclusive designs. Beautiful and unique designs that have become classics in their own right. To introduce you to this exclusive range we are offering, in the pattern of your choice, two 50 year quality silver plated 7 piece place settings that are usually sold in our stockists at £159 for just £125. The patterns that are in 18/8 stainless steel are now only £65 as against £95 for the full 14 pieces. We must however limit this offer to one order per applicant, so to sample the world's most exclusive cutlery, simply choose your pattern, fill in the coupon and send with your remittance to Arthur Price & Co. Ltd.

**Arthur Price of England**  
 Britannia Way, Lichfield, Staffs.

If you wish to receive this exclusive offer, please cut out this coupon and send it to us with your remittance. ## China after the protests

## A hundred flowers wilt in Peking's winter chill

By Colina MacDougall

THE STRENGTH of Peking's hardline backlash after a month of non-violent student demonstrations calling for democracy must raise some doubt as to whether supreme leader Deng Xiaoping can continue to walk the tightrope of economic reform.

This tightrope is stretched precariously between the conflicting demands of party conservatives and the more liberal liberalisation in China, have intellectuals on whose talents the reform ultimately depends. Since the conservatives have turned out to exert surprising leverage.

While reform policies, especially the "open door" to foreign trade and investment, are most unlikely to be dismantled, some indirect damage seems inevitable. Foreigners will see party reversion to autocratic ways as symptomatic of less than total commitment to modernisation. As the Chinese themselves have said repeatedly, some political reform is essential to allow the economic reform to work.

With the criticism and dismissal of senior officials and academics for advocating a measure of political and intellectual freedom, and the barrage of Press attacks on "bourgeois liberalism," prospects for more flexibility have flown out of the window, at least for now.

Although predictions in the Chinese context are always dangerous, the reported illness of the Party General Secretary Hu Yaobang, a key supporter of Deng's liberalisation policy, is a genuine, not political, setback. After anxious weeks of discussion of the student protest within the top leadership, it would be no surprise if Hu, in his misadventure, and in the grip of the Peking winter, had succumbed to a minor ailment. If he were indeed to be relegated because of his support for China's more liberal policies, the chances for Deng and the reform would look increasingly grim.

The effects of the clampdown are likely to be subtle and will probably emerge over the next few months, not weeks. Intellectuals and industrial managers, who had begun to believe Peking when it told them to launch new ideas or criticism, are likely to be crushed back into silence.

The definitive blast against student demonstrations in last Tuesday's edition of the People's Daily was a watershed. It was the first time since the end of the Cultural Revolution that the Party's mouthpiece had decided to call a halt.

Deng himself, caught by hardliners demanding an end to the marches and the spreading of disorder, was responsible for the clampdown. The People's Daily editorial

line was hammered out at a high-level party meeting at which Deng himself reportedly said: "Ideology must be 'straightened out'."

The communist Hong Kong paper Wen Wei Po reported last week. In the clampdown, Wang Meng, Minister of Culture and Propaganda, has been criticised. Zhu Rongji, head of the party's Propaganda Department, is reportedly in danger of losing his job. The information director of that department, Zhang Peizhang, has been replaced.

Professor Fang Liang, a distinguished astrophysicist, has been sacked as vice-president of the Anhui Science and Technology University for his alleged role in encouraging students in Hefei, provincial capital of Anhui, to demonstrate. The president of the college has also been dismissed.

Until just a few weeks ago, the official press was speaking forcefully for democracy. The People's Daily, virulent mouthpiece of the Peking mayor and officials, accused the demonstrators, in the dramatic terms of an old Cultural Revolution charge: "Waving the red flag to oppose the red flag."

These events follow a party meeting last September which ended in a communiqué intended as a guide for a Chinese-style socialist society. This communiqué was larded with promises, cobbling together ideas on material reform and socialist discipline without much consistency.

Deng Xiaoping now has several important hurdles to surmount if he is to keep his

vision of a modernised China on the road. The first will be to convince academics, especially scientists and economists, that their efforts essentially depend, that they must continue speculative research work and discussion.

Another is the 13th party congress next autumn, when some party leaders should retire to make room for younger blood. Deng and a number of leading conservatives are in their eighties, while Hu and some other leaders are in their seventies. In the jockeying for power during the run-up to the congress, the current clampdown and its effects may be crucial.

China still has to complete elections for deputies to the Seventh National People's Congress, due to supersede the present one in 1988. Since these are likely to be spread over most of the year, they could provide a constant source of friction, especially in university cities.

Inevitably ideology will be more prominent in the coming months. The new year is encapsulated in the "four principles of socialism," defined by Deng several years ago and echoed everywhere since the student disturbances. These are adherence to the Communist Party, to Marxism-Leninism and Mao thought, to the people's democratic dictatorship and to the socialist road.

These have been pushed out of the limelight in recent years by discussion of reform. While all China's leaders probably now agree on the need to stress party leadership, there may be some dispute over how far to emphasise Marxist-Leninism and the socialist road. China, as the official press now more than ever maintains, is pressing on with economic reforms. Some of these are distinctly un-socialist. A big showing in the press now for conventional Marxism would not be a good sign for the reform programme.

Shanghai students take to the streets to demand democracy.

A big showing in the press now for conventional Marxism would not be a good sign for the reform programme.

The economy may strike trouble, too. Over-rapid industrial growth, which in 1985 triggered a huge import deficit plus shortages and inflation, again looks like a threat. In November the industrial growth rate jumped to around 15 per cent compared with a far lower figure in same month the previous year, from the much more modest rate enforced in late 1985 and early 1986. This trend seems likely to continue, bringing with it a renewed demand for imports.

On top of that, Peking plans price reforms in industry. Public uneasiness at this and the recent rises in the cost of living are essentially a worse threat than students' complaints, as the leadership is well aware. But if outbreaks of political and economic tensions hit the country simultaneously, the results could be unpredictable.

Before any British minister again tells British industry that it does not know how much R and D is good for its health,

## Research and development in Britain

## More may not always mean better results

By David Sawers

THE CHANCELLOR of the Exchequer is not alone in believing that short-termism is the bane of British business, despite his belief in the effectiveness of the market. It is indeed the modern consensus that British industry's performance lags because it puts too little money into long-term activities like research and development.

Not so long ago, the common view was that British industry was shying away from the modern consensus that British industry's performance lags because it puts too little money into long-term activities like research and development.

Investment can more easily be correlated with growth in the economy as a whole, but the correlation begins to break down if investment in manufacturing is related to the growth of output in manufacturing. Further investigation reveals that the growth of output in British industry has been lower in relation to the level of investment than in most other countries, and the same low productivity seems to be true of R and D as well.

This crude evidence might suggest that what is researched and developed and what is used are more relevant issues than how much is done, and it helps explain why some industrial research directors believe that British industry does too much research, because many of its fruits are left unused.

Telling industry to spend more on R and D in these circumstances is unlikely to influence behaviour. If politicians believe that industrial performance can be improved by exhortation, they should first inform themselves about the affairs of industry and try to understand why industrialists do what they do. They should appreciate that if their advice is to be effective, it has to be applied to the constraints of individual companies.

Before any British minister again tells British industry that it does not know how much R and D is good for its health,

let him try a small experiment. The Civil Service includes economists, engineers and scientists who study the affairs of industry, and some of them share the politicians' belief that British industry does too little R and D. He should select a group of these officials and commission them to seek out companies which are prepared to be advised on what extra research they should be doing. They should then be given a free run and six months inside each company to propose additional R and D expenditure that would improve the commercial prospects of the company.

The first point the officials would have to decide would be whether the company would be better to increase its expenditure on long-term research or on the development of new products or processes; and they would realise that the question could be answered only by identifying specific projects of each type that the company could undertake, and comparing the benefits which they might produce. Returns could not be compared in the way that economists would like, because they cannot be forecast accurately enough, so the officials' decisions would have to be based on judgment.

Establishing the potential of each project would soon reveal how much the company's staff knew about the relevant technologies and markets. That would help the officials judge what sort of work the company was best equipped to do, and whether technological or marketing knowledge could limit its ability to do more R and D. It would also show how much the company knew about the activities and abilities of its competitors, whose responses to its new products would do much to determine their profitability.

The company would be unlikely to have unemployed engineers and scientists on its books. Any increase in its R and D would therefore require an increase in staff or a reduction in other activities — which might be technical work other than R and D. So the officials would also have to judge whether extra R and D projects were more valuable than these activities, which might represent improvements to existing products or

processes. They might find that transferring staff from these activities to R and D would reduce the company's ability to exploit new products and processes, and that to do so effectively would require a larger technical staff.

The officials would now realise that the ability to recruit suitable engineers and scientists was one of the crucial determinants of the case for doing additional R and D in the company, so that they would have to study the employment market to find out if suitable people were available and at what price. If recruitment was going to lead to a general rise in salaries, extra R and D would become less attractive.

They should also be able to judge the ability of the company's managers to handle the introduction of new products or processes, whether it be their manufacture or sale. If the officials conclude that the managers are up to this task, and that the other conditions are favourable, they will be ready for the final act, the presentation of the case for extra R and D to the board. This presentation will give them the chance to find out whether the directors know enough about the technology and the market to establish or to judge a strategy for the company.

After this experience, the officials should return to their ministers with better ideas of the constraints behaviour of British companies. They may conclude that the present managers or directors cannot handle a more ambitious R and D programme, and all the other changes in the company's operations which successful exploitation would require. They may feel that the early retirement of the board or a take-over by a foreign concern gives the best chance of improved performance.

Ministers may then wonder if they are concentrating on the right problems: the supply of suitably-educated people to improve the quality of managers and the promotion of competition so that inadequate boards cannot survive may seem the most useful roles for government. The Chancellor may wonder why he is subsidising industrial R and D.

The author is a freelance writer and former civil servant.

## Branching out

From Dr J. Toporowski

Sir, I found Hugo Dixon's perceptive report on trends in branch banking in the UK (January 5) very interesting and informative. In expounding the branch strategies of the main clearing banks however, he omitted to deal with two aspects of them which seem to me quite fundamental to the success or failure of those strategies.

First of all there is the public response to the new "sales" oriented banking ethos. Banking is a business in which conservative practices are widely associated with financial soundness (at least on this side of the Atlantic Ocean). Moreover, hitherto the public has expected its bankers to be persons of integrity whose advice is supposed to be objective and guided by the best interests of the customer, as the Securities and Investments Board has rightly recognised in its ruling separating agency from principal business in bank branches. For these two reasons, the promotion of banking as if indeed "selling hamburgers" can only undermine public confidence in the banking system that has up to now, and with only minor exceptions, avoided the kind of scandals that are emerging in other parts of the financial system. Moreover, insofar as the public is naive and willingly responds to the blandishments of loan-salesmen, will not more competitive selling leading to an increase in bad debts and personal distress and defaults among customers?

It is not clear from the article how the new strategy of turning bank branches into sales agencies is compatible with the mechanisation of routine banking services. If the latter are to be increasingly carried out by automated teller machines in the "service" of future bank branches, as is usually proposed, what will attract customers further into the branch office to be confronted by enthusiastic sales staff? If this approach succeeds (and it has not succeeded so far in the case of finance houses that have tried it), it will surely be the first time that a retail organisation has sold its wares in the first instance on the basis of the superficial attractiveness of that staff.

The main UK clearing banks are indeed over-branching — one of them by as much as a third of its total network. This however, is as much due to the range of services that those branches perform as to their place in the structure of banking administration. It is in these two areas, rather than in harder

## Letters to the Editor

and ultimately self-defeating marketing, that the solution to this problem is to be found. (Dr J. Toporowski, 28 Warrington Crescent, W9.)

## Licences of right for medicines

From the Director, Association of British Pharmaceutical Industry

Sir, — The claims by the group Pharmaceutical Licences Under Siege (January 5) demand refutation on two major points. The report led to the claim that a House of Lords Bill to abolish licences of right for medicines could "cost the National Health Service up to £200m by the early 1990s." This is a ludicrously exaggerated figure. The Department of Health has accepted that the cost to the NHS would be minimal.

It was totally misleading to give the impression that the group represents "the generic drug makers" in this country. This association represents the manufacturers of some 90 per cent of the generic medicines supplied to the NHS and members are unanimous in their support for the move to abolish licences of right. As far as we can ascertain, none of them had even heard of the organisation calling itself PLUS. To the best of our knowledge PLUS represents just two or three companies with a limited UK significance but which have extensive international links. Licences of right are abolished there would be significant unemployment among personnel working for generic manufacturers in this country. This is untrue so far as member companies are concerned and we reiterate that they represent the overwhelming volume both of sales of generic medicines to the NHS and exports of generic medicines from the UK. Furthermore, a recently published NEDO report "A new focus on pharmaceuticals" prepared by the representatives of government, industry and the trade unions — made the following recommendation: "Government should move speedily to abolish the 'licences of right' provision in the 1977 Patents Act in order to bring the level of protection extended in the UK up to that enjoyed in other countries."

We would recommend this document to any readers who might wish to have a balanced view of the problems facing one

of Britain's most successful industries, which provides employment for over 80,000 people directly and contributes to the UK economy a positive balance of trade of over £850m a year. (Dr J. P. Griffin, 12 Whitehall, SW1.)

## Insider dealing

From Mr D. Barnes

Sir, — Professor Myddelton (January 5) uses portfolio theory to support his argument that honest investors are not harmed by insider dealing. This assumes, in addition to there being no taxes or transaction costs, that information is available instantly and at no cost to all participants in the market, each of whom has equal and instantaneous powers of analysis and interpretation. Under such conditions insider dealing is by definition impossible. The theory which shows the honest investor to be unharmed by insider dealing also frees him of the burdens of stamp duty and commission, and allows him to manage his portfolio with the skill of a professional. Lucky Sid. (Damian Barnes, 30 Crickton Avenue, Wokingham, Surrey.)

## Reform of the rates

From Dr D. Pickard

Sir, — Following your lead article of December 23 there have been several letters referring to the proposals to finance local government by a "community charge." While the present system has disadvantages, it should not be replaced by one which has even more. Modification or true reform of the present system deserves more thorough appraisal before it is replaced by a regressive poll tax, or by a local income tax, however it is disguised. As Dr Smith (January 5) pointed out, more frequent valuations would make the tax on property much fairer, and if we accepted his suggestion that land value rating should be adopted, frequent revaluation could be very simply done. Mr Savers (January 7) favours "self assessment" for his "residential charge," for could also be used for land value rating. Let the land owner make his/her own assessment of the value of the land occupied, with the taxing authority reserving the right to

purchase at the owner's valuation.

Those in favour of a local income tax, or its variations, should be aware that for "income tax," they should read "employment tax." As any employer knows, it is the employer not the employee who has the obligation to hand over the "income tax" to the Inland Revenue, and this is not always related to the ability of the employer to pay — ask all those football clubs which face bankruptcy charges.

Land value rating is the fairest and simplest means of raising money for the finance of local government. It would also stimulate enterprise and development, by encouraging those who own derelict and disused land of high value to do something with it. (Dr D. W. Pickard, 105 End Farm, Denton, Hales, Yorks.)

## Cigarette company power

From the Financial Controller, Hancock's

Sir, — Christopher Parkes (December 23) made reference to the refusal of the tobacco industry to recognise the buying power of the independent cash-and-carry sector and in the same article stated that "wholesalers' margins will be maintained."

While the reference is indisputably correct, the statement concerning margins is misleading. Competition in the tobacco market is so intense that most of the leading brands have to be sold at cost if they are to be sold at all. Profitability is only possible on the less popular lines and overall it is impossible to achieve a gross margin of even 1 per cent. It is hardly surprising therefore that we have introduced our own brand Kingsway cigarettes, manufactured by Manchester Tobacco, selling at considerably lower prices. It is interesting to note that in greater quantities than some of the brands mentioned. If the tobacco industry wishes to maintain its position in the market our buying power must be recognised and margins created.

One point not mentioned is the industry's practice of demanding directors' personal guarantees which adds insult to injury, makes a mockery of limited liability and exposes directors to risks for which there are no rewards.

If only it were possible to trade without selling tobacco. Sadly we must continue to bear the cost of security, insurance, handling and financing while exposing our staff and property to the high risks of theft and our directors to penury for no reward.

P. D. Parkinson, Belton Road West, Loughborough, Leics

Where our Unit Trust put the competition.

Legal & General

In 1986 Legal & General's Far Eastern Trust outshone all other Unit Trusts, more than doubling in value.

## JOBS

## A hunt that grows increasingly competitive

BY MICHAEL DIXON

READERS wishing to test their knowledge of contemporary British life might care to have a go at the following question. Which four kinds of warm-blooded creatures are legitimately hunted throughout Britain continuously between now and April?

The answer is foxes, hares, the bucks of fallow deer, and graduates.

Of the four, there can be no doubt that it is the graduates who attract the keenest and most expensive pursuit. For during the next weeks the groves of academe will be teeming with the representatives of employing organisations vying with one another for young recruits.

Moreover the competition among the recruiters seems set to be greater than ever before, according to a survey of 122 employers just published by PA Personnel Services. Rivalry was fierce enough last year when those organisations below that overall figure in construction with an average of 39 degree-winners apiece. Their target bag for the new season works out at 44.

The likely effect on the average salaries the employers in different industries expect to have to pay this year is shown by the first two columns of figures in the above table, which is drawn from PA's report. (Anyone wanting a copy should contact Sheila Smith at

Sector of industry	Average start pay for 1987		Average start pay 1986		Typical progress of acceptable and above-average staff		After five years		After ten years	
	Average start pay for 1987	Average start pay 1986	After three years	After five years	Acceptable average	Above-average	Acceptable average	Above-average	Acceptable average	Above-average
Oil and gas	11,101	10,344	12,333	13,666	15,000	15,333	17,666	19,666	20,000	20,333
Computers and electronics	10,944	8,193	11,181	12,500	14,454	15,400	16,272	19,650	18,400	24,600
Technical and scientific services	8,113	8,488	12,600	13,800	14,800	15,100	16,400	19,600	18,400	24,600

Construction	7,794	7,289	9,777	10,111	11,777	12,888	14,777	16,666	14,777	16,666
Others	8,500	7,998	12,000	13,000	15,000	15,850	18,000	19,250	18,000	19,250
Overall	8,553	7,970	10,874	12,088	13,182	15,639	16,808	21,339	16,808	21,339

60a, Knightsbridge, London SW1X 7LE; telephone 01-235 6080, telex 27874).

Taking all the sectors of industry together, the forecast rise over 1986 is 7.2 per cent. The only sector markedly below that overall figure is construction with an average of 4.7. Two are well above the norm. One is professional services with an expected rise of 11.1 per cent. The other is computers and electronics with a bumper 32.4.

The table's remaining six columns refer to degree-winners engaged by the 122 employers in the previous year, and of course take no account of the latest starting pay figures. Even so

they give some indication of the later average salaries in prospect for two different types of graduate recruit.

The first is the worker whose performance is judged no better than acceptable. The second is valued as above-average. In each case we have the typical salary respectively at the end of three years, five years and 10 years service.

Overall the above-average worker's advantage over the acceptable counterpart after a decade with the organisation is 27 per cent. In five sectors the differential for good performance is between three tenths and just over a third: transport

and communications at 30 per cent; banking, insurance and so on at 30.6; retailing and distribution at 32.8; food, drink and tobacco at 33; and technical and scientific services at 33.7. Few if any of the organisations, however, expect to keep very many of their graduate recruits for as long as a decade. Even the government and public services sector reckons to lose nearly a quarter of them by the end of four years. Over the same period the retail and distribution industry budgets to shed seven in every 10. The others range in between, the all-sector loss rate being 37 per cent.

In the circumstances some one unfamiliar with British recruitment customs might be puzzled to see that, when jobs are scarce for the majority of young people, organisations are vying with one another to recruit a graduate minority to the extent of raising starting pay ahead of inflation. If so, the puzzle would probably be deepened by a further factor. Employers are in some instances looking for winners of degrees in specific topics. The highest such category noted by the PA survey is engineers and technologists who make up a quarter of the total sought. But in a still bigger proportion of

the jobs on offer—38 per cent—the subject studied by the graduate does not matter. In which case, a stranger might wonder, why is the organisation insisting that the recruits must have a degree at all?

The main explanation may lie in the fact that, even where employers require some particular subject knowledge, they generally count it less important than other attributes usually described by the nebulous phrase "personal qualities". Examples are said to be the ability to work in teams and otherwise to form productive relationships with people. And it seems that organisations believe such qualities are far more likely to be found in people who have gained a degree than in those who ended their formal education on a lower perch of the academic pecking order.

To some extent that belief is probably right. Britain's education system notoriously concentrates on the minority of children with academic aptitudes at the expense of failing to develop the other kinds of talent possessed by the majority whose intelligences and interests run in other directions. Indeed it is not unfair to say that it is a system which, for every person it qualifies for anything, disqualifies about two from everything—and it only costs £16m a year.

## Searching for the Top Eurobond Salesmen

Being one of the world's largest and most powerful institutions has its advantages. Our client can attract the best Eurobond salesmen in the business. Their leading presence in the international markets can assure you of dramatic career prospects. This role, selling fixed income products to major UK institutions, demands exceptional dynamism, sales skills and experience with a top player. The rewards for your professionalism will not disappoint.

Please contact Sally Poppleton on 01-404 5751 for a confidential discussion or write to them at 39-41 Parker Street, London WC2B 5LH.

INTERNATIONAL RECRUITMENT CONSULTANTS

## EUROBOND SALES

£Negotiable

As a result of their increased market penetration, we have been retained by a major international bank to recruit two fixed income sales executives for the UK & Continental Europe. Applicants must demonstrate an excellent track record in sales, possibly gained with a similar organisation. Fluency in one or more European languages would also be a considerable asset. A highly attractive remuneration package will be offered to the successful applicant, including full banking benefits.

## FIXED-INCOME RESEARCH

c.£30,000 + Bonus

Our client, one of the leading investment banks, is developing its fixed-income research team, in tandem with the successful expansion of its bond distribution capacity.

Interested applicants should have had at least eighteen months exposure to international capital markets products in a major merchant bank, and are likely to have gained a degree in an economics related discipline. Equity analysis experience in broadening the scope of their experience could also be accommodated. This represents an excellent opportunity with a premier organisation, in a rapidly developing field.

For a confidential career discussion contact: Hilary Douglas, Stuart Clifford or Christopher Lawless.

## Young Bankers

with Flair and Drive

Attractive Package c. £22,000

Sussex

Our client which is a subsidiary Company of a well known Banking Group has over the last three years experienced a dramatic growth in business. The Company has established a reputation for innovation, achievement and is committed to sustaining profitable growth through expansion of current market share, development of new products/services and diversification.

To underpin this growth they are seeking graduate bankers with lending experience and knowledge of product development, marketing or planning. Reporting to a Senior Executive, you will be provided with the opportunity to make a significant contribution to the Company's success. The Company's growth will ensure that achievement will be recognised by a progressive and rewarding career.

Ideally in your late twenties or early thirties you will have a good degree and be a qualified banker. You will have at least five years' banking experience, be able to demonstrate significant achievements already in your career and have the potential to assume further responsibilities. The position requires a creative and incisive approach to problem solving together with shrewd business acumen.

In addition to an excellent salary you will receive a first class fringe benefit package including subsidised mortgage, and non-contributory pension scheme.

Interested applicants should write to Fiona Collins at Michael Page City, 39-41 Parker Street, London WC2B 5LH. Please indicate the names of any companies to whom your details should not be forwarded.

## DEALING

### CORPORATE DEALER

£25-£35,000 + Bonus

Our client is amongst the world's largest banks, with a major and expanding dealing presence in all major markets. Corporate relations in the Treasury area are well established, involving both traditional currency requirements and more sophisticated financial instruments. The bank seeks an additional enthusiastic young Corporate Dealer, who should have two to four years' experience and be eager to expand into a wider market. This is an outstanding opportunity to join one of the City's most powerful trading rooms.

Contact: Anita Harris

### FORWARD DEALER

c.£25,000

This is a most interesting 'development' role with a bank which is rapidly becoming established in London. As such, it will suit an individual who prefers the flexibility and variety of the smaller dealing room, combined with the opportunity to develop a sound banking name in the London market. The overseas commitment is upwards of two years' experience in actively trading major forward currencies, combined with the versatility to contribute in other markets where necessary.

Contact: Jonathan Holmes

### GRADUATE

FX DEALER

to £35,000 + Bonus

This is an outstanding opportunity for an ambitious, aggressive young Dealer to join a small, highly professional bank within one of London's largest trading rooms. The successful candidate will be a university graduate with a degree in a relevant subject, and will be expected to contribute to the bank's trading and research activities, and to develop a sound banking name in the London market. The overseas commitment is upwards of two years' experience in actively trading major forward currencies, combined with the versatility to contribute in other markets where necessary.

Contact: Joanna Davies

### DEPOSITS DEALER

to £25,000

We are at present seeking with the expansion of one of the City's largest dealing rooms. Our client has a well established, professional approach to corporate banking, and now seeks an additional talented young Dealer to assist in further developing the bank's traditional money market activities. The ideal candidate will have upwards of two years' experience in actively trading major forward currencies, combined with the versatility to contribute in other markets where necessary.

Contact: Jonathan Holmes

## INVESTMENT BANKING

### ECP SALES

Salary

highly negotiable

Our client is a major bank in the City, trading and dealing in all major markets. The bank is seeking a person to assist in the development of a new system of foreign exchange trading. The successful candidate will be responsible for the design and implementation of the system, and will be required to liaise with the bank's management and staff.

Contact: Jonathan Holmes

### ANALYST/TRADER

Attractive salary +

substantial bonus

An entrepreneurial, flexible and highly motivated individual is sought for a rapidly expanding investment bank. Working in a small, close-knit team of traders and analysts, the individual will be expected to seek out, research and evaluate investment opportunities in the UK and overseas markets. Candidates will be aged 25-35, working either as an Analyst or as a Trader, and will be required to contribute to the bank's trading and research activities, and to develop a sound banking name in the London market. The overseas commitment is upwards of two years' experience in actively trading major forward currencies, combined with the versatility to contribute in other markets where necessary.

Contact: Jonathan Holmes

### EQUITY SALES

Europe, US, Japan

£35,000 +

Two of the City's leading stockbroking companies, now part of a well established bank, are seeking ambitious young investment professionals with background in equity sales. The successful candidate will be responsible for the design and implementation of the system, and will be required to liaise with the bank's management and staff.

Contact: Joanna Davies

### CAPITAL MARKETS/

EURO-EQUITIES

to £40,000

Our client is a top-ranking international securities house. A most challenging opportunity within a highly professional team, the successful candidate will be responsible for the design and implementation of the system, and will be required to liaise with the bank's management and staff.

## U.K. Stockbroker/Merchant Bank Private Client Executives

The Private Clients Stockbroking operation of our Client is expanding rapidly and as a consequence, they require additional talented executives capable of handling both discretionary and non-discretionary accounts. Our Client's recent merger with a highly regarded Merchant Bank will widen people's career prospects within a stable background.

For these outstanding opportunities in this soundly backed and progressive member firm recognised for its traditional strength in the Private Client area, they are looking for people who combine up-to-date knowledge of the various markets, sectors and investment vehicles; plus the experience and confidence needed to handle Clients in an efficient manner.

The successful candidates will probably have been working for some 8+ years (there are also more junior vacancies) in the Private Client side of a stockbroking or investment management company and should

combine investment skills with the ability to communicate with Clients both verbally and in writing.

At both senior and more junior levels, our Client hopes to attract people who can see the long-term importance and career opportunities in the Private Client discipline and will offer a competitive salary plus bonus. No age limits have been set and whilst some personal business might be an advantage, this is certainly not essential.

Please apply initially quoting ref. 785 to Keith Fisher at Overton Shirley & Barry, Prince Rupert House, 64 Queen Street, London EC4R 1AD. Tel (01) 248 0355. No details will be released to our Client without the candidate's permission.

## Assistant Director Retail Broking

Bank Enquiry Department - Administrator  
Age 28-35 c. £35,000 + car + benefits

Our client, the securities arm of a major investment banking group, will shortly appoint an Assistant Director who will be responsible for the administration of their Bank Enquiry Department. His/her main responsibilities will include:

- \* Actively managing a support team.
- \* Day-to-day involvement with intricate matters of administration, including implementation of investment policy.
- \* Liaising on a close basis with the management of an expanding Private Client Department.

The successful candidate is likely to have had at least five years' experience with a London stockbroking firm which has specialised in branch banking business. The role calls for proven leadership qualities as well as a track record as a good administrator in this particular area. The appointment offers a future in a dynamic environment and a competitive salary will be negotiated which will include a number of investment banking fringe benefits.

Please apply to: J. R. V. Courts, Career Plan Ltd., Chichester House, Chichester Rents, Chancery Lane, London, WC2A 1EG, tel: 01-242 5775.

## Deputy Treasurer

To £30,000 plus Car  
City of London or Gloucester

This International Insurance group has for many years provided a treasury management service in respect of its own and client insurance company funds. The success of this function has led to a decision to incorporate a subsidiary company offering a comprehensive treasury management facility both to client companies currently under management and to external companies for whom no insurance services are currently provided. With a planned £300m of funds under management by the year end, the group is urgently looking to recruit an exceptional deputy to the Treasurer to complement its young and progressive treasury team.

The role of the Deputy Treasurer will be wide ranging and will demand participation in short and longer term investment decisions, the development of investment

strategies - taking account of current and projected economic trends, the development of new products to meet changing client requirements, and assistance in the further development of the company's new computerised systems. The Deputy Treasurer will also become actively involved in the marketing of the company's services.

Ideally candidates will have gained a sound background in treasury management including foreign exchange exposure, liability or asset management experience and fund management, and will possess significant experience of general dealing with the major banks. Great emphasis will be placed on candidates' personal qualities and the person appointed will be expected to possess good interpersonal and negotiating skills with the confidence

and maturity to justify his or her decisions.

The position carries with it an excellent salary and benefits package. More important is the opportunity for self and career development with a highly successful company now seeking to extend the range and scope of the services that it provides.

Interested candidates, male or female, should write enclosing full career and salary details, quoting reference MCS/8701 to Gary Birney, Executive Selection Division

## Align Your Career with a Leader

c.£25k with Benefits

*Sowerby's Selection*

The City-based arm of an enterprising international trust bank which has enjoyed rapid expansion in recent years in its domestic territory, my client is now proceeding to implement the next stage in its planned parallel growth in the U.K.

Backed by extensive resources and a diverse and impressive portfolio of services worldwide, the bank has in the last year recognised its international operations relating to money, foreign exchange and securities in order especially to reinforce and expand its activities in capital markets.

As a result there is now a requirement for a talented and ambitious SECURITIES INVESTMENT OFFICER to sustain the development of this programme.

Probably a finance or economics graduate in your mid-twenties and offering some two years' relevant experience in the capital markets arena, you should be capable of managing a significant FRN exposure and demonstrate a sure touch in calculating and forecasting movements.

While the overall coverage will also extend to straight bonds, especially in U.S. dollars, and gilts, the bank's increasing involvement in European markets, notably Germany, will render specific experience in this latter area particularly relevant. Personal qualities sought include decisiveness and critical powers of judgement, and you will be capable of contributing from day one in a highly motivated team environment.

The bank is strongly committed to its declared policy of expending its London operation, and this is an exceptionally promising opportunity for career development, offering ample scope for initiative.

Interested? Then please ring or preferably write, in total confidence, to me, Trevor G. Sowerby's (Selection) Ltd., Personnel Consultants, 500 Cheapside House, 350 Regent Street, London, W1R 5EA. Tel: 01-438 8288.

## Manager - Corporate Finance

Westpac Banking Corporation is the largest banking group in Australia with substantial wholesale banking operations in Europe. From its divisional headquarters in London, a wide range of capital market, project and advisory financial services are transacted.

The Bank is now seeking another experienced executive to join its Corporate Finance unit located within the Bank's International Capital Markets Group. The unit's principal activities are merger and acquisition work, leveraged and management buyouts and specialised financings.

The successful applicant will be in his/her early 30s and have a number of years of experience in financial services, industry or the accounting profession. An essential requirement is a sound knowledge gained through working experience of European market conditions, acquisition law and accounting practice. As some of the work will be on behalf of Australian based clients, a knowledge of the Australian market would be desirable although not essential. Appropriate academic and professional qualifications are necessary.

An attractive salary and benefits package is offered and those interested are invited to write in confidence with full curriculum vitae to:

Mt Peter Roberts, Personnel Manager, Westpac Banking Corporation, Walbrook House, 23 Walbrook, London EC4N 8LD.

**Westpac**  
Australia's world bank.

## PLANT MANAGER - CONTINUOUS STATIONERY

As the major manufacturer in this country and part of the largest group worldwide in the manufacture of business forms, we require the services of a highly professional Plant Manager of proven competence within the industry.

The successful applicant will be qualified to degree standard preferably in Engineering, and will have had not less than three years experience of a senior management post in business forms manufacture. He/she will need also to be familiar with and have had some experience of advanced business form construction, and the latest technology in use in preparation, print and finishing stages. This will include electronic imaging.

A generous benefit package will include a non-contributory pension scheme, company car and medical/life cover.

Applicants are asked in the first place to write, enclosing CV, to:

**MOORE**

**MOORE PARAGON**

Personnel Director,  
Moore Paragon U.K. Limited  
Hewitt House, 75-79 Southwark Street,

HONG KONG

## CORPORATE DEALER

On behalf of our client, a major UK investment bank, we seek an additional Corporate Dealer for their treasury operation.

Candidates are likely to be aged between 23 and 30, a graduate, and have a background of at least two years in a treasury operation in a major bank or corporate environment. They should be knowledgeable in the areas of sterling and currency deposits, Certificates of Deposit, Eligible Bills, and foreign exchange. Experience in other areas such as Commercial Paper, FRA's and short term interest rate swaps would be a distinct advantage. Ability to work as a member of a small team with the willingness to be flexible and to explore new investment products as they arise is vital.

The proposed remuneration package will include a bonus, mortgage subsidy and other generous banking benefits. The package will not be a limiting factor for the ideal candidate.

For further details ring, or send your cv to Karyn Rutherford.

## Brown, Shipley & Co. Limited

# Mergers and Acquisitions Manager

As a long established Accepting House merchant bank, Brown Shipley have developed and diversified and are a respected market force within the City. As part of its corporate finance activities, their Mergers and Acquisitions division is acknowledged by the Board as a major growth area, particularly in an international context.

To join this growing division, they now require a Mergers and Acquisitions Manager to be based in their London office and to be responsible for the full

spectrum of M & A work, including business development. The position calls for a young but experienced M & A manager with a track record of success in initiating, negotiating and concluding transactions. An ambitious, computer literate person with a second European language and an accounting or banking background is sought. Broad experience in industry would be an advantage. Excellent interpersonal skills and the ability to work within a team are also of great importance.

Compensation will be attractive and negotiable and will also include a performance/profitability bonus. Other benefits will include the normal merchant banking package.

Please send full CV and salary details quoting reference MCS/6098 to Alannah Hunt, Executive Selection Division, Price Waterhouse Management Consultants, No 1 London Bridge, London SE1 9QL.

**Bankers Trust Company**

## Head of Investment Administration

### - International Fixed Income Group -

The Investment Management Group of Bankers Trust Company is one of the major growth areas of the Bank. As a result, this new senior appointment has become essential to future development. It offers an exciting and unique career challenge.

You would take full managerial responsibility for the administration of the Fixed Income activity. Reporting to the Director, the role involves providing a positive contribution to the management and development of the administrative function including the implementation of special projects. There is also extensive client liaison and reporting responsibility.

Applicants, ideally aged early 30's, should have a successful track record of managing the settlements, accounting and administrative procedures of international fixed income and currency instruments.

You should also have the maturity to take over the management of a team of administrators and to assume additional responsibilities as the business grows. A sound knowledge of computer systems, taxation and legal agreements would be an advantage.

The position carries a high basic salary, with excellent banking benefits including a car. You would have the opportunity to make a major impact on the development of this important business area and develop your own career within a premier organisation.

Interested candidates should contact Sarah Beaumont on 01-825 8070 or send a detailed curriculum vitae quoting ref L 163 to her at Slade Consulting Group (UK) Limited, Metro House, 58 St. James's Street, London SW1A 1LD. All applications will be treated in strictest confidence.

We wish to recruit Executives with several years experience of gilt-edged sales to join our established team servicing institutional clients. This is an excellent opportunity for applicants with a proven track record in this field to further their career.

We are offering an attractive salary which is negotiable according to experience, and a comprehensive benefit package. Career prospects are excellent.

Please write enclosing full personal and career details to: Gareth Hughes, Assistant Manager - Personnel, Kleinwort Benson Group, PO Box 191, 10 Fenchurch Street, London, EC3M 3LB.

**Kleinwort Grieveson Charlesworth**

## Business Analyst/Raters

Credit evaluation  
Central London  
£25,000 - £36,000 + benefits

In Spring 1987 a new prestigiously backed company opens in London with an excellent service to sell a top quality credit evaluation service specifically for the Euromarkets.

They are now looking for a team of high calibre professional analysts and raters to cover the company's multi-disciplined approach to the European market. Specifically, vacancies are for Corporate Analysts both junior and senior and a senior Bank/Sovereign Analyst.

It is anticipated that successful

candidates may be frustrated with their current banking, credit insurance, chartered accountancy, or other rating agency environment and are looking for a smaller company with greater participation and potential growth.

The personal qualities necessary to fit in with our client's corporate philosophies are professionalism and pride in your work, interpersonal ease at all levels, generating fruitful and economic information. Excellent communication skills, both written and spoken, are vital and a second

European language will be highly desirable due to the international context of the work.

Career progression will be linked to company growth.

## Deputy Treasurer

£ Negotiable

The Banking Division of one of Britain's largest and fastest growing financial services groups is seeking to appoint a Deputy Treasurer.

Based in London, the job will involve responsibility for the management of the company's liquid assets and actively dealing on the Foreign Exchange and Eurodeposit markets. The successful candidate will also market for new bank and corporate deposits and assess and recommend new financial instruments.

Candidates, probably in their mid or late twenties, should have at least three years' experience of sterling deposit and foreign exchange dealing on the London Money Markets and a sound knowledge of treasury activities. It is essential that they have the ability to work on their own initiative and are highly motivated with a strong commitment to success.

This challenging position offers good career prospects within one of Britain's most innovative and dynamic financial services groups. The remuneration package, which is negotiable, will include a company car, profit sharing and other benefits associated with a company of this calibre.

Those interested should contact John Green in strictest confidence on 01-404 5751 or write to him at Michael Page City, 39-41 Parker Street, London WC2B 5LH quoting reference 3710.

## North American Equities Analyst

An exciting opportunity  
with prospects of promotion to Fund Manager

This is a chance for you to become assistant to the North American Fund Manager in one of the most competitive and successful British institutions. The company has substantial investments in US and Canadian equities and your job will be an interesting blend of analysis and some dealing responsibilities. You will also be a participant in investment policy meetings, so all in all there is great scope for personal initiative and rapid advancement.

You will work in a brand new sophisticated dealing room due to be completed in the next few weeks. Promotion prospects are outstanding - the majority of the company's existing fund managers were appointed through internal promotion and

new management positions have been created to capitalise on market change or particular expertise.

To be a candidate you should be a professional investment analyst probably aged 22-30 and with a degree or appropriate qualification. You should have at least two years' experience in US or Canadian equities, or preferably in both, gained with a major institution.

There is an attractive compensation package.

To apply, please write with CV to John Sears and Associates, Executive Management Recruitment Consultants, Cavendish Court, 11/15 Wigmore Street, London W1H 9LB or telephone: 01-629 3532.

**John Sears  
and Associates**

A MEMBER OF THE SMCL GROUP

## US Dollar and Yen Traders A Great Deal

This highly profitable UK subsidiary of one of the world's largest banks has achieved a sharply increased performance in the last year. As a result the Bank now wishes to recruit two bond traders to cover dollar and yen bonds.

Reporting to senior management, you will be a key member of a young and dynamic team, willing and able to act independently. With your knowledge of interest rate trends and awareness of new products, you will make a valuable contribution to corporate decisions. Drawing on your trading experience, you will have the opportunity to branch into a managerial

role, initially by supervising trainee dealers. You will probably be in your 20's, with at least one year's experience of trading either US dollar or Yen straight and with a thorough knowledge of the bond market. You have a confident, mature outlook and are a good communicator.

This post offers a negotiable salary and all the usual banking benefits. To apply, please write or ring in complete confidence to Kathryn Barnes, of Cripps, Sears & Associates Limited, Personnel Management Consultants, International Buildings, 71 Kingway, London WC2B 6ST. Tel: 01-404 5701.

## DATASTREAM

### A background in Investments

Right now you are probably aged 22-32, a graduate and well on your way to developing a successful career within the Investment Industry. But perhaps you find your current role offers more limits than it does horizons. If so, and you are attracted by the challenge of marketing as much as you are fascinated by the world of Investments, then here at Datastream we offer the opportunity to combine both.

### A future in Marketing

We provide Financial Institutions with access to the most powerful and sophisticated computer technology used in the handling and analysis of financial data. We also give Fund Managers, Investment Analysts, Stockbrokers, Market Makers etc. a powerful tool with which to make more informed investment decisions and develop more accurate financial strategies.

(Incidentally, if your experience has been gained in any of the above roles, your transition will be that much easier).

But although a lot has been said about the influence of computers on the finance sector, we have only scratched the surface of the potential that really exists - this is where you come in.

It is a role that will entail responsibilities far beyond the traditional parameters of marketing with much of your effort being directed towards examining sectors of the industry, identifying where information needs exist and how best Datastream can supply a technologically based solution.

This will involve not only working with our development team on creating new products, but also planning the marketing strategies for their launch.

Our corporate growth plans are ambitious to say the least, and the chance to develop a more detailed understanding of financial marketing is there for the taking. Amongst the more material considerations are a highly competitive salary and an unrivalled benefits package including Free Life Assurance, Non Contributory Pension Scheme and Private Medical Cover.

For more details write with full career details including present salary and daytime phone number to Karen Taylor, Recruitment Officer, Datastream International Ltd, Monmouth House, 58/64 City Road, London, EC1Y 2AL.

Dun & Bradstreet International

## COMPLIANCE CITY

Salary Negotiable  
in excess of £30,000  
with substantial  
Bonus + Benefits

Goldman Sachs is a major international financial services firm. In London, it is a primary dealer in gilt securities and an equity market maker on The Stock Exchange.

The London office now wishes to recruit for a newly created position within the compliance function. The terms of reference will be necessarily wide as you will assist in setting up compliance procedures, advise the firm on compliance-related issues, ensure that employees understand rules and regulations, and liaise with regulatory authorities. The position offers exposure at all levels to the production and operations areas of the firm.

Because of the importance attached to this role your background will have to be equally impressive. You will be a determined and creative self starter with good business judgement. You will also be a graduate with a legal or accountancy background, ideally both. At least three years of securities industry experience and a working knowledge of Stock Exchange rules and regulations are required.

For further details of this position, which carries a substantial bonus and excellent benefits, contact Graham Palfrey-Smith or Hansa Sarfani on 01-629 4463 (or 01-669 8822 or 697 6811 at evenings and weekends), alternatively write enclosing a comprehensive career history quoting ref HS 235.

Salary Neg. + Company Car & Bank Benefits  
City Based

As part of the continuing development of Royal Trust Bank, we are now seeking to recruit a correspondent banker to join our Management team. This is a new role for which the primary responsibility will be to establish new bank relationships for money market lines, as well as marketing and creating an awareness of the products and services available from Royal Trust Bank, and the Royal Trust Group.

The right candidate will be aged 28-40 with at least 3 years correspondent banking and/or representative office experience in the London market. Ability to work on his/her own initiative and first class communication skills are essential.

Salary will be negotiable and benefits include a company car, mortgage subsidy, private medical cover, pension and life assurance.

Please write in strict confidence to:

John A. Newman, Senior Associate Director,  
Royal Trust Bank, Royal Trust House,  
48-50 Cannon Street, London EC4N 6LD.

## Marketing Manager

Credit evaluation  
Central London  
around £30-35,000 + bonus

This new London based operation has been established with significant backing to market and sell a high level credit evaluation service aimed specifically at the Euromarket.

They are looking for a Marketing Manager who understands the undoubted potential of this service. It is vital that the successful candidate is comfortable with financial analysis terminology, understands banking structures both UK and globally, and has institutional investor contacts.

Reporting to the Managing Director, the challenge, excitement and ultimate remuneration of the role stems from the innovative nature of the service offered. The incumbent will have to be sensitive to international market needs, adaptable in approach and strong enough to steer the company to match market requirements.

Candidates should have gained appropriate international experience, in the financial services sector and also have a second European language.

Prospects for the successful candidate lie in the planned growth of the company, and with the potential to progress to associate director level.

Please send full CV in confidence quoting reference MCS/3016 to: Tracey Phillips, Executive Selection Division, Price Waterhouse Management Consultants, No. 1 London Bridge, London SE1 9QL.

Price Waterhouse

Japanese equity  
sales experience?

## Establish a Name for Yourself!

c.£30k + benefits

My client is the newly-established London branch of a major overseas securities house, itself part of a prestigious international finance group backed by immense resources and long-standing experience. Offering a comprehensive package of financial services, the new company is the spearhead of an ambitious programme of expansion into other foreign markets, in which international corporate and institutional business will play an increasingly vital role in the parent's overall marketing strategy.

As a first step the company now wishes to appoint a Japanese equities sales executive to launch this sector of its activities in the U.K. This is an exceptional career-building opportunity providing early responsibility and considerable freedom of initiative.

Probably aged 25-30 and a graduate in finance or economics, you will have between one and two years' relevant equities experience, supported by sales flair and market awareness, and will be capable of making an immediate contribution by building on an existing client portfolio.

Energy, enthusiasm, decisiveness and resilience under pressure will all be key personal characteristics, and you will be at once articulate, authoritative and persuasive, creating both interest in the product and confidence in the company. You should also possess a stable, team-orientated personality and display drive and managerial potential.

Interested? Then ring or preferably write, in total confidence, to me, Trevor G. Hoos, Sowerby's (Selection) Ltd., Personnel Consultants, 506 Cheam House, 150 Regent Street, London, W1R 5EA. Tel: 01-439 8284.

Sowerby's Selection

## Currency Economist

A new role in one of the world's leading banks

One of the world's largest and financially strongest international banks offers the opportunity for an experienced Currency Economist, probably now a number two or three in a team, to make a career development move by taking on a new role in a rapidly expanding Treasury function.

The appointee will be responsible for establishing the department's analysis and research capability within the financial and currency markets and for advising FX Dealers on future market trends.

The bank's growth and commitment to both London and the world's financial markets is underlined by its recent completion of a new 'state-of-the-art' Dealing room, doubling the size

of the Treasury department.

Candidates should have at least two years' experience in Currency Economics with an established financial institution. A broad knowledge of the foreign exchange and money markets is required, both in US\$ and major European currencies. In addition to a degree, a post-graduate qualification would be advantageous.

An attractive salary and benefits package is offered, reflecting the importance and status the Bank attaches to this position.

To apply, please write to John Sears & Associates, Executive Recruitment Consultants, Cavendish Court, 11-15 Wigmore Street, London W1H 9LB or telephone: 01-629 3532.

John Sears  
and Associates

A MEMBER OF THE ERM GROUP

## EQUITY DESK POSITION

Highly motivated person with excellent organisational skills urgently needed to join a successful and dynamic team of institutional equity professionals with an established but rapidly expanding business. A good telephone manner, experience in sales trading operations, knowledge of computers and the determination to adopt a flexible role in achieving team goals will be substantial assets.

Please write with curriculum vitae to:

T. Barry  
10th Floor  
Princess House  
27 Bush Lane  
London EC4R 6AN

## Portfolio Managers

U.K. and European Equities

International Bonds

- WE are the rapidly expanding investment management arm of the world-wide Nomura organisation seeking two first class portfolio managers with experience in either of these areas.
- YOU are 25-35 and seeking to become part of a successful team, reporting to a Senior Portfolio Manager.
- YOU have the confidence and maturity to accept departmental responsibilities and deputise for your Senior Portfolio Manager during his absence from the office.
- YOU will enjoy the challenge of a demanding and rewarding position with a prestigious organisation.
- YOU will be prepared to undertake a certain amount of world-wide travel.
- YOU will qualify for a generous salary and substantial benefits.

If you believe you meet our requirements, please write, enclosing detailed c.v. to: Mr. N. Kishi, Managing Director, Nimco Europe Limited, 24 Monument Street, London EC3R 8AJ.

## Energy Economics Analysis - London

£21,024-£24,085

The Central Electricity Generating Board is one of the world's largest electric power utilities with responsibility for planning, building and operating power stations for the bulk supply of electricity.

We are seeking to fill a vacancy within the Fossil Fuel and Energy Section which is involved in the formulation of policy advice on all aspects of the economics of fossil fuel supply and also advises on commercial and strategic interest to CEGB. The Section is responsible for the preparation of medium and long term forecasts of fossil fuel price and availability within UK, from both imported and indigenous sources, as an input into the Board's formal investment plans. The work ranges from the identification and evaluation of long term strategies designed to ensure the Board's continued access to economic sources of fossil fuel to detailed economic assessments.

You will lead a small team engaged in analysis of the UK Coal Industry but may be required to participate in any of the work of the Section. The main duties of the post involve the assessment of the likely levels of

production from indigenous coal sources within the UK and the development and use of a cost based model of the UK coal industry to analyse possible changes in the cost competitiveness of British Coal. You will also be required to forecast coal prices in the UK over the longer term.

You should be educated to degree level, preferably in economics or business studies, and should have a broad understanding of current energy issues, particularly as they affect both British Coal and CEGB.

You must be able to demonstrate an ability to analyse and formulate solutions to complex issues, including the ability to organise and present numerical information, and to express yourself effectively both orally and in writing. Experience in the use of computer modelling techniques for economic analysis applied to problems in the energy supply area would be an advantage.

Please write with full details, including age and current salary if applicable, to Group Personnel Officer, CEGB, Sudbury House, 15 Newgate Street, London EC1A 7AU by January 30 1987 quoting Reference 687/00/FT.

The CEGB is an equal opportunity employer.

GENERATING BOARD  
HEADQUARTERS

## MANAGER Fiscal Agencies

London

Salary negotiable

The position of Manager - Fiscal Agencies within this client company, a major International Bank, is a post which demands commitment - stretching both your management ability and your professional skills to the full.

The prime responsibility of the position will be to promote and expand the Bank's role as a Fiscal and Paying Agent whilst maintaining the high standards of service upon which the Bank's reputation has been built.

Candidates, aged late 20's to early 30's, should have at least 5 years' experience gained either in syndications or direct loans processing of which 1 or 2 years will have been spent in a designate position. Previous activity in fiscal and paying agencies is essential as is experience of a substantial portfolio with major issuers.

As the Bank's primary contact, the successful candidate will play a major role in the development of both existing and prospective customers. Leading a team of five you will maintain departmental efficiency through staff motivation and attention to administrative detail.

The position carries an attractive compensation and benefits package and is likely to attract those currently earning in the £17,000-£22,000 range.

Please apply in the first instance, in strict confidence, enclosing a full CV: quoting Ref 875 to: JPW Recruitment Advertising Ltd, Chancery House, 53/54 Chancery Lane, London WC2A 1QX.

## RESEARCH DIRECTOR

RESEARCH ANALYSTS

Our client, the UK stockbroking division of a European Financial institution, requires additional research staff for its London office.

The company consists of a small team providing specialised services to large UK and international institutional clients. The research team is responsible for provision of some regular research product and general support to the equity marketing group, but with strong bias towards 'special situation' and corporate finance related business.

Candidates should have either a speciality in a sector of the UK market (preferably Financials, Natural Resources, Industrials or Consumer) or more general analytical experience, probably gained in a broking or fund management environment.

For further information please write with full Curriculum Vitae, quoting reference MFV/200, to: V. Lawrence, Guy Redmayne & Partners, 18 Grosvenor Street, London W1X 9FD.

GRP is the General Recruitment Division of EAL

## General Manager Financial Computer Services

£ neg. package City

We are looking for a very special person with exceptional qualities to accept this demanding and highly remunerative appointment. These qualities must include:

- the ability to manage an important business unit and to be competent in preparing, monitoring and achieving business plans;
- an understanding of the computer services industry;
- experience of communicating effectively at Board level, particularly with members of financial institutions;
- a proven track record of managing highly motivated and well qualified technical and professional staff.

Our plc client, a British group operating internationally, is well known in the City and is expanding rapidly. Its clients, worldwide, include some of the most respected names in international banking, finance and stockbroking circles.

You will be expected to progress to UK Board level and be able to contribute in the direction of the company's UK business.

Preferably aged 35-45, you must be highly motivated with an entrepreneurial approach and have the ability to promote the company's products/services.

There are no constraints on salary for the right person.

Please apply, in the strictest confidence, enclosing CV giving details of current salary to D. B. Atkins, Managing Director.

## Who's the fastest rising force in money market funding?

Nationwide was a pioneer amongst Building Societies in raising funds through the commercial money markets. Now, as the competition heats up with the lifting of old restrictions, we're aiming even higher in the various fields of Treasury Dealing — particularly CD's, Time Deposits, Eurobonds and Index-linked bonds.

We're developing new products whilst expanding our investment and funding activities. That's why we're mounting a serious search for ambitious high-flyers who'll shape and share this exciting future.

You'd be joining an organisation that's one of the nation's biggest building societies and a dynamic financial services company — one which is exploiting new opportunities with verve and imagination.

Rest assured, the rewards on offer, including concessionary mortgage (which could be immediate or possibly after a qualifying period) and free BUPA, reflect our determination to attract top talents. Will you figure in the Nationwide initiative?

### Corporate Sales Executive

Our plans to offer an improved Money Market service to corporate and institutional investors will ensure that Nationwide remains a pioneering influence among Building Societies. We're looking for someone with the contacts and the skills to market the products to major investors. This will require a proven record in marketing CD's and Deposits experience, probably gained within a bank. This is a 'greenfield' opportunity — a chance to make your mark in a Number One position.

### Money Market Dealers

— from Junior to Senior

We're looking for people with one to three years' experience of profitable dealing in Deposits, CD's and Bills, either in a bank, insurance company or Corporate Treasury Dept. Additional knowledge of foreign currency markets and hedging instruments would be welcome, bearing in mind our plans for product development. If you're ready for a high level of responsibility and plenty of new challenges, we're ready to talk.

All senior posts will carry fully expensed company cars.

Break loose and start climbing fast with Nationwide — write with detailed CV including current salary to: Richard Wharton, Recruitment Manager, Nationwide Building Society, New Oxford House, High Holborn, London WC1V 6PW or telephone him on 01-242 8822 ext 2580 for an application form. Closing date for applications 28th January 1987. We are an equal opportunities employer.

## INVESTMENT BANKING HONG KONG

OUR CLIENT is one of the most highly respected United States investment banks. The Hong Kong office is small, successful and expanding.

THE POSITION: Is as a senior member of the investment banking team, with responsibility for marketing the services of the investment bank throughout the South East Asian region.

QUALIFICATIONS: Candidates will have U.S. domestic and Euro Debt/Equity experience and will have worked on swaps and M & A deals with a leading U.S. investment bank. They will have an excellent academic background, ideally including an MBA or JD.

REWARDS: The compensation offered is exceptional, as are the opportunities for career development.

Replies will be treated in strictest confidence. No replies will be forwarded to our client without the applicant's permission.

Please reply to: Search Resources International, Ref HK3E1, Chronicle House, 4th Floor, 79-78 Fleet Street, London EC4Y 1HY.

## FUND MANAGER

The British Aerospace Pension Fund, which manages nearly £1 billion of equities in the UK, North American and Continental European markets is looking for a Fund Manager to join a small and successful team.

Applicants should have had experience of at least one of the above markets. Preferred age is late 20s.

The successful candidate will have considerable responsibility for a particular area of investment, will be expected to contribute to other areas and will have the opportunity to participate in formulating overall Fund policy within a flexible and pleasant working environment. The position will particularly appeal to those interested in acquiring a broad range of investment experience.

Please apply, enclosing CV, in strict confidence, to: J. W. Gibbon, Investment Manager, British Aerospace Pension Fund, 101 Cannon Street, London EC4N 5AD.

## EUROPEAN ANALYSTS

Hoare Govett's European department comprises of more than 20 staff servicing clients on an international basis. To complement our existing research team we are looking to recruit analysts with European experience, or with proven skills in UK equity or credit analysis and at least one foreign language. Applicants should be highly motivated and interested in joining a young and energetic department. Remuneration will be very competitive.

Candidates should write with full C.V. to Tim Draper, Head of European Research, Hoare Govett Limited, Heron House, 319-325 High Holborn, London WC1V 7PB.

## Bullion Traders

The London Branch of The First National Bank of Boston, a major U.S. bank, is in the process of establishing a U.K. bullion trading operation.

This is a new venture, being built to complement the activities of our sister company - The Rhode Island Hospital Trust National Bank - which for many years has been pre-eminent in the North American physical bullion markets.

Bank of Boston intends to become a fully-fledged market-maker in gold and silver and is seeking two additional people to help realise its plans:

## Senior Bullion Trader

You will need extensive knowledge of all aspects of bullion trading since you will be responsible for running the gold book and for supervising other trading staff. You will also be expected to deputise for the Trading Manager, whenever necessary, and to assist with the training of dealing room personnel. A competent team leader, capable of working under pressure, you will have had some 5 years' experience in a major bullion house.

## Bullion Trader

Besides having to assist the Senior Bullion Trader with the day-to-day running of the trading desk, you will have specific responsibility for the silver book. You should have had at least 2 years' experience of trading in a commodities market and be willing to learn new concepts and have the ability to work in a team environment.

In addition to highly attractive remuneration packages, we are offering the chance to become involved in a significant business undertaking. If you have the expertise we need and would like the opportunity to further your career, please send a detailed CV to John Watkinson, Assistant Vice President, Personnel Department, The First National Bank of Boston, 5 Cheapside, London EC2P 2DE.

BANK OF BOSTON

## UNIT TRUST MARKETING MANAGER

Aetna Life Insurance Company Ltd is the UK arm of Aetna Life & Casualty - the world's largest publicly quoted insurance group. Formed in 1984 we commenced trading in March 1985 and have quickly established a reputation for innovative products and effective marketing.

We are looking for a highly motivated individual capable of driving the development and promotion of our range of unit trust products. (This is an established range operating under the Tyndall name and currently consisting of 19 funds).

You will be required to research the needs of the sales force and customers and to liaise with the Technical and Investment Departments regarding the specification of new products and services. You will also brief Marketing Services on the creation of suitable literature and sales support material and you will be responsible for planning and implementing launches. Central to your work will be the creation of the definitive sales message of your products and the promotion of this message both internally and to our customers.

The benefit package includes a competitive salary, company car, mortgage subsidy, BUPA and a non-contributory pension scheme.

If you would like to know more, please telephone John Hunter on (01) 833 1256 or write to him with your CV at the address below.

Marketing career...

Marketing Executive - c. £16K + Benefits - Central London

In a mere 18 months Prudential Unit Trust Managers Limited have risen to the highest echelons of this dynamic field. We're building on this success by launching further unit trusts and also moving into the area of Personal Equity Plans.

Understandably we're expanding the teams in every support department - including Marketing. The role of the Marketing Executive, the post we're now seeking to fill, is to support our sales and marketing effort by providing investment advice and information.

This will involve close liaison with our Fund Managers on investment strategies and general performance factors. You will marshal a constant flow of investment information into regular high quality investment publications. Your expertise will also be available to answer questions from clients and intermediaries

either directly or by correspondence. In short, you will have well developed written and verbal skills, along with a flair for interpretation and presentation of information.

Ideally, but not essentially, a graduate, you must have spent at least four years within an investment organization handling private client portfolios.

If you have the talent, we can promise an outstanding future from day one. The position is based in Central London and the rewards will include a salary up to £16K, non-contributory pension scheme and a subsidised mortgage after the qualifying period.

## Acquisition/Corporate Development

Financial services  
from £35,000 + City benefits

Our client is a major force in retail financial services. The company has embarked on a programme of further expansion on a significant scale. While organic growth will account for part of this, substantial capital resources are available to fund strategic and synergistic acquisitions and internal diversification.

Responsibility for pursuing these new developments rests with a corporate development team reporting to the Deputy Chief Executive. The team is now to be expanded with the appointment of an additional Corporate Development Executive. Working closely with top management, you will be engaged on a wide range of acquisition and development projects from target identification, through the presentation of the investment proposal, to implementation and integration.

We wish to discuss this senior appointment on a confidential basis

with mature, degree-qualified individuals aged around 32-44. We will be looking for practical experience of M&A work gained either as a member of an acquisitive group's 'takeover team' or in an external advisory capacity. You must be well suited to working in a fast-moving corporate environment and have the business sense to spot opportunities which will fit neatly into our client's portfolio. Previous financial services experience is desirable but not essential.

The location is central London. The package for this key appointment can be negotiated to attract the right candidate and will include a car, a subsidised mortgage and a non-contributory pension scheme.

Future career prospects are excellent. Please send a brief CV, in confidence, to Gary Gibbons, Financial Institutions Group, or telephone for an application form or to make any enquiries. Ref: 1230/GRG/FT.

## Marketing Officers

Canadian Imperial Bank of Commerce is one of North America's largest financial institutions and is committed to expanding its presence in the UK market on a broad basis. As part of this expansion we are seeking several experienced marketing officers to concentrate on business development efforts with middle market companies in the U.K. The middle market forms a very important part of this strategy and as a result this represents an exciting opportunity for energetic bankers to participate in a growth area.

The successful candidates are likely to have a good general banking knowledge including strong credit skills and a minimum of two to three years' marketing experience, preferably in this market segment. A knowledge of secured lending and leveraged financing techniques would be an advantage.

The compensation package will be very competitive and is designed to attract high calibre people. If you think you can contribute to our growth please write, enclosing full career details, to:

Mrs. Eileen Price,  
Personnel Officer,  
Canadian Imperial Bank of Commerce,  
55 Bishopsgate,  
London EC2N 3NN.

## HIT OUR TARGETS...AND YOURS.

Associate Director - Retail Marketing.

We are already on our way to becoming a major force in the financial services industry of the 1990's. For the second time in four years, we have been voted "Top Unit Trust Management Group" by a leading financial publication.

Our continuing success is dependant not only on the quality of our investment track record, but also the effectiveness of our marketing policy, and an important person in our plans for the future will be our Retail Marketing Associate Director. This is a new and senior position within the company reporting directly to the Executive Director.

It is essential that the person we are seeking has a successful track record in marketing together with the initiative and drive needed to meet demanding sales targets. Although the type of marketing experience isn't crucial, knowledge of the financial sector would be an advantage. Unless you are a highly motivated person it is unlikely you will have the qualities necessary to achieve our future objectives.

Primarily, you will be responsible for handling our substantial programme of retail advertising, designed

to enable the company to secure a dominant market share.

You will be based at our offices in the City where you will have the support of our experienced marketing team.

Your specific areas of responsibility will include co-ordinating advertising with direct mail and other promotional campaigns, monitoring and reporting on the response from these campaigns and designing and initiating marketing strategy with other key members of the marketing team. The scope for broadening these responsibilities is enormous and will come with success.

The excellent remuneration package is commensurate with the importance of this position and includes a generous starting salary, performance related bonus, non-contributory pension, private health scheme and free life assurance.

If you would like to join a company that offers an outstanding career opportunity for the future, please write enclosing a CV, to Sue Lingham at Fidelity Investment Services, 25 Lovat Lane, London EC3R 8LL.

## ON-LINE FINANCIAL INFORMATION SALES EXECUTIVES

Salary: Basic c £18K, OQE £30K

ONE OF the world's largest suppliers of on-line, real time information services, our client is seeking ambitious sales professionals to capitalise on the growing market opportunities created by the recent new products.

AMBITIOUS AND enthusiastic graduates or equivalents, aged 24 to 28, with a successful sales record are required to join a thriving New Business generation team operating in the City of London.

A THOROUGH understanding of business practices in the financial community is desirable.

EXCITING CAREER opportunities exist within this major international organisation, and with earnings of

up to £30K per year, these appointments will appeal to young high calibre sales executives looking for significant progression.

THE COMPANY'S existing customer base includes stock brokers, banks, insurance companies, pension funds, unit trusts and other investment institutions. The objective is to grow these major accounts whilst developing excellent new business opportunities.

FOR FURTHER information or to apply please contact Nicola Ogilvie on 01-222 7766 or alternatively in writing at the address below quoting Reference No: NM 0854.

### Boliden to quit German venture

By Sara Webb, Stockholm Correspondent

BOLIDEN, the Swedish metals, chemicals and mining group, is to pull out of its lead smelting joint venture with Preussag in West Germany by the end of this year because it does not want to invest in a new smelter which would not meet environmental requirements.

Preussag and Boliden each have a 50 per cent share in Preussag-Boliden-Blei (PBB) which produces lead and lead alloys, chiefly for the West German automotive market.

Boliden says it does not plan to renew its 15-year-old agreement at the end of the year and is looking for a buyer.

"If we cannot find a new partner for PBB, we will have to write off the cost," Mr Kjell Nilsson, Boliden's managing director, said.

Under new legislation, PBB would have to reduce sulphur dioxide emissions from the smelter at Nordenskiöld, West Germany, by 1991.

Boliden estimates that it would cost DM 20m to DM 30m (\$10.5m to \$15.8m) to improve the existing smelter, with additional operating costs amounting to DM 5m a year.

Preussag wants to invest in a new smelter ready for production in 1991, which would cost about DM 200m. "We cannot justify that investment," Mr Nilsson said.

Boliden has faced tough times recently and made record losses of SKr 97m (\$147m) in the first nine months of 1986. The new management has introduced cost-cutting and hopes 1987 profits will reach SKr 200m.

The group's lead mines in Sweden - which produce about 70,000 tonnes of lead concentrate a year - and its smelter at Rönnskär supply PBB with 90 per cent of its raw materials.

Boliden wants to continue to supply PBB with lead concentrate and crude lead after the joint venture ends.

PBB produces 120,000 tonnes of lead and lead alloys a year. It has sales of SKr 700m, and losses for 1986 are expected to be SKr 10m, to SKr 15m.

### Deutsche Babcock to raise DM 300m through rights issue

By Andrew Fisher in Frankfurt

DEUTSCHE BABCOCK, the West German heavy engineering group, plans to raise between DM 200m (\$105m) and DM 300m through a rights issue in April.

The company said group profits had improved further in the financial year to September 30, 1986, for which a maintained dividend of DM 3 per ordinary share was being proposed.

Babcock, which is 25 per cent owned by Iran, gave no details of the proposed share issue beyond saying that nominal capital would be raised by DM 180m to DM 350m.

But analysts said the steadiness of the share price in the past two days, when other export-oriented stocks have fallen after the latest D-Mark revaluation, had given the market notice of Babcock's intentions.

The group's last rights issue was in 1978. Since then, Babcock has suffered from problems with its Middle Eastern business, especially

in Saudi Arabia. It resumed dividends two years ago after a two-year gap. Group net profits in 1984-85 totalled DM 32.1m compared with DM 28.1m the previous year.

The terms of the rights issue are expected to be two new shares for five existing ones. Yesterday, the shares closed DM 5 higher at DM 211. German rights issues are usually made at a big discount, suggesting the price could be between DM 100 and DM 150, the price of the last rights issue.

The group's order inflow last year was 5.2 per cent lower at DM 4.8m, partly because of the lower dollar and partly because of its withdrawal from construction and trading.

At the end of September, the order backlog stood at DM 7.6m, a decline of 6.6 per cent over the previous year. Babcock said its liquid reserves rose during the year from DM 18m to DM 54m.

### West Point-Pepperell continues recovery

By our financial staff

WEST POINT-PEPPERELL, the big US textiles and carpets producer which bought Cluett, Peabody last year for \$383m, boosted first-quarter net income from \$11.5m, or \$1.11 a share, to \$20.9m or \$1.43, reflecting a broad-based improvement in profits.

The rise continues West Point's recent earnings recovery, and came on sales which rose from \$332.1m to \$499.6m. However, this increase was more than accounted for by the addition of \$132m in sales of Cluett, a big producer of branded and private label apparel.

Mr J. L. Lanier, chairman, said the profit rise reflected "greatly improved performance in apparel fabrics, much better margins in bed and bath lines on a modest sales in-

crease, and a sharp turnaround in the profitability of industrial fabrics. In addition, the apparel segment (Cluett) added \$2.9m to net income."

Mr Lanier said Cluett's contribution to net income for the quarter came mainly from the shirt and bed linen lines, which were less robust, reflecting softer retail demand, especially in tailored clothing and children's wear.

A weak spot was carpets, where profits are running 50 per cent below the levels of last year, due to lower volumes and tough competition.

The company hopes its recent acquisition of Stratton Industries will solidify its position in commercial carpets.

### Owens Illinois cautions on new bid

By James Buchan in New York

OWENS-ILLINOIS, the largest US glass container manufacturer, yesterday responded cautiously to a revised offer of \$80 a share, or \$3.6bn, from Kohlberg Kravis Roberts, the Wall Street investment firm specialising in leveraged buy-outs.

Owens-Illinois, a diversified packaging company with interests in health care and financial services, rejected an earlier Kohlberg offer to buy shareholders out at \$55 a share and announced its own restructuring plan on Monday.

The company said yesterday it would hold in abeyance its own plan, which involves large-scale asset disposals and the repurchase of up to a third of its equity, until it had considered the new offer from Kohlberg.

Kohlberg, which masterminded the \$1.2bn buy-out of Beatrice, the diversified food products group, last year, usually prefers to work with management in taking a company private. Kohlberg insisted its offer remained friendly and that it would adhere to an agreement not to buy Owens-Illinois securities until the end of 1989.

But in a marked hardening of its attitude, Kohlberg said that management investment was no longer a condition of the offer. Owens-Illinois share price, which fell sharply after Monday's rejection by the company's board, recovered 5% to \$54 in early trading yesterday.

The new offer consists of \$48.50 per share in cash and junior securities which Kohlberg said were worth \$11.50 a share. Some analysts believe this offer is more valuable to shareholders than the management restructuring plan, which involves the disposal of about \$1bn in assets, primarily timberlands and corrugated box plants, the repurchase of up to 20m shares and new operational cost controls expected to save \$20m a year.

The company, which earned \$154m or \$2.62 a share on \$3.67bn of revenues in 1985, said it expects to earn \$2.90-2.95 a share in 1986 and \$4 a share before extraordinary charges in 1987. Management is seeking to raise per-share earnings by 12 per cent compound to 1991.

### Alcatel keeps two lines of attack

By Terry Dodsworth

IF SIZE and market presence were the only factors which counted in the European telecommunications industry, the new Alcatel group would be sailing into the balmy waters of assured success. The company is unquestionably big - the biggest on some counts - and it will have a commanding position in Western Europe, one of the world's key markets. But size alone, say sceptics, may not be enough.

The prediction of imminent shipwreck boils down to one issue: can a group assembled from two quite different companies overcome its cultural and product differences quickly enough to weld itself into an effective fighting force? In the battle for survival in the European telecommunications business, Alcatel is the outcome of a pre-emptive strike to try and secure an unassailable market position.

But it will be a challenging management task to bring together an essentially nationally-based organisation - the telephone interests of Compagnie Générale d'Electricité (CGE) of France - with the American-run ITT activities in Europe.

CGE's response to the sceptics as follows: Products: Alcatel says it will take a gradualist approach to product development. There was speculation before the merger was completed that the group would try to cut costs by concentrating on just one of its two digital switches.

Mr Pierre Suard, chief executive of Alcatel, has rejected this strategy in favour of supporting both switches, the E10, inherited from the French company, and ITT's System 12, probably, he said recently, for the next 10 years. The group apparently aims to assure customers that none will be left high and dry with an outdated product.

Mr Suard also rejected the view that System 12 is flawed and would never work as well as its competitor. The installation rate for the ITT switch, he said, was running at 2m lines a year, and the equipment had successfully passed the difficult Bundespost approval procedures.

This alone will not be enough to stop widespread suspicions over System 12, particularly in view of ITT's decision to reduce its commitment to the market. But the figures

show the switch is at least capable of holding many of ITT's traditional customers, there are now 14m lines of System 12 either installed or on order, and the installation rate is higher than the 1.7m a year for the Alcatel digital switch.

Alcatel also says that while its digital switch may prove to be the key to its future, this part of the business accounts for only about 21 per cent of sales. It has a strong position in several other markets.

The group's cable business for example, a combination of ITT's activities and a 65 per cent stake in Cables de Lyon, will have sales of \$1.5bn, and is claimed to be the largest manufacturer of telecommunications cable in the world.

The group will be a leading maker of screen and videotext terminals one of the leading world facsimile machine manufacturers, and a major producer of private telephone exchanges.

Management: With 150,000 employees, Alcatel's size alone will make it a hard company to manage. But the management will also be faced with the complexities of blending a French operational style with the American-based traditions of ITT.

How will it co-ordinate product lines and research? Can it overcome nationalistic rivalries - one of the difficulties, it is said, in controlling ITT's European ventures? How will

it handle the hot potato of redundancies?

Alcatel has so far set out two broad responses to these issues. First, the company will be clearly led by the CGE wing of the enterprise. The choice of the name Alcatel, derived from the telecommunications subsidiary of the combined group, is indicative of this unambiguous approach; equally, Mr Rand Araskog, chairman of ITT, has said firmly that one side has to be in control. Thus a fair number of the senior operational managers in the group are being brought in from CGE.

Second, group organisation will be decentralised, allowing the operational divisions considerable autonomy, a structure employed by CGE.

In the Brussels headquarters will be a management committee in charge of staff functions, such as planning, finance and research and development. Reporting to the committee will be six product group managers in charge of business systems, public networks, cables, transmission, consumer products and outside line plant.

The trickiest area concerns public telephone exchange equipment, where the opportunities for rationalisation are numerous, but where customers have huge investments already tied to each company's products.

For the time being, each product line will be run separately by their existing teams, helping to retain customer loyalty at the expense of savings that could accrue from

more radical restructuring. Marketing, however, will be co-ordinated by the product group managers, who will decide which markets each company should attack. At the same time, research and development will be co-ordinated, so that the next generation of equipment can be melded into a common product. Decentralisation may also help take the nationalistic sting out of redundancies, by leaving employment decisions to the divisions. Estimates of potential cuts of between 15,000 and 25,000 jobs are being bandied about the group's headquarters, and officials concede that some cuts will be necessary.

Finance: Alcatel has not yet drawn up pro forma figures, but says sales this year will rise to about \$13bn from \$12bn in 1986, and that profits will be in the region of \$280m. Although conceding that the margin on sales, at 2 per cent, is slim Alcatel claims it is only slightly under the figures achieved by Siemens of West Germany on its telecommunications activities.

According to Mr Philippe Glumetz, chief operating officer, just over half of the combined sales of the group (\$7bn) will come from the ITT operations. Both switching operations are just in profit, with ITT making its contribution from its older, analogue equipment rather than the new System 12 product line.

On the balance sheet side, Mr Glumetz says that for now the group should have no problem financing itself from its own resources. The immediate claim on its resources will be to repay \$350m worth of debt owed to ITT, which is also receiving \$902m in cash from the transaction, and which will leave another \$800m worth of its debt within the new Alcatel.

The \$350m will be repaid by raising new borrowings, but with the main development work on the new switches completed, cash flow is expected to be strong for the next few years, and should provide the resources for day-to-day requirements.

Alcatel is even considering a public quotation within two or three years, although that will depend on profitability and CGE's projected privatisation.

ALCATEL	
Capital:	CGE 55.0%
	ITT 37.0%
	Société Générale de Belgique 6.7%
	Crédit Lyonnais 1.7%

	Other 25%
Public telephone exchange equipment:	On order 37m digital lines, in service: 17m digital lines

### Continental moves to big league

By Michael Donne, Aerospace Correspondent in London

CONTINENTAL AIRLINES of the US, which is owned by Mr Frank Lorenzo's Texas Air Corporation, will become the third-largest airline in the US after American and United from February 1 when it finally absorbs the operations of People Express and New York Air.

The takeover was announced some time ago. Texas Air also owns Eastern Air Lines, but that company will continue to operate under its own name.

The merger will immediately mean a big increase in Continental's transatlantic operations, with an application for a route from Newark, New Jersey, to Paris, from April 15, and increased flights on the existing People Express Newark to Gatwick route.

An introductory two-for-one fare will be offered in first class and business class on the latter route.

Continental flies between London and Houston, Texas, and is due to start London Denver flights this summer. It will start flights to Otta-

wa and Montreal and expand US domestic operations.

The takeover of People Express and New York Air means Continental will have 312 aircraft serving 109 US airports and 38 international destinations in the UK, Mexico, Canada, the South Pacific and Japan. It will employ 24,000.

System-wide, Continental will operate about 1,500 flights daily, with major US hubs at Denver, Houston, Newark and Washington's Dulles International airport. Until now Newark has been the hub for People Express; Dulles has been the main operating base for New York Air.

Mr Lorenzo, Texas Air and Continental Chairman, said the merger was "the best news for consumers since deregulation. Now, more than ever, Continental remained committed to assuring consumers of the lowest fares possible for a full-service product."

Mr Tom Plaskett, Continental's president and chief executive officer, said that, "while the industry

may have fewer carriers in number, the ones that survive will be larger and stronger, like Continental."

"The big carriers will be going at each other head-to-head, hub-to-hub, all across the country, and that means that service and price competition will continue to be a way of life."

Mr Richard Havers, Continental's regional vice president, Europe, said: "Passengers used to travelling with People Express between London and New York will find that Continental is like-minded in terms of offering the most competitive fares in the market place."

Continental's low-fare transatlantic operations would increase comfort in economy class, by reducing the number of seats to give a between-seat distance of 36 inches, the longest on the North Atlantic in that class.

In addition to Eastern, People Express and New York Air, Texas Air owns Rocky Mountain Airways.

### Sharp fall in Mellon earnings

By William Hall in New York

MELLON BANK Corporation, the Pittsburgh-based banking group whose performance has been lacklustre in recent years, yesterday upset Wall Street by reporting a sharp drop in fourth-quarter earnings because of the need to strengthen its loan loss reserves.

The group estimated that its earnings in the fourth quarter would be \$16m, or \$0.42 a share, compared with \$45m, or \$1.57, in the same period of the previous year. For the full year, Mellon earned \$183m, or \$6.20 per share, compared with \$202m, or \$7.13, the year before.

Although Mellon has grown rapidly in recent years following the 1983 acquisition of the Girard company, its earnings performance has been erratic and the group earned no more in 1986 than it did in 1983. Its performance contrasts with other regional banks, such as the Atlanta-based Suntrust Bank which yesterday reported a 13.2 per cent rise in 1986 net income to \$245.1m and smaller money centre banks, like the New York-based Irving Bank Corporation, which yesterday announced a 10.5 per cent rise in its 1986 net income to \$128.1m.

On Wall Street, Mellon's shares fell by 5% to \$34 in early trading yesterday. Mr J. David Barnes, Mellon's chief executive, said that the fourth-quarter results reflect "management actions to further strengthen loan loss reserves and realign the corporation's international banking activities."

These decisions resulted in sharply higher provision for possible credit losses and non-recurring international charges.

The fourth-quarter provision of \$60m includes \$43m to increase Mellon's reserve for possible credit losses and \$55m of net credit losses, mainly on domestic commercial loans. The action has boosted the group's reserve for credit losses to \$494m at end-December, or 2.1 per cent of total loans.

Non-performing loans totalled \$22m or 3.94 per cent of the total, at end-December 1986. Property acquired in connection with loan settlements totalled \$178m.

The fourth quarter figures include a \$8m charge to cover the realignment of Mellon's international banking activities.

### Air Canada 'ready for privatisation this year'

By Robert Gibbins in Montreal

AIR CANADA is ready to commit itself to private-sector ownership later this year and to issue stock in 1988, according to Mr Claude Taylor, the national airline's chairman.

The Government of Mr Brian Mulroney, Prime Minister, is committed to privatising Air Canada, a state-owned corporation, following changes in transportation legislation that does away with most of the regulatory role of the Canadian Transport Commission. Air Canada's management has been conducting studies for the past six months on privatisation methods.

Mr Taylor said the Government might commit itself to the privatisation of Petro-Canada, the national oil company, later this year. Once this is done, taking Air Canada public should follow. Whether Petro-Canada can be sold to the public before the next general election, expected in 1988, is not clear.

Air Canada will make a major restructuring of its capital, and some existing debt will be converted to equity. Mr Taylor said the method of privatisation will broadly follow that chosen for British Airways. The Government has said it will not inject any more capital into Air Canada before privatisation.

Mr Taylor said Air Canada has already cut costs and improved efficiency significantly, helping it to benefit from strong international traffic in the last half of 1986. The corporation's third-quarter profit was C\$58.6m (\$44.4) and C\$13.7m for the nine months.

Onex, one of Canada's fastest-growing holding companies, is buying Puroletier Courier, the Canadian arm of the US Puroletier Courier Corporation, for C\$238m. Puroletier Canada has been more successful than its US parent and in 1986 had pre-tax profits of C\$38m on volume of C\$260m. It is the market leader in Canada.

Onex will have annual sales of C\$1.5bn after the deal. It already owns an airline meals contractor, a major car manufacturing business and a liquid fertiliser manufacturer in the US.

The Laurentian group, the Montreal-based financial services company which owns Trident Insurance in Britain, is buying Omega Insurance company of Seattle through its publicly quoted holding company. Omega specialises in funeral insurance and has statutory assets of nearly C\$20m.

### Leyland Bus sold for £4m to consortium

By Kenneth Gooding

A CONSORTIUM of management and banks yesterday paid £4m cash to buy Leyland Bus from Rover Group, the state-owned vehicle maker.

The deal differed substantially from the plan announced last year for the consortium to pay £11.7m for a package which would have also included a one-third shareholding in Leyland Parts, Rover's truck and bus spare parts distribution business.

Instead, it has been mutually agreed that Leyland Parts will remain with Leyland Trucks, though it has contracted to continue to distribute parts for Leyland Bus.

The 1,290 remaining employees of Leyland Bus will be offered 18.1 per cent of the issued capital.

The employee share package will be put together without the help of Unity Trust, the trade union bank, which had been expected to be involved.

The consortium, including Bankers Trust as lead bank and the Bank of Scotland, now own 72 per cent of Leyland Bus.

A 12 per cent stake is being held in reserve for other potential shareholders.

Norsk Hydro  
warns on  
resultsBy Kevin Done, Nordic  
Correspondent in Stockholm

NORSK HYDRO, Norway's largest publicly quoted company, warned yesterday that its results for 1986 had deteriorated even more than feared as late as October last year.

The energy, chemicals and metals group has been hit hard by the collapse in the oil price as well as weak demand and declining prices in the international fertilizer market, where the group is now the leading producer in Europe.

Its results for the full year will be published in mid-February, but the company said yesterday that it would be "considerably weaker than we expected at the end of the third quarter."

In the first nine months of the year pre-tax profits slumped to Nkr 1,400m (\$204m) from Nkr 4,400m a year earlier while in the third quarter alone profits collapsed to only Nkr 185m from Nkr 1,860m a year earlier.

Mr Finn Hviisdahl, finance director, said yesterday: "In the last half-year fertilizer sales in Europe have been very disappointing, and this has led to losses in several countries."

Italian investor bids  
for Europrogramme

BY ALAN FRIEDMAN IN MILAN

MR RENATO BOCCI, a Rome-based property investor, last night appeared set to take control of Europrogramme, the Lugano-based property unit trust which was founded by Mr Orazio Bagnasco, the Italian property developer who resigned last year from the fund amid allegations of impropriety.

Mr Bocchi has concluded a deal with M-Interinvest, the Lugano company which manages the 1,700m (\$324m) of property assets in Italy.

Under the arrangement, which requires the approval of the Italian Treasury, Mr Bocchi is to pay L4bn for an option to take over Europrogramme assets during the next six months.

Mr Bocchi plans to offer Europrogramme's long-suffering 75,000 shareholders the right to convert their certificates into shares in Paoletti, his own holding company which is quoted on the Milan bourse.

Each Europrogramme saver who opts for the solution will receive the equivalent value in Paoletti shares.

Mr Bocchi would then give M-Interinvest at least 50 per cent of the original unquoted certificates in

Europrogramme as payment, with a promise to pay the balance in cash within the next five years.

The Swiss authorities have decreed that the unquoted Europrogramme certificates must be redeemed within five years. This arrangement would allow Mr Bocchi, who also owns the Lazio football team in Rome, to take effective control of Europrogramme without making any initial cash payment.

The Bocchi deal has been organised by Sige, the merchant banking arm of the state-owned IMI medium-term corporate finance institute.

Europrogramme was hit three years ago by the slump in Italy's property market, and the value of the fund (and the share certificates in turn) dropped by 30 per cent, from L1,000m to L700m.

Shareholders in Europrogramme demanded redemptions, and when Mr Bagnasco refused because he did not have sufficient liquidity, many started legal actions, which included investigations of Mr Bagnasco in Milan and Lugano.

Mr Bagnasco resigned last year from Europrogramme and sold off his Ciga luxury hotel chain in Italy to the Aga Khan.

GM sells  
bus-making  
division to  
Greyhound

By Our New York Staff

GENERAL MOTORS has agreed to sell its bus manufacturing operations to Greyhound Corporation, the Phoenix-based financial and manufacturing conglomerate.

The GM bus divisions, which employ about 900 workers in the US and Canada, are among the leading American manufacturers of municipal public transport buses. Greyhound, which recently announced that it was divesting itself of its best-known subsidiary, the Greyhound Bus Lines inter-city transport operation, is the biggest US manufacturer of long-distance buses.

The deal with GM implies that Greyhound plans to play in the bus manufacturing business, despite the loss of the captive market provided by the Bus Lines. It also underlines the highly pragmatic strategy of Mr John Teets, Greyhound's chairman, who decided to pull out of long-distance transport when the Amalgamated Transit Union rejected his demand for sweeping wage concessions.

Mr Teets last month sold the Bus Lines for \$350m to Mr Fred Curry, a Dallas businessman, who has since announced plans to expand the bus network by hiring non-union labour and is expected to remain a major customer for Greyhound's bus manufacturing operation.

For GM, the sale of the bus business results from a decision announced last summer to pull out of heavy truck and bus building. At the time, GM said that its heavy truck and bus operations accounted for a small proportion of its revenue and profits, but no further financial details of the transaction with Greyhound were available.

International Paper lifts  
earnings to \$113m

BY JAMES BUCHAN IN NEW YORK

INTERNATIONAL PAPER, the world's largest paper maker, yesterday reported a sharp increase in fourth-quarter earnings from \$44m to \$113m. Revenues rose 73 per cent to \$1.9bn in the quarter, but these included about \$600m in sales from a new premium paper subsidiary, Hammermill Paper.

US paper companies have experienced a dramatic improvement in profitability over the past nine months because of a stronger market, a weaker dollar and cost reductions. International Paper's pre-tax earnings for the fourth quarter grew almost eight-fold, from \$22m to \$162m.

But foreshadowing what is bound to be a confusing reporting season, International Paper's quarterly earnings of \$2.13 a share, as against 77 cents a share in 1985, are distorted by a number of non-recurring gains and charges. These led to a net pre-tax gain of \$33m, against \$44m in 1985.

The latest quarterly results include a net \$10m pre-tax gain on the sale of International Paper's New York headquarters, an \$11m pre-tax

increase from a change in pension accounting and a \$20m charge to recognize changes in income tax liability as a result of the new tax reform act.

Last year's results were depressed by a \$12m provision for plant closures.

In addition, International Paper took a pre-tax gain of \$22m on the sale of units in a timberlands limited partnership, as against \$60m in 1985.

Earnings for the full year were \$305m, or \$5.70 a share, on sales of \$5.5bn, compared with \$133m, or \$2.16, on sales of \$4.5bn.

Mr John Georges, chairman and chief executive of International Paper, said he expected further earnings improvements this year.

The reduction in the dollar's value has strengthened our export volumes and pricing. The continued growth in the domestic economy has led to excellent demand and improved pricing for most of our major product lines.

A continued programme to reduce costs and lower energy charges also contributed to the 1986 earnings increase.

Union Carbide  
in move to buy  
French group

By George Graham in Paris

UNION CARBIDE is to bid for the French industrial gases group Dufour et Igou.

Dufour's shares were suspended at FFf 556 (\$135), valuing the company at FFf 114m, after the US group's French subsidiary had announced its intention of making the bid.

The purchase would boost Union Carbide's turnover by around 15 per cent and nearly triple its activity in the industrial gases sector, where Dufour has embarked on a heavy investment programme.

The French company is expanding the liquid nitrogen and oxygen capacity at Fabriques d'Oxygène du Sud-Ouest Réunies, its joint venture with Air Liquide near Bordeaux.

Consolidated turnover at Dufour reached FFf 385m in 1985. The main shareholders in Dufour are Iri Midi-Pyrénées, with 20 per cent, and Sociedad Española de Carburos Metalicos with 15.5 per cent, which together took over in 1984 the stake previously held by Pechiney. Family interests are understood to control another 20 per cent.

OCE earnings  
grow by 9%

OCE, the Dutch copier group, lifted net earnings for the year ended November 1986 by 9 per cent to around 71.5m (\$38.8m).

Sales fell 4 per cent to 71.1bn, mainly due to currency fluctuations. Excluding the exchange rate factor.

Oce's board considers the results "satisfactory." However, it warns that the growth of net profit in 1987 could be lessened by costs involved in new product launches, expansion of US activities and further currency movements.

## Salomon syndicate manager resigns

By Alexander Nicks,  
Euromarkets Editor

MS VALERIE THOMPSON, Eurobond syndicate manager at Salomon Brothers International, has surprised the market by deciding to leave the firm after a meteoric career there.

Ms Thompson, 30, resigned for personal reasons and said yesterday that she plans to take six months to consider her future career and to pursue projects unrelated to the Eurobond market, which she has been considering for some years. "I have no immediate plans to join another firm and I have the highest regard and respect for Salomon," she said.

After joining as a teleoperator in London at the age of 16, Ms Thompson rose to head Eurobond trading and was appointed to run new issue syndication last year. Last month, she became a director of Salomon Brothers.

Here was the second resignation among rising Salomon executives this year. Last week, Mr James Wilton-Smith, 34, head of interest rate swaps, left for personal reasons after eight years with the firm. He has also opted to take a break from the market and is seeking a role in a smaller company. Like Ms Thompson's, his departure reflected no dissatisfaction on the part of Salomon and no particular grievance on the part of the employee.

Mr Wilton-Smith yesterday pointed to the rapid expansion at Salomon and change in its corporate style in London. From a partnership with a UK operation of well below a hundred people when he joined, it has become a public company employing nearly 700 in London.

## Go-ahead seen for Euroyen paper market

By Yoko Shibata in Tokyo

THE MINISTRY OF Finance is expected to give the go-ahead for the introduction of a Euroyen commercial paper (CP) market in April. Initially, issuers of the Euroyen CP will be limited to non-resident corporations. Japanese corporations will not be allowed to take part in new issues until spring, 1988.

An official of the International Banking Bureau of the Ministry of Finance said the long-term Euroyen bond market has achieved satisfactory expansion thanks to the implementation of deregulation measures last April. The Ministry believes the restructuring of the Euroyen bond market is almost complete. Euroyen bond issues in 1986 totalled ¥2,900bn, rising more than 1.8 times from the previous year.

The MOF's next task is the establishment of medium-term and short-term Euroyen markets so as to make the Euroyen market more balanced. However, the establishment of the market is likely to spark a debate on who is endorsed to underwrite and deal Euroyen CP between the securities houses and banks.

## Gulf Air sets up \$100m programme

GULF AIR, the government-owned regional carrier, has arranged a commercial paper programme with Gulf International Bank (GIB) totalling \$100m. AP-RI reports from Bahrain.

The move is believed to represent only the second issue of commercial paper by an institution in the Gulf. GIB itself made the first uncommitted Euro-commercial paper issue last year.

Bankers said the paper is being used for cash-management purposes, rather than as a borrowing instrument.

Gulf Air, owned by the governments of Bahrain, Abu Dhabi, Qatar and Oman, has added to shed more than 300 jobs in an effort to expand profitability, the airline employs 5,000 people worldwide, and its chief executive, Mr Ali Al-Malki of Qatar, recently put losses in 1986 at \$25 million (FT 330).

He does not expect a return to profitability until 1988, in spite of the retrenchment efforts.

Officials from Gulf Air or GIB were not immediately available for comment on the commercial paper offering. Bankers said the notes are being issued in \$1m and \$500,000 denominations, with maturities ranging from one week to one year.

## Swedish group to acquire BP offshoot

PIM, the Swedish packaging company, is taking over Edimer Kunstwerke of West Germany, a subsidiary of British Petroleum, writes Our Financial Staff.

Edimer, which had a turnover last year of DM 30m, employs 175 at a factory in Hanover, and

## Dollar weakness sparks interest in Ecu issues

By CLARE PEARSON

EURODOLLAR bonds came under renewed pressure as the currency weakened yesterday. Instead, new issue managers concentrated on the currency sectors of the market.

The Ecu sector has been attracting firm demand from Japanese and some Swiss investors recently, although prices of seasoned Ecu issues were on the retreat. The market reassessed the effects of the European Monetary System realignment last weekend. Prices fell by about ½ point on the day.

Nevertheless, three new Ecu issues emerged. Credit Commercial de France (CCF) lead-managed two of them. The first of its offerings was an Ecu 75m 7½ per cent five-year bond for Caisse Central de Coopération Economique (CCCE), the French state agency. The deal was priced at 101½.

CCF followed this up with an Ecu 100m eight-year 7½ per cent issue for Sumitomo Finance Ltd, guaranteed by Sumitomo Bank. This 10½ bond is swapped into floating rate dollars.

Morgan Stanley meanwhile led an Ecu 50m five-year 7½ per cent bond for Bank Mees en Reue, the Dutch bank. This issue was priced at 101½.

All the issues were quoted at discounts to issue price around the level of their total fees yesterday, although CCCE's bond was quoted at 99½ bid, against 1½ per cent fees.

Elsewhere, Wood Gundy led a £100m 10-year 9½ per cent issue for Sears Canada, the Canadian subsidiary of Sears Roebuck, the US retail chain which also owns Dean Witter Reynolds.

The issue sought to take advantage of recent demands for Canadian dollar bonds, fuelled by the firmness of the currency and the higher yields relative to US dollar bonds, available in the Canadian sector.

But Sears' issue suffered as the Canadian domestic bond market weakened in sympathy with New York, and dealers said in any case it was tightly priced for a relatively long-dated issue. It was quoted at around 98½ bid, against a 10½ issue price. Goldman Sachs' Credit deal for Ford Canada was also under pressure.

The only dollar deal of the day was a \$100m four-year issue for Whitbread Acceptance Corporation, the finance subsidiary of Whitbread Corporation, the US home appliances manufacturer. It was Whitbread's first Eurobond issue and dealers feared European investors would not be familiar with the name.

The 7½ per cent bond, led by Shearson Lehman Brothers International, was priced at 101½ to give a spread over US Treasuries of around 60 basis points at launch.

Hambros Bank led an A\$40m deal for Toronto Dominion Bank. The issue followed a

crop of nine new Australian dollar issues last week, but Hambros said demand for Australian dollar paper was not yet finished.

The three-year 14½ per cent issue was priced at 101½. It was quoted at a discount to issue price of 1½ bid, just outside its 1½ per cent fees.

Salomon Brothers International increased its recent issue for CMO Eurotrust 18, an issue of collateralised mortgage obligations, from \$100m to \$120m.

In the D-Mark market prices were steady in small turnover. The market was hindered by the weaker dollar, putting renewed pressure on the EMS currencies, and the lower US market.

As had been expected, Deutsche Bank led a DM 300m 10-year 6 per cent bond for the European Investment Bank. Dealers said the par-priced bond was in line with the market, and it was quoted at a discount to issue price of 1½ per cent, against 14 per cent fees.

In Switzerland, prices were unchanged in continuing high volume. Voralberger's SF 100m bond gained a ½ point in price yesterday to finish at 100½. Following its SF 200m public issue on Monday, New Zealand returned to the market yesterday with a SF 200m note issue.

The six-year issue has a 4½ per cent coupon and 100½ issue price. It is callable after three years at 101½ and then at declining premiums.

## Bowater in international offer

By OUR EUROMARKETS EDITOR

CREDIT SUISSE First Boston yesterday launched an international share offering for Bowater, the US newspaper manufacturer, and Unisentral, Austria's second largest bank.

Bowater, which was demerged from Bowater Inc. in 1984, is issuing \$1m new shares, representing 10½ per

cent of the expanded fully diluted equity. The total \$1m are being sold in the US through First Boston and the remainder internationally.

The shares will be priced before the end of the month. Yesterday they were trading at \$33½ and the proceeds will be used to fund a US acquisition.

Unisentral, an international general bank as well as the central clearing for Austrian savings banks, which until now have wholly owned it, is making its first public equity offering, comprising 2½m participation certificates, of which all but 1m will be distributed internationally.

## INTL. COMPANIES and FINANCE

Kenneth Gooding on the development spending plans of Japan's largest motor group  
**Toyota keeps faith with new technology**

TOYOTA, Japan's largest automotive group, has no intention of cutting its product development budget—which in 1986 totalled ¥200bn (\$1.27bn)—in spite of the steep fall in profits brought about by the sharp rise in the value of the yen.

The company has unofficially indicated that its profits for the 1986-87 financial year might drop by as much as 60 per cent. Mr Fumio Agetsuma, director in charge of product development, admits that Toyota must economise, "but in other areas."

He suggests Toyota will attempt to maintain its current policy of completely changing each model in its range every four to six years. "It will be difficult but we will try."

Mr Agetsuma promises: "Every new car will incorporate new technology as well as a new shape. The new car will not simply be cosmetic."

He was introducing the new Toyota Camry, the group's first medium-sized front-wheel-drive model which is being launched in Western European markets today.

Toyota claims the Camry outperforms all two-litre European rivals in every important respect with a top speed of 125 mph, an acceleration from 0 to 60 mph in 9.2 seconds, and

The Camry: top speed of 125 mph and urban fuel consumption of 31.7 mpg

fuel consumption of 31.7 mpg in urban conditions.

Introduction of the new model also represents another move up-market for Toyota in Europe—for example, UK prices range from £10,390 to £11,900—but the group believes it can boost annual sales by 50 per cent compared with the former Camry's performance: from 20,000 units to 30,000 a year.

Competitors include the Mercedes 190, the BMW 520i, the two-litre Ford Granada and Sierra models, the Opel Omega/Vauxhall Carlton and the Rover

520SE, among others.

Toyota spent ¥30bn to develop the Camry plus ¥35bn for capital equipment to put it into production.

The development cost included the price of a new 125 bhp, 16-valve petrol engine. Mr Agetsuma says the development of multi-valve engines is Toyota's answer to the paradoxical demand for engines with high power output but low fuel consumption.

Toyota introduced its first multi-valve engine in 1982 and today offers 12 types ranging from 1 litre to 3 litres. Last

year the company produced more than 1m multi-valve engines compared with 660,000 in 1985, taking cumulative output to more than 2m.

Mr Agetsuma estimates that Toyota's car sales in Europe totalled about 400,000 last year. Shipments to the European Community were held at about 267,000 after protests about the Japanese industry's substantial advances early in 1986. Sales in the Community countries were higher than shipments as stocks were run down.

The Japanese Ministry of

Mr Shoichiro Toyoda, Toyota president, said yesterday the group's exports of cars and commercial vehicles are expected to fall from 1.82m units in 1986 to 1.82m this year because of the yen's appreciation against the dollar, tough competition from third developing countries and worsening economic conditions throughout the world. Reuter reports from Tokyo. He said domestic vehicle sales should rise to a record 1.51m this year from the previous peak of 1.75m in 1985. In 1986 exports were 100,000 lower than in 1985.

International Trade and Industry advised the car producers to hold back shipments in the last quarter of 1986 and the ministry's guidance will be critical when Toyota makes final plans for 1987 sales in the EEC, Mr Agetsuma points out.

He says Toyota is still studying the possibility of setting up an assembly plant in Europe but nothing firm has yet been decided. New facilities are being introduced in the US, Canada and Taiwan and "we must first try our best to make those successful."

**Magnum claims 60% of DB**

MAGNUM, the New Zealand liquor and food group, has reached 60 per cent of the issued capital of Dominion Breweries and has made its offer for DB unconditional. Reuter reports from Wellington.

Magnum, itself recently taken over by Brierley Investments (NZ), said in a statement it had received acceptances from more than 2,500 shareholders. This includes the 51 per cent shareholding in DB with which Brierley is linked.

The offer, which closes on January 30, is one Magnum share for each DB share.

Magnum said Mr Ron Brierley, BIL chairman, Mr Bruce Hancock deputy chairman and Mr Paul Collins chief executive, are being invited to join the Magnum board.

**Canberra clears Murdoch on citizenship**

BY OUR FINANCIAL STAFF

THE AUSTRALIAN Government has decided not to use Mr Rupert Murdoch's US citizenship as grounds to block his AS20bn (US\$1.5bn) takeover offer for the Herald and Weekly Times media group.

Mr John Dawkins, the acting

Federal Treasurer, said yesterday the bid was "not contrary to the national interest under foreign investment policy and therefore it was decided that no objections to it be raised."

The ruling leaves open, however, a legal suit brought by Mr Robert Holmes & Court, whose

counter-bid for HWT last week lost the favour of the target company's board after an improvement in the terms offered by Mr Murdoch's News Corporation.

The Victoria Supreme Court yesterday extended an interim injunction granted to J. N. Tay-

lor, Mr Holmes & Court's bid vehicle, ahead of a full hearing next Monday. This prevents Mr Murdoch acquiring more than 15 per cent of HWT—the ceiling for foreign nationals laid down under the country's Broadcasting and Television Act.

**Bonus payout from Kirin**

KIRIN BREWERY, Japan's largest beer producer, is to make a ¥2 bonus dividend for the year which ends this month in order to mark its 80th anniversary. Reuter reports.

Its annual dividend will be ¥9.50 in 1986-87 (against ¥7.50 a company official said).

Kirin had revised its forecast for pre-tax profit in 1986-87 to ¥78bn (¥501.5bn) from an earlier estimate of ¥77bn.

**UIC chief in HK\$346m share sale to Lau group**

BY STEVEN BUTLER IN SINGAPORE

MR OOI HONG LEONG, chairman of United Industrial Corporation (UIC), the Singapore chemical, property and investment company, is sharply reducing his 48 per cent stake in the company with a sale of 32m shares, roughly 30 per cent of UIC, to China Entertainment and Land Investment Company of Hong Kong.

The shares, sold for HK\$346.5m (US\$44.3m), are owned by Mr Ooi's company, Chip Lian Investments, and will be paid for with HK\$346.5m in cash, and the balance by

US\$2m new shares of China Entertainment at a price of HK\$8 per share.

Based on the sale price of the shares, UIC's total worth would be \$478.3m (US\$621.4m).

Evergo, a Hong Kong property and investment company, will, as part of the sale agreement, issue 60m new ordinary shares to be sold to Chip Lian at HK\$1 per share.

Evergo and China Entertainment are both associated with the Lau family of Hong Kong.

All of these securities having been sold, this announcement appears as a matter of record only.

## UK COMPANY NEWS

# Newman Tonks beats forecast with record £8.3m

RECORD pre-tax profits of £8.3m were achieved by Newman Tonks Group in the year to October 31 1986, thus beating the forecast of £8.15m made at the time of the McKechie bid. Profits in the previous year were £6.52m.

The cost of fighting off McKechie Bros' bid was £791,000 and this is shown as an extraordinary item. There was another extraordinary charge of £371,000 which was the closure costs of discontinued activities after tax relief of £76,000 (£170,000).

Turnover of this metal hardware manufacturer rose from £75.5m to £85.3m, and the cost of sales was up from £57.15m to £61m. Other operating expenses totalled £15.56m (£14.03m), and the pre-tax figure was after interest charges little changed at £866,000 (£866,000).

The directors are recommending the forecast final dividend of 4.2p net, which together

with the interim of 3p makes a total of 7.2p (5.5p). The record profits represent a return of 28.7 per cent on shareholders' funds of £28.8m at Oct-31. The group, as forecast, had a positive cash flow during the year, and net bank borrowings at the year-end amounted to £4.36m, being 15.1 per cent of shareholders' funds.

After the heavy tax charge of £2.82m (£318,000), extraordinary items and dividends, which absorbed £3.2m (£2.3m), retained profits were down from £2.65m to £297,000, and stated earnings per share were 1.201p (10.85p) on a nil distribution basis, and 1.201p (1.295p) on a net basis.

The directors said the current year had started with encouraging order levels in most companies and generally more favourable trading conditions than the corresponding period of the previous year.

comment  
As the extraordinary account

shows, Newman Tonks has had a busy last couple of years, making acquisitions and fending off bids. Over the same period, dividend cover has also slipped from the desired twice times to something close to equalling earnings. So while 1986-87 could see some acquisitions in the UK and US—in both the emphasis will be on lock companies—the highly geared group may be inclined to take a breather in the paper race. The earnings per share record over a 10 year period indicates that work could usefully be done to restore pre-1977-78 levels. This year's return (28.7%) for some time a loss-making group, even door closures did well, and knobs and knockers recovered from some stock control problems. Forecasts for this year have been set at £11m pre-tax, including a £1m contribution from the latest US acquisition, Quality Hardware. The shares at 186p look steady enough on a prospective p/e of 11.

## Buy-in at Simon attracts few supporters

By Clay Harris

Mr Philip Ling's innovative management "buy-in" effort at Simon Engineering failed to win the backing of a single additional shareholder in the fortnight to Monday. Tomorrow will be the final opportunity for Valueade, the company set up to mount the bid, to increase or revise the structure of its offer.

It is thought extremely unlikely that the buy-in structure would be abandoned, although a change in the balance of the bid is possible. Schroder, advising Valueade, said yesterday that the offer still had the full support of its original financial backers.

By the third closing date, acceptances received by Valueade remained at 34,287 shares, 0.66 per cent of the company's ordinary capital. It owns or controls an additional 0.42 per cent.

Valueade is offering 199p cash and 10p of its own shares, valued at 186p by its stockbrokers Hoare Govett, for each Simon share, valuing the company at £17.2m. Simon shares fell 5p to 181p yesterday.

Under the buy-in structure, Mr Ling and his fellow executive directors, Sir David Nicolson and Mr Norman Ireland, would take over management of Simon immediately.

They and their financial backers would take possession of a 33 per cent stake in Simon only after Valueade shares rise to 199p.

## Taddale Inv in talks with suitor

TADDAL INVESTMENTS, the industrial holding company, announced yesterday that it was discussing with a fully listed public company a possible bid for Taddale.

Sir Many Finistone, Taddale's chairman, informed the company's annual general meeting yesterday of the bid approach and also said that Taddale would be in the black, without a dividend, when its interim results are released. Taddale, which is traded on the over-the-counter market, made a trading profit of £35,000 in the year to the end of April 1986. It also recorded an extraordinary loss of £1.25m in the previous year it recorded a trading loss of £2m with a further extraordinary loss of £5m.

The company is facing a claim from Swiss bank, Banque Canton de Genève, for £1.7m, but Mr Roy Shumane, Taddale managing director, said he was confident that the claim would fail.

He added that an action brought by Mr David Ling, the former chairman of a company acquired by Taddale, had been settled.

# Imry Property completes £100m merger deal

BY PAUL CHEESEBROUGH, PROPERTY CORRESPONDENT

Imry Property Holdings and Arbutnot Properties Holdings are merging their interests into a new company called Imry International which should have a market capitalisation of £100.3m, and be Britain's 15th largest property company.

The terms of the merger were announced yesterday but overshadowed by an announcement last month that the two companies were in merger talks.

They attracted little attention on the market where the Imry price slid 13p to 395p, bringing it closer into alignment with the cash element of the merger arrangements.

Through the merger, Arbutnot, a private company controlled by Mr Martin Myers, backs into a quoted company, bringing with it extra resources. The Lee family, which has controlled Imry and run it as a property investment company, is being bought out by Imry International will be more oriented towards development than Imry Property.

The new company will have 35.7m shares in issue. Of these 13.67m are for Imry Property shareholders. But Noble Grossart, acting for Imry International, is offering \$90p in cash or loan notes as an alternative. This is being taken up by the Lee family for 96 per cent of its Imry Property shareholding which accounts for 39 per cent of the equity in Imry Property.

The funds to mount this cash alternative are coming from City institutions. But at 390p a share the Imry Property side of the merger is worth £28m.

On the Arbutnot side, the value of its share capital, already issued and being issued to buy about the merger, in Imry International is £47m.

Each Arbutnot share is being exchanged for 2.59 Imry International shares.

The Arbutnot shares, however, comprise those that make up the equity of the company, plus a package of new shares worth £20.15m which is being taken up by institutional investors and then exchanged for Imry International shares, plus again a £10m holding of Boots Pension.

Boots Pension is selling Arbutnot a £12m portfolio of properties for shares which are then being exchanged for Imry International shares.

Imry International is forecasting a pre-tax profit for the year ending March 1987 of not less than £2m and they expect the final dividend for that year to be 5p net. In the following financial year the expected dividend is put at 7.5p net.

The net assets of the new company are put at £81.1m, or 315p a share, but the figures are understated because they do not take into account surpluses inherent in the Arbutnot portfolio.

comment  
The Whewy which reported pre-tax profits of £1.45m yesterday is a very different one from the Whewy which reported losses for five consecutive years to October 1985. Gone is the West Midlands chain maker heavily reliant on sales to the strike-affected National Coal Board; under new management a diversified group has sprung up which relies on manufacturing for only half its turnover. The acquisition of D. F. Bevan last summer has given the group a substantial third leg.

Unithat or limiting the life of the company are two of the possibilities it said. However, as any such proposals would require 75 per cent voting support by shareholders, nothing could be achieved in this direction without Pandia's consent.

According to Morgan Grenfell, advisors to the trust, the latest valuation of the investing in Success Portfolio was 97.64p as of January 9.

# Whewy's £1.4m tops directors forecast

Whewy, the Birmingham-based engineer and forger which has been busy on the takeover front over the past 12 months or so, yesterday revealed that its profits for the 53 weeks to October 4 1986 had risen from a restated £2,000 to £1.45m at the pre-tax level.

Last May, at the time of the proposed offer for D. F. Bevan (Holdings), the directors forecast that profits for the 53 weeks would total £890,000. They are paying shareholders a dividend of 0.5p dividend, their first payment since 1983.

The directors said that Whewy's markets were now particularly well spread with dependence on its traditional market of mining having been reduced to some 7 per cent of turnover. Manufacturing now accounted for around 51 per cent of turnover.

It was pointed out that opportunities for strong organic growth prevailed in a number of subsidiaries and that additional benefits were expected from the group's continued programme of reorganisation and development.

comment  
The Whewy which reported pre-tax profits of £1.45m yesterday is a very different one from the Whewy which reported losses for five consecutive years to October 1985. Gone is the West Midlands chain maker heavily reliant on sales to the strike-affected National Coal Board; under new management a diversified group has sprung up which relies on manufacturing for only half its turnover. The acquisition of D. F. Bevan last summer has given the group a substantial third leg.

## Sturge over forecast with 29% expansion

Seurge Holdings, the biggest independent underwriting agency at Lloyd's, claims, on average, its own earnings for the last year with pre-tax profits up 23 per cent at \$5.5m (27.36m).

The results were "very satisfactory" said Mr David Coleridge, Seurge's chairman. They were, however, "not as good as" the generally poor results reported at Lloyd's for 1983, the last period underwriters have now cleared their accounts, he added.

Coleridge is now proposing a bonus issue to shareholders of one share for every three held by people on the register at the close of business on March 8 1987. The company's shares closed unchanged last night at 474p.

Seurge said profits after tax and minorities were £5.59m (\$4m) in the year to September 30. Earnings per share rose 30 per cent to 20.83p (14.93p). The board recommended a final net dividend of 5p, up 25 per cent on the figure for 1985, payable on January 23.

Directors forecast last June that pre-tax profits for the year would be £3.89m, up with underwriting profits of 19.43p.

The board is to continue however its practice of making a profit forecast when it announces interim figures in June.

Mr Coleridge said that the 1983 Lloyd's accounting year was "the worst of times" suffered by many non-marine syndicates, including two

"This was more than compensated by increased profit commission on the group's other syndicates," he added. "Underwriting agency salaries earned on increased premium income capacity provided a further uplift in income of more than \$19m."

**See-Lox**

**ORCHID TECHNOLOGY**, a Californian-based designer and manufacturer of personal computer accessories, yesterday postponed its flotation on the Unlisted Securities Market minute before a scheduled press conference to announce the

Sponsors Phillips & Drew said the reason for the delay was "technical difficulties" but refused to elaborate on the nature of the difficulties or the likely period of postponement.

In November, T.M. Duche Nut Company withdrew its plans for a quotation because of lack of institutional support. The following month S&P, a authority on the creditworthiness of companies, said that it was offering for sale out of the new issues because it could not complete the flotation by the end of the year and thereby avoid new US capital gains tax provisions. The company's chairman, J. H. Panicker, said that the company was likely to have been about \$20m.

**IN THE** year in which it has gained a full Stock Exchange listing the HunterPrint Group has reported record pre-tax profits of £82.1m against £23.8m previously. Sales rose 30 per cent from \$47.5m to £57.18m for the year ending September 28, the statement's bullish tone pushed the shares up 10p to 358p. The engine of the group remains commercial printing, which has been involved in all the privatisation issues to date and recently won the contract for the News on Sunday colour

The latter division contributed 237m, 67 per cent of total group sales. It increased Scotland's share of sales from 19.5 per cent in 1984 to 23.5 per cent in 1985. The division's contracts won by the division included the corporate headquarters for the London of British Gas at the TSB.

Two acquisitions have taken the group into the financial printing market. These were the Galbraith King Group in May and Security Holdings after the financial year end. Hunter-Print is hopeful about the prospects for this division in the light of the Government's privatisation policy and the promotion of financial services.

Earnings per share were up 14 per cent to 29.14p (25.53p).

● **comment**

At the time of the Security Holdings purchase in October, Hunter-Print forecast that pre-tax profits would hit £3.1m, so these figures were no great surprise to the market. Even so,

**YULE CATTO** yesterday extended its offer for Barrow Hespburn until February 3 after receiving acceptances for 2.67 percent of shares in the chemicals and engineering group.

The diversified plantations, chemicals and building products company said the acceptances indicated "an encouraging level of support" for the £17.5m bid.

With its own holding, Yule Catto now controls 51 per cent of Barrow, which yesterday described the level of acceptance as a total rebuff of the offer.

Barrow shares slipped 4p to 51p but were still above the 52p value of the cash and redeemable preference share offer. Yule Catto shares rose

**Shield Group**, the north London property developer which came to the USM last July, returned profits of \$275,000 pre-tax for the six months ended September 30 1986 and is paying an interim dividend of 1p, slightly ahead of the prospectus forecast.

Turnover for the half year totalled £3.52m.

Turnover for the 1985-86 year totalled £5.87m and pre-tax profits amounted to £31,000.

Trilion, the USM-quoted broadcasting and television production company, has reported a 26 per cent increase in pre-tax profits for the year to the end of September 1986 from \$733,901 to \$926,315.

Mr. A. Hope, chairman, described the year as exciting. Not only had all divisions performed well but there had been very strong and controlled growth. During the period Trilion acquired Limousine and the company had completed a summary sale of three subsidiaries.

Turnover rose by 33 per cent to \$2.58m (\$7.23m). Earnings per 100 shares were affected by the shares issued for the acquisitions and came out down at 0.2p (0.5p). The proposed final payment to shareholders was increased to 0.7p (0.3p) which followed its interim of 0.4p.

Following the year end the company acquired Viewplan.

Mr Hope said it would be the end of the present year before the benefits of the acquisitions would be felt.

## Problems facing Whittaker if he wins fight for MSCC

By IAN HAMILTON FAZEY, NORTHERN CORRESPONDENT

SHARP DIFFERENCES emerged yesterday about what Mr John Whittaker will be able to do with the Manchester Ship Canal Company if, as seems likely, his textiles group, Highams, wins the takeover battle for the canal.

Highams' offer closes today. The company is a statutory one with obligations over drainage and navigation. It has no memorandum or articles of Association but is governed by several acts of Parliament, dating from 1945.

For example, the legislation covers things like the numbers of shares — 4m each of Preference and Ordinary — and caps the total dividend payable to all Preference shareholders at £200,000. Mr Whittaker was yesterday claiming 80 per cent of the Preference and 35 per cent of the Ordinary shares.

Changing many aspects of the company would require an Act of Parliament — but would it need a simple majority to promote the necessary Bill, or would Mr Whittaker have to get 75 per cent of the equity

with him? Mr Nicholas Berry, MSCC chairman and leader of the defence against the Highams bid, says that his legal advice is that a 75 per cent majority would be needed under Parliamentary standing orders.

This would hamstring Mr Whittaker in areas such as financial reconstruction of the MSCC, altering shareholders' rights, issuing new shares, and liquidation, or closure of the loss-making stretches of the waterway, if he could not win support of Mr Berry, a major shareholder, and his institutional allies, such as Globe Investment Trust.

But Mr Whittaker's advice is that there is no mention of a 75 per cent majority being needed in acts of Parliament governing the canal and that 51 per cent would be enough.

Moreover, he expects to have at least 60 per cent of the total equity before today is out. He says that by breaking this down among nominees — voting is weighted to smaller shareholders — he could convert this into 75 per cent of available

votes and obtain the larger majority anyway.

Mr Berry's legal advisers say this is irrelevant. If the 75 per cent figure is correct for promoting a Bill under Parliamentary standing orders, it applies to a general meeting of the capital without regard to weighted voting rights.

Mr Berry's advice is that the weighted rights would come into their own if Mr Whittaker wanted to attempt a scheme of arrangement or reconstruction under Section 425 of the Companies Act.

However, court approval would also be needed and if the minority shareholders did not agree, they could apply to the court for protection.

BROWN SHIPLEY HOLDINGS has completed the acquisition of Stirling Hendry & Co., stockbrokers with offices in Glasgow and Dundee. Prior to the acquisition, the partners of the firm of Stirling Hendry formed a new unlimited company which Brown Shipley has acquired. Consideration is about £4m, payable in cash, shares and loan notes.

## Increased bid for Burns Anderson

By Clay Harris

Burns Anderson shares yesterday failed to keep pace with an increased bid from Dudley, a private company owned by two west Midlands property developers.

Adding 2p to 113p in the market, the shares fell short of Dudley's final 115p cash offer, which puts a £21.5m price on the diversified flat retailer and financial services group.

By the second closing date of Dudley's original 103.5p offer, acceptances had been received representing only 0.45 per cent of shares, although Dudley and an associate controlled a total of 18.78 per cent.

Burns last night was preparing to study the new bid which is open until January 30.

WANDERS (HOLDINGS) is buying Plastics & Resins, based in Wolverhampton for a consideration, which is partly performance-related and not expected to exceed £150,000.

## Sales problems hit London & Clydeside

SCOTTISH housebuilder and property developer, London and Clydeside Holdings made pre-tax profits of £1.74m in the year to September 30 1986, up from £1.65m previously.

Mr Norman Chalmers, chairman of the USM quoted group, said the results were held back by a difficult sales market in Aberdeen, but this was offset partly by strong sales in central Scotland. Group turnover in the period rose 29 per cent from £12.44m to £16.08m.

Exceptional items relating to abortive costs incurred in researching potential acquisitions rose to £61,000 (£26,000). The tax charge was also up from £89,000 previously, aided by tax credits to £730,000.

The final dividend is being raised to 4p (3.5p), making 5.7p (5.5p) net for the year.

The present year did not get off to a strong start. Mr Chalmers said unit sales were below expectations so far. The position had been aggravated by planning delays.

### Comment

Boom-time is over for oil towns like Aberdeen and that is bad news for London & Clydeside, which has around 15 per cent

### Marling rights

Marling Industries' rights issue received in respect of 3.08m shares (88.46 per cent). The remainder has been sold in the market and the net proceeds, subject to a 25 minimum per holding, will be distributed pro rata to provisional allottees.

## Ladbroke property man

At LADBROKE GROUP Mr Anthony G. Long has been appointed head of property finance. Reporting directly to the group chairman, this newly-created post reflects the importance of property activities in the group. Mr Long joined Ladbroke in 1975 and is currently joint managing director of Ladbroke City & County Land, the group's retail property arm. On his appointment he relinquishes his operational role in City & County but remains a director.

LONDON & EDINBURGH TRUST has appointed Mr G. A. Kaye as assistant director. The following are appointed directors of subsidiary companies: Mr R. E. Wicks (LET Retail); Mr G. N. Tipping (LET Industrial); Mr G. A. Kaye (LET Offices).

At LONDON & CONTINENTAL ADVERTISING HOLDINGS Mr R. E. Groves, Mr J. A. Lawrence, Mr G. E. Lee-Steele, Mr P. R. Sawdy, Mr J. L. Wessner and Mr K. Bright have resigned. Mr R. E. Groves, Mr N. Cash, Mr C. J. Daniels, Mr A. D. Stark and Mr G. Bailey have been appointed to the board.

Mr Stephen W. Harrigan has been appointed a director of GNL. Mr Philip Warner has been appointed a director of CHESTNUT & GLOVES. Mr J. M. Stormonth-Darling has been appointed a director of the ORION INSURANCE CO. He is also chairman of Mercury International Group.

At JAMES HALSTEAD GROUP Mr David Lowe has been appointed managing director of Conway Leisure Products, a subsidiary. He was formerly deputy managing director.

Mr Robin Milne has been appointed a director of ASTLEY & PEARCE (EUROCURRENCY DEPOSITS).

CAMPING GAZ (GB) has appointed Mr Peter Knibbs to the positions of chairman and managing director. He previously held the appointment of finance director, a position he occupied since becoming a founder director of the company in 1974.

The roofing and insulation division of EYODE GROUP has made three appointments. Mr Keith Bradford-White joins Tekurat Insulations from Collog Purboard as director of sales. A new director of sales has been appointed at Eyode Roofing. He is Mr Miles Cronin, formerly a member of the sales team at Permamix. Mr Andrew Beaumont has been appointed as marketing manager at Tekurat Insulations, has taken on additional responsibility as director of marketing for the roofing and insulation division, which also includes Eyode Joist Sealing and British Roof Mart.

At the STRATEGIC PLANNING SOCIETY Mr Adrian Davies has succeeded Mr Peter Beck as chairman. Mr Beck becomes a vice president. Mr Davies is a divisional director and company secretary of International Military Services. Mr Beck was planning director of Shell UK until his retirement in April 1984.

ROBERT E. LOWE has been appointed Mr Paul A. Lee as deputy chairman. He joined the board in February 1983 and is a partner with Addleshaw, Sons & Latham. Mr Derek Hill has been appointed chief executive of Robert E. Lowe. He joined the board in January 1984 and has led the executive team since November 1984.

J. HENRY SCHROEDER-WAGG & CO. has appointed Mr Richard

Mr Stephen Otterburn has been appointed finance director to the board of TULLETT & TOKYO FOREX INTERNATIONAL. Mr Nick Hoare becomes a director of Tullitt & Tokyo (Currency Deposits) Co. Mr John Siskles is made a director of Tullitt & Tokyo Securities.

### SUMMARY OF RESULTS

FOR THE YEAR ENDED 31st AUGUST 1986

	1986	1985
Turnover	£2,261	£2,007
Profit before taxation	1,293	56
Taxation	(464)	38
Profit after taxation	829	94
Extraordinary items	1,193	(107)
	2,022	(13)
Preference dividend	(209)	(209)
Profit retained	1,813	(222)

### KEY POINTS FROM THE REVIEW OF THE CHAIRMAN, MARTIN SHAW, LL.B.

- Earnings per share 29.51p (1985 loss 5.4p)
- Leading position in caravan manufacturing consolidated
- New model launches well received by public
- Extraordinary gains of £1.487 million from disposal of two properties
- Elimination of loss-making activities completed

## Falklands to announce fish licence awards

By Robert Graham

A LIST of successful applicants for fishing licences in the 150 mile fisheries conservation zone around the Falklands is expected to be announced later this week, according to the Falkland Islands Government. The fisheries conservation zone is due to be introduced on February 1, coinciding with the opening of a new fishing season in the South Atlantic.

The British Government's justification for the introduction of the licence system is to conserve fish stocks, principally squid, but the new scheme is also designed to bring revenue to the Falklands. It is estimated that income in the first full year will be between \$5m and \$8m. The licences run until June 30 and apply to individual vessels based on the type of fishing gear and size.

Last year it was estimated some 360 vessels were fishing during the season, their main countries of origin being the Soviet Union, Poland, Spain, Japan, South Korea and East Germany. The main interest in the licence awards will be whether owners of vessels from countries that are sympathetic or supportive of Argentina's claim to the Falklands will apply. However, where possible, applications are not being treated on a Government basis but by vessel ownership. It is understood that the Soviet and Bulgarian, both of whom have fishing agreements with Argentina, have not applied. However, Poland apparently has applied in the names of individual vessels.

## Rubber demand and output rise in 1986

WORLD RUBBER consumption (natural and synthetic) rose by 1.3 per cent last year to 12.56m tonnes, according to the International Rubber Study Group. Natural rubber consumption rose by only 0.5 per cent, compared with 1.5 per cent for synthetic, and its share of the total fell slightly to 52.3 per cent.

Synthetic rubber also made the pace on the production side with output increasing by 2.1 per cent to 6.2m tonnes against natural rubber's 1.2 per cent to 6.4m tonnes. Overall production outstripped consumption by 30,000 tonnes in 1986 after being in deficit by 56,000 tonnes in 1985.

In the US meanwhile the International Institute of Synthetic Rubber Producers said total new rubber consumption in November fell by 1 per cent in 1986.

## LME row brews over fund segregation

By Andrew Gowers

FRESH differences emerged yesterday among members and users of the London Metal Exchange (LME) over proposed reforms to its structure.

The dispute, concerning the treatment of trade clients by dealing members of the market, annoyed the LME authorities and threatened to introduce further complications into negotiations between the exchange and City regulators at a time when both sides thought they had resolved the bulk of their problems.

It surfaced an LME members' and users' meeting Sir Kenneth Barrill, chairman of the Securities and Investments Board, and other senior regulators to discuss far-reaching proposals to change the market's trading structure, which it needs to invest funds in segregated accounts as required by SIB rules, but that the exchange's traditional trade clients — metal companies — could opt out of such segregation if they

wished. If they did, they would be able to trade freely on credit as they currently do, but they would not enjoy the full protection afforded to private clients.

Yesterday, however, Mr Christopher Sharpley of brokers GNI suggested that trade clients should be able to keep segregated accounts and trade on credit. Whilst some trade representatives — who would benefit greatly from this proposal — backed the idea, the LME authorities and a number of ring dealing members were distinctly unenthusiastic. Some voiced the fear that it would swiftly concentrate LME business in the hands of a few strong capitalised members which could afford to extend large amounts of credit under the proposed system, and sap the exchange's already depressed trading volumes still further.

SIB representatives said they would consider such an idea if it were put to them by the exchange. But Mr Michael Brown, LME chief executive, and Mr John Wolf, its new committee chairman, said later that they would strongly resist it.

Members of the London Commodity Exchange, which operates markets in coffee, sugar and cocoa futures, yesterday deferred a decision on the admission to membership of "locals" or individuals trading on their own account. At a special meeting called to discuss the issue, a formal vote was postponed as a result of poor attendance owing to the cold weather. However, the exchange authorities promised to hold a postal vote.

## Protectionism looms in US uranium industry

By David Owen in Chicago

THE WAVE of protectionism gathering momentum in a number of US markets may be poised to overflow into the domestic uranium mining industry.

Interested onlookers are keenly awaiting a decision by Denver's 10th Circuit Court of Appeals on whether to uphold a lower court ruling which would prohibit the US Energy Department from processing imported uranium.

Any restriction on the treatment of foreign material, which in 1986 held an estimated 40 per cent of the US market, is widely expected to boost depressed domestic ore prices and aggravate current trade tensions with Canada, the principal non-US supplier.

"If the restriction is upheld at the 100 per cent level, I think US prices will rise substantially in the short term and continue higher," says Mr George White, a managing broker with Nucor, a Denver-based consultant.

In the 100 per cent case, we could be talking in excess of \$50 per pound," he adds. The widely-quoted Nucor exchange value for spot market transactions currently stands at \$18.75 per pound of uranium oxide (U3O8), down from a 1978 high of \$43.40.

The depressed world market and low-cost foreign competition have pushed the domestic uranium mining industry, the viability of which the US Government is required to safeguard in accordance with a clause in the Atomic Energy Act, into protracted recession.

Total 1986 output was approximately 11.3m pounds of U3O8, down nearly 30 per cent from the year earlier level and the fifth consecutive annual decline. Clearly, a sustained period of higher prices would prompt the restart of some shuttered capacity and may even lead to the opening of new mines.

"There would be some re-starts. But often it may be more economical to start new operations," says Nucor's Mr White. "As prices came down, a lot of producers tended to high grade and some of the mines will have been allowed to shut," he adds.

One facility which would probably resume operations in the event of a sustained price rise is Atlas Corporation's Moab mill in Utah. "If the price went to \$25 a pound, we would be tempted to get going again," according to Mr Edward Farley, the company's chairman.

## US may offer cut price grain to China

By Nancy Dunne in Washington

THE REAGAN Administration is now debating a plan to offer subsidised grain to China in order to defend its market share against European suppliers.

Some officials are said to be urging the US offer to extend, the export enhancement programme (EEP) to China, where the US has been losing business, mostly to the Australians, since a dispute arose over Chinese exports of textiles to the US. Under the EEP, the US subsidises the price of American grain by providing bonus commodities from Government stocks for sale.

The National Association of Wheat Growers said American farm groups had been particularly concerned about reports that China had bought 350,000 tonnes of French wheat for delivery this year at \$1.50 a bushel.

"We feel it is important to make a stand against new market losses now," an official said. "Europeans don't have to bid a piece of the market, but we want to wait until they have the market and then try to get it back."

The EEP programme has been used almost exclusively in cases where the US wants to challenge European suppliers to highly subsidised grain. However, the US last summer offered the Soviet Union 3.5m tonnes of subsidised wheat, saying Moscow had promised to buy that amount under a long-term grain agreement but that US prices were too high.

The Soviets never took advantage of the US offer, and the Reagan Administration received criticism from both sides for offering cheap grain to Communists, and the Chinese who buy.

A US Department of Agriculture team is now in China. Some Administration officials had hoped for a decision to offer the EEP during the trip. However, it has been made yet, although the top-level trade policy council has discussed the issue. The State Department is said to be opposed to the offer out of concern over injury to other exporting nations, which are not beneficiaries of the scheme.

Mr Bill Lane, US Ambassador in Canberra, has accused Australia of over-reacting to further subsidised grain being sent to Saudi Arabia, writes Chris Sherwell in Sydney.

Ministers had claimed that proposed sales amounting to 1.25m tonnes were contrary to their understanding about US plans for marketing barley in the current year, and would undermine Australia's markets and prices.

Mr Lane said the complaints were untrue. US subsidies were not aimed at Australia but at the EC, he added.

Meanwhile the Bureau of Agricultural Economics has confirmed that Australia will produce its fourth largest wheat crop this season.

## LONDON MARKETS

THE LONDON Metal Exchange's cash lead price came under further pressure yesterday as the recent squeeze on nearby supplies continued to unwind. A 222 fall left cash prices at \$290.50 a tonne and trimmed the premium over three months lead, which a week ago topped \$40 a tonne, at only \$3.75. Dealers said the narrower premium resulted in part from free "leading" (selling cash and buying forward). At the London Commodity Exchange meanwhile coffee prices lost more ground under pressure from persistent speculative selling. A late rally left the May position only \$10 lower at \$1,537.50 a tonne — having dipped to \$1,580 at one stage — but the prompt January position closed with a \$27.50 gain on the day at \$1,575 a tonne, re-establishing the normal situation of the prompt quotation being at a discount. Cocoa prices dipped to six-month lows in early trading before rallying on short-covering and manufacturer buying. But the gains were trimmed back towards the close.

LME prices supplied by Amalgamated Metal Trading.

## US MARKETS

EARLY WEAKNESS in the dollar saw the metals trades slightly higher initially but as the US currency strengthened, and oil prices declined, gold, silver, copper and business futures reacted on the downside, but in light volume, reports Draxton Burnham Lambert. Early trade buying steadied gold, but commission house selling, profit-taking and trading selling took prices back to initial support areas around the \$480.00-485.00 level, basis February. Platinum held barely steady on trade buying, but weakened on commission house selling before local support at lower levels. The only major feature in copper was a weakening of the March-May switch as traders sold March, reflecting concern over the large open interest in that month. Silver stabilised on commission house buying before local sold the market down. Crude oil weakened as profit-taking emerged but short-covering and light trade buying pared losses. Trade and producer selling in the face of price-fix buying and short-covering kept coffee futures on the defensive while Brazilian price-fix selling at the high stiffened an advance in cocoa after light commission house steps were touched off. Light commission house buying steadied sugar futures.

## Record gilt volume

from an opening of \$8.30 before closing at \$8.21 down from \$8.35 on Monday. With sterling losing ground, any lingering hopes of lower cash rates disappeared. However, later dated contracts were marked down to a lower level, suggesting that the market viewed the longer terms with lightly less pessimism.

US Treasury bonds and Euro-dollars were a little weaker on the dollar's fall but there appeared to be little follow through selling. In addition, the percentage high overnight Federal funds rate was depressing values.

Jan 26 Feb 5 Feb 6 Feb 16

\* New time dealings may take place from 9.00 am two business days earlier.

The Arctic weather conditions now gripping most of Europe made their impact on the UK securities markets yesterday when a powerful advance in oil stocks took the equity market to yet higher ground.

With world oil prices challenging \$19 a barrel, there was heavy demand for British Petroleum and Shell, while British Gas rose to its highest level since the public flotation.

Traders felt the effects of the icy weather in the UK in other ways—market trading began to falter in late afternoon as City men braced themselves for agonisingly difficult homework on London's computer lines.

The equity market opened strongly after the latest public opinion polls reported favourably on the Government's chances of re-election. It was soon clear that oil shares, together with those of exporting companies likely to benefit from the realignment of European currencies, were providing the impetus.

At its best, the FT-SE 100 index was nearly 19 points up, but the gain was sharply cut back towards the close as Wall Street made an uncertain start. The final reading of 1763.3 on the FT-SE 100 showed a net gain of 7.7 to another new peak.

A gain of 4.5 took the FT ordinary index to 1298.9 putting it within 30 points of the all-time high reached in April last year. UK institutions were heavy buyers across the range of the market. With North Sea oil prices firmly established above \$18 a barrel, British Petroleum and Shell were the main beneficiaries of a strong price gain and turnover of 13m shares. British Gas (115m shares) jumped 2 1/2 to 429 1/2, with all market-makers signalling willingness to trade in large blocks of stock. Equally strong were British Petroleum (7.3m) and Shell (3.3m). Gains were reduced in late trading.

Among the blue chip industries, Imperial Chemical started as domestic investors responded to the likely profit benefits of the sharp fall in sterling/DM rate. ICI attracted European buyers also, as a major Continental chart predicted that the shares will rise to £15. Also wanted on chart considerations, Beecham moved up strongly.

The gilt-edged market, however, was unsettled by the fall in the sterling exchange rate index, and prices tumbled by 1 1/4 points at the longer end. Selling was steady rather than heavy, and traders ascribed the downward move to profit-taking after the pre-Christmas upturn.

However, the reaction in Gilts indicated underlying nervousness towards the sterling rate. Mr K. Skeoch, economist at James Capel, London stockbroker, believes the pound could come under pressure in the spring when demand for oil weakens.

Gilts also took more heed than

equities of the report yesterday that the United Arab Emirates have sharply exceeded Opec-agreed production quotas.

Midland easier

Apart from Midland which relinquished a further 2 to 58p on fund-raising worries, the major clearing banks made good progress. Inter-market activity was at 40p, while the shares 15 higher at 40p, after 40p, while Barclays added 10 to 52p, NatWest closed 10 dearer at 55p, with sentiment here helped by news of the record profits achieved by its NatWest Bank USA subsidiary. TSB hardened a fraction to 76p; the preliminary results are scheduled for January 29. Merchant banks were quieter than of late although a firm underwritten was maintained. Morgan Grenfell, re-centred on London, let on Nomura Securities bid speculation advanced 5 more to 40p; the group has set up an internal committee to review its entire organisational structure and management reporting systems. EMI remained excited by the stakes recently taken in the company by Australian groups, NZI and PAB, and moved up a penny more at 48p. Benchmark added 2 more at 50p on further consideration of the merger with Charlton Seal Dimmock, a London and Manchester-based firm of stockbrokers. Among Hire Purchases, Provident Financial moved up 8 at 51p on revived bid hopes.

Fears of heavy claims arising from the current spell of arctic weather conditions in the UK continued to deter support of Composite Insurances. Consequently, prices drifted lower with Commercial Union and Law rose 3 ahead at 28p, while RMC reflecting a stock shortage, gained 7 to 74p. Recently overvalued Rugby Football Club moved up 10 to 15p, but Blue Circle encountered profit-taking and settled 8 lower at 71p. ICI continued to attract domestic and US support ahead of the results due next month and rose 12 to 13p, after 1.18p. Other bright spots in the Chemical sector included Warrle Stearns, 10 higher at 38p and Hickson International, 17 to the good at 47p. Bechtel moved up 10 to 15p and Allied Colloids also rose 10 to 25p. Colloid gained 10 to 31p on increased sales hopes as cold weather continued to sweep the country.

Dixons nervous  
Retailers finished no better than mixed-feelings that the current cold snap could have a severe impact on sales obviously played its part in depressing investment enthusiasm. A lively business developed in Dixons—some 8m shares changed hands—amid strong rumours that the announcement of a half-share issue would be accompanied by a vendor placing to finance an off-moored US acquisition. Dixons finally settled 13 cheaper at 33p, while suggestions that the company is to dispose of its 10% stake in Woolworth—the remains of last

year's abortive bid—left the latter 15 down at 85p. Costa Victoria, responding to a broker's bullish circular, advanced 4 in a relatively narrow market to 52p.

Fessey returned to prominence in Electronics, rising 7 to 17p on institutional support during the course of an active session as over 11m shares changed hands. BICC, meanwhile, continued to reflect a broker's recommendation with a fresh gain of 5 at 30p. Elsewhere, speculative buying was evident in Farrell which gained 10 to 21p. Oxford Instruments 9 to the good at 40p and Unilever 5 better at 22p. Bewick rose 8 at 50p and Western Selection put on 6 at 81p.

Price movements in Engineering generally favoured holders. Speculative buying lifted Mather Ball 9 to 17p and F. S. Ratchford 7 to 12p. Tynock remained a firm market at 18p, up 10, while Heston improved 4 ahead at 5p. Williams Reardon edged forward a penny at 16p.

Food Manufacturers gave another bright performance, and Lyle rose 5 to 65p. Unigate added a penny to 33p. Retailers showed Tescos 3 higher at 42p as the company withdrew from the auction to acquire Sainsbury's UK supermarket operation. Asda considered the favourite to conclude a deal with Sainsbury, added 4 to 34p.

Leading Hotels failed to participate in the latest market upturn. Grand Metropolitan shed 2 to 40p, while Travelodge, whose annual results due tomorrow, lost at 15p. Ladbrokes shed 9 to 38p in the wake of the latest US property acquisition of some 274m. Norfolk Capital, in talks with Scottish and Newcastle Breweries, added a fraction to 31p.

550p. John Mewless, however, softened 2 to 37p on news that the company had realised £25m after expenses through the sale of Glasgow Stockholders Trust. Helical Bar rose 7 to 48p as TR Property Investment disclosed a 5.8 per cent stake. Anglia Securities moved up 8 at 51p on revived bid hopes.

Fears of heavy claims arising from the current spell of arctic weather conditions in the UK continued to deter support of Composite Insurances. Consequently, prices drifted lower with Commercial Union and Law rose 3 ahead at 28p, while RMC reflecting a stock shortage, gained 7 to 74p. Recently overvalued Rugby Football Club moved up 10 to 15p, but Blue Circle encountered profit-taking and settled 8 lower at 71p. Asda considered the favourite to conclude a deal with Sainsbury, added 4 to 34p.

Leading Hotels failed to participate in the latest market upturn. Grand Metropolitan shed 2 to 40p, while Travelodge, whose annual results due tomorrow, lost at 15p. Ladbrokes shed 9 to 38p in the wake of the latest US property acquisition of some 274m. Norfolk Capital, in talks with Scottish and Newcastle Breweries, added a fraction to 31p.

Valer reflected the current freezing weather with a rise of 9 at 28p. NAW Computers gained 20 at 24p and British Biotech moved up 13 at 18p. Centenary Industries, on the other hand, lost 4 at 38p in reaction to a newspaper's "take-profits" advice.

Television issues made smart progress following excellent results from Television South. TS closed 5 higher at 28p, but more spectacular gains were seen in Thames, finally 19 at 34p and LWT, 24 higher at 48p. Anglia rose 12 to 35p, TV-am 7 to 23p and Ulster TV 7 to 9p.

Motor Distributors continued to present a list of other subsector options, most of which, however, were attributable to stock shortage. C. D. Bramall advanced 14 to 16p, while Lex Service put on 10 to 13p. T. C. Ware, in receipt of a call option business, closed 11 to the good at 22p. Elsewhere, Jaguar encountered sporadic offerings and dipped 4 to 38p, but renewed speculative interest lifted ERF 7 to 6p.

Paper/Printing provided a noteworthy firm advance in the market, which advanced 10 to 35p following the sharply increased annual profits and dividend and consideration of the confident tenor of the chairman's policy Commission decision. Occasional interest in a limited market resulted in a gain of 15 to 37p for James Crepper, but British Printing and Communications came on offer and dipped a few pence to 26p. A quiet session for Agencies prompted few movements of note, although Gold Greenless Trot, scheduled to reveal interim figures next Monday, fell 7 to 21p.

Leading Property issues moved narrowly, but secondary issues displayed several noteworthy movements. Iury settled 13 lower at 38p following details of the agreed merger with Arbutnot Properties, while Shield fell 15 to 17p on disappointment with the half-year figures. Profit-taking allowed 8 front recent high-fliers. Bournemouth Stadium at 32p, but revived demand lifted Arlington 12 to 20p and Reseaching 10 to 85p. Demand in a restricted market, however, lifted Walker 8 to 19p, while Scottish Metropolitan added 3 to 38p following a broker's circular.

In Tobacco, B&B responded to sizeable transatlantic interest. In the market, which advanced 10 to 35p following the sharply increased annual profits and dividend and consideration of the confident tenor of the chairman's policy Commission decision. Occasional interest in a limited market resulted in a gain of 15 to 37p for James Crepper, but British Printing and Communications came on offer and dipped a few pence to 26p. A quiet session for Agencies prompted few movements of note, although Gold Greenless Trot, scheduled to reveal interim figures next Monday, fell 7 to 21p.

Profit-taking allowed 8 front recent high-fliers. Bournemouth Stadium at 32p, but revived demand lifted Arlington 12 to 20p and Reseaching 10 to 85p. Demand in a restricted market, however, lifted Walker 8 to 19p, while Scottish Metropolitan added 3 to 38p following a broker's circular.

In Tobacco, B&B responded to sizeable transatlantic interest. In the market, which advanced 10 to 35p following the sharply increased annual profits and dividend and consideration of the confident tenor of the chairman's policy Commission decision. Occasional interest in a limited market resulted in a gain of 15 to 37p for James Crepper, but British Printing and Communications came on offer and dipped a few pence to 26p. A quiet session for Agencies prompted few movements of note, although Gold Greenless Trot, scheduled to reveal interim figures next Monday, fell 7 to 21p.

Leading Property issues moved narrowly, but secondary issues displayed several noteworthy movements. Iury settled 13 lower at 38p following details of the agreed merger with Arbutnot Properties, while Shield fell 15 to 17p on disappointment with the half-year figures. Profit-taking allowed 8 front recent high-fliers. Bournemouth Stadium at 32p, but revived demand lifted Arlington 12 to 20p and Reseaching 10 to 85p. **When will it dawn  
on you?**

In many of North America's major business centres, coast-to-coast, the Financial Times is being delivered *in time for breakfast*. It's an eye-opening development... made possible because the FT is now printed in the U.S. Transmitted from London via satellite each evening, it goes on press during the night and is ready for distribution before midnight. Imagine. For the first time, you can get the FT when you need it most: *before* the pressures of business start to encroach on your time. As the day begins you'll be in touch with the same developments your colleagues overseas are reading about. You won't have to play catch-up. And that, as we all know, makes all the difference in the world. Between financial opportunities realized...and opportunities lost. Here are the cities where the FT is available by hand-delivery each morning. Atlanta, Boston, Chicago, Dallas, Detroit, Miami, Houston, Los Angeles, New York, Philadelphia, Pittsburgh, Seattle, San Francisco, Washington, Montreal and Toronto. On the list? Good. To arrange for your personal subscription, call 212-752-4500. When the FT starts arriving on your doorstep, it may well be the dawn of a new era for you...in being ahead of the crowd.

## WORLD STOCK MARKETS

### WALL STREET

## Struggle to extend advance

STRUGGLING to overcome the negative effect of lower bond prices, Wall Street stocks just managed to extend their winning streak to an eighth session yesterday, writes Roderick Oram in New York.

Overwhelmingly bearish sentiments in foreign exchange markets about the continuing fall of the dollar pushed down bond prices although domestic economic considerations prevented a share sell-off.

The Dow Jones industrial average closed up 3.52 at 2,012.94. It started the day slightly below its previous close, recovered to a modest gain then turned lower before creeping back to a gain for the day.

It was the most hesitant day the markets have experienced so far this year. Volume moderated to 171.7m shares with advancing issues only just outnumbering declining. The New York Stock Exchange composite index eased back 0.17 to 149.14 while second tier stocks also faded with the American Stock Exchange all share index slipping 0.07 to 287.73.

Crucially, without the help of one stock, the Dow would have been unchanged on the day. Owens-Illinois rebounded 3 3/4% to \$54 1/2 after losing more than \$4 on Monday. It received an improved buyout offer of \$80 a share from Kohlberg Kravis Roberts, the leading leveraged buyout specialists. The glass maker rejected an earlier offer of \$55 a share.

Among other Dow industrial stocks, AT&T was off 5/8% to \$25, Eastman Kodak was up 1/8% to \$72 1/2, General Electric rose 3/4% to \$90 1/2, General Motors lost 3/4% to \$68, Merck eased back 3/4% to \$128 1/2 and United Technologies was unchanged at \$47 1/2.

IBM continued its fall of recent days losing 3/4% to \$116 1/4, a growing number of analysts have been further cutting their earnings forecasts on the belief the computer group's problems will persist this year.

In contrast, Digital Equipment rose further, adding 1 1/4% to \$118 1/2. Earnings are growing fast following the total replacement of its product line over the past 12 months. Among other computer makers, Unisys added 5/8% to \$87 1/2, Prime edged down 5/8% to \$19 1/2, Cray Research dropped 1 1/4% to \$83 1/2 and Tandem rose 5/8% to \$41 1/2 on the over-the-counter market.

The fourth quarter results season began to pick up speed with International Paper reporting net profits of \$2.13 a share against 77 cents a year earlier. Its shares rose \$2 to \$83 1/2. Mellon Bank fell 1/4% to \$54 1/2 after turning in a fourth quarter net of 42 cents a share against \$1.57. Irving Bank dipped 5/8% to \$36 1/2 on quarterly profits of \$1.65 against \$1.49.

Oil groups were mixed after sharp gains on Monday. Chevron slipped 5/8% to \$49 1/2, Texaco fell 1/8% to \$38 and Standard Oil eased 3/4% to \$57. In contrast, Exxon was up 5/8% to \$75 1/2 and Amoco edged up 5/8% to \$71 1/2.

The discount rate on three-month Treasury bills eased one basis point to 5.35 per cent, was unchanged on six-month bills at 5.41 per cent and slipped one basis point on year bills to 5.45 per cent.

With no fresh economic data until today's retail sales figures, the market was influenced by the further decline of the dollar. The attitude towards the US currency in foreign exchange markets remains very bearish, particularly after European central banks failed to intervene as expected yesterday.

Both the credit and foreign exchange markets believe the weakness of the US economy in the first quarter will prompt lower interest rates. Whereas this is viewed negatively in currency terms because it would diminish the appetite of foreign investors for US securities, bond markets can take some countervailing encouragement from the positive domestic effects of lower interest rates.

In addition, foreign participation in Treasury financings will not be quite so crucial this quarter as in recent ones because healthy Treasury cash balances will reduce the volume of new securities offered.

### LONDON

ENERGY SHARES fuelled another rally in London yesterday as most of Europe remained in the grip of severe weather. As oil prices nudged \$19 a barrel, heavy demand developed for British, BP and Shell while British Gas hit its highest level since flotation.

The FT-SE 100 index, up an early 18 points, finished the day 7.7 stronger at a peak of 1,763.3 while the FT Ordinary edged close to its record high with a further 4.5 gain to 1,393.9.

Aggressive institutional buying focused first on British up 9 1/2% to 189p on 13m shares while BP jumped 16p to 77p on 7.5m shares and Shell with 3.3m shares changing hands added 5 1/2% to 109 1/2. British Gas sprinted 2 1/2% to a peak 89p on 11.5m shares.

The gilt edged market was unsettled by the fall in the sterling index and prices tumbled by 1 1/2 points at the long end. Selling was steady rather than heavy and traders ascribed the downward move to profit-taking after the pre-Christmas upturn.

Chief prices changes, Page 35; Details, Page 34; Share information service, Page 32-33

### AUSTRALIA

HIGHER GOLD and oil prices pushed Sydney to yet another record high and boosted the All Ordinaries index 4.3 to 1,553.6. Industrials followed the early surge but late weakness in the Australian dollar depressed some leading blue chips on interest rate concerns. Turnover surged to 183m shares worth A\$321m.

Strong European buying of gold issues was evident and helped to underpin the 50-cent gain in Central Norseman at A\$16.30. Kalgoolie closed 20 cents higher at A\$16.50 while Kidston managed to hold a 10-cent rise to A\$2.20.

Banks saw broad falls on fears of higher interest rates with ANZ off 12 cents to A\$5.86, National 8 cents cheaper at A\$5.24 and Westpac 3 cents down at A\$4.92.

### HONG KONG

HEAVY TECHNICAL selling by foreign institutions depressed Hong Kong and drove the Hang Seng index 24.04 lower to 2,590.83.

Trading was suspended in Evergo and its China Entertainment associate amid speculation that the group was planning a major Singaporean share transaction. Evergo last traded at 96 cents and China Entertainment at HK\$7.95.

HK-TVB, in which trading resumed, posted a HK\$1.40 rise to HK\$12.90 while Shaw Brothers dipped 2 1/2 cents to HK\$4.53 1/2.

### SOUTH AFRICA

PROFIT-TAKERS halted the recent record run among Johannesburg gold shares as the bullion price hovered under \$410 an ounce.

The All-Gold index dipped to 2,100, a drop of 17 points, in what many brokers described as a brief pause in the market's broad advance.

Southvaal finished unchanged at R209, Randfontein lost R5 to R435 and Western Deep Levels at R193 was R1 cheaper.

### SINGAPORE

A FLURRY of domestic and overseas buying prompted solid gains in Singapore and left the Straits Times industrial index up 4.07 to 955.55 on turnover of 49.5m shares.

The buying spree was halted temporarily due to reports that Prime Minister Lee Kuan Yew was in Hospital. Lee's condition was later described as "not serious."

### CANADA

A brisk sell-off in Toronto gold stocks partly offset a strong rally in oil and gas issues.

Dome Petroleum gained 8 cents to C\$1.07, Ranger traded C\$4 higher to C\$7 1/2 although Imperial Oil Class A shed C\$4 to C\$33 1/2.

In Montreal, industrials and banks made the best gains as utilities firmed slightly.

### TOKYO

## Yen upturn blunts enthusiasm

THE YEN'S sharp upswing depressed investor enthusiasm in Tokyo yesterday and drove share prices sharply lower, writes Shigeo Nishiwaki of Jiji Press.

Blue-chips, domestic demand-related issues and pharmaceuticals fell on a broad front, while some issues with hidden incentives drew popularity.

The Nikkei average lost 124.97 from the previous day to 18,544.05. Volume decreased to 378m shares from Monday's 403m. Declines outnumbered advances by 597 to 238, with 146 issues unchanged.

Despite the Bank of Japan's dollar-buying and yen-selling market intervention, the dollar continued its downward slide on the Tokyo foreign exchange market, closing ¥2.05 lower at ¥156 to the dollar. This sent institutional investors to the sidelines and individual investor buying dwindled.

Blue chips were the hardest hit by small-lot selling sparked by the strong yen: Matsushita Electric Industrial lost ¥80 to ¥1,870, NEC ¥40 to ¥1,890 and Fuji Photo Film ¥40 to ¥3,480. Hitachi slipped below ¥1,000 to finish at ¥991, down ¥9.

Pharmaceuticals, which performed strongly toward the year-end, continued to ease. Sankyo fell ¥30 to ¥1,610, Dai-nippon Pharmaceutical ¥30 to ¥3,490 and Shionogi ¥40 to ¥1,550.

Tokyo Electric Power gained ¥150 at one stage, bolstered by buying by major securities house dealers, but came under selling pressure later to close ¥20 higher at ¥7,620. Tokyo Gas ended only ¥10 higher at ¥1,080.

Construction issues fared poorly, with Obayashi falling ¥9 to ¥906 and Taisei ¥5 to ¥892.

Also lower were many financial issues which acted as a prime mover driving the Nikkei average to an all-time high of 18,544.05 on January 6. Toido Marine and Fire declined ¥30 to ¥1,610 and Sumitomo Bank ¥50 to ¥2,590.

Dainippon Ink and Chemicals topped the active list with 28.17m shares changing hands and ended ¥13 higher at ¥630 after gaining an early ¥30. Its popularity mirrored investor appraisal of the company's positive overseas strategy, exemplified by its purchase of a US printing

ink manufacturing group.

Fujitsu surged ¥45 to ¥805 on rumours of its shares being bought by a speculative group. Press Kogyo gained ¥61 to ¥448.

Yodogawa Steel Works advanced ¥14 to ¥509 on the strength of its plan to make effective use of idle property, while Nittetsu Mining finished ¥30 higher at ¥830.

An official of a major brokerage house said investors were apparently hunting these issues with hidden incentives to earn short-term capital gains.

Bond prices were steady in early trading in response to the firmness of the bond futures market which stemmed from buying by a major securities firm.

In afternoon trading, however, concern grew over high prices, pushing the prices down to almost the same levels as Monday's.

The yield on the 5.1 per cent government bond, falling due in June 1986, finished at 5.145 per cent compared with Monday's 5.160 per cent, while those on other bonds rose fractionally.

Tokyo most active stocks, Page 35

### EUROPE

## Frankfurt, Paris upset by dollar

A WAVE of caution swept most European bourses yesterday as investors continued to absorb the implications of the slide in the dollar and the weekend realignment of EMS currencies.

Frankfurt was depressed further by worries that exports would be hurt by the lower dollar, together with the persistent strength of the D-Mark despite its revaluation. The Commerzbank index dropped 29.8 to 1,895.3 and falls were registered in most sectors.

In mixed engineering stocks, Deutsche Babcock was up DM 4.70 to DM 211.20. The company announced after trading that it planned a big rights issue and would pay an unchanged dividend on its 1985-86 results.

Also in the sector, KHD and Mannesmann added DM 1.50 each to DM 158.50 and DM 162 respectively, but MAN was off 50 pf to DM 160 and Linde eased 30 pf to DM 670.70.

Bonds firmed in thin trading as investors covered short positions resulting

from speculation before the EMS realignment. The Bundesbank sold DM 121.8m worth of paper after selling DM 21m on Monday.

Amsterdam picked up on some late bargain-hunting to close mixed to higher after concern over the dollar's slide had pushed prices lower earlier in the day. Turnover was thin as many investors waited to see if interest rates would fall.

Oce van der Grinten, the copier-maker, recovered somewhat from its recent plunge, adding F1 15 to F1 410.

MADRID pursued its record-breaking run regardless of the hesitant mood elsewhere in Europe. The stock exchange general index rose 4.44 to finish at a new high of 232.91.

Market leader Telefonica put on 4.7 percentage points to 184.7 per cent of nominal market value.

Among banks, Exterior was up 20 points to 425 per cent and Popular 180 points to 1,760 per cent, while Bilbao and Central remained steady at 1,520 per cent and 1,045 per cent respectively.

Among internationals, Royal Dutch, which has made promising gas discoveries in Peru, gained F1 1 to F1 212.

Paris turned lower as concern grew over interest rates, the strength of the D-Mark and the impact of the lower dollar on exports, while the positive mood engendered by the end of the public sector strikes wore off.

Zurich was little changed to easier on a mixture of profit-taking and selective late bargain-hunting. Trading was moderate, with some investors holding off because of the weak dollar and Frankfurt's poor performance.

Brussels ended little changed in quiet trading, with the bourse showing little reaction to the EMS changes. Petrofina lost BFr 30 to BFr 9,480.

Milan saw investors squaring positions before the trading month ends today. Share prices finished mixed in active trading.

Stockholm fell heavily again in continuing reaction to the budget and to fluctuations in the credit market. The Veckans Affarer all-share index ended down 22.3 to 818.3, having fallen more than 10 per cent so far this week.

Oslo oil shares mainly benefited from the recent rise in oil prices caused by the cold spell and news that Norwegian oil production would be cut back. Norsk Hydro was steady at Nkr 144 ahead of news that 1986 results will be worse than predicted.
